U.S. ENVIRONMENTAL PROTECTION AGENCY  
Office of Pesticide Programs  
Registration Division (7505C)  
401 "M" St., S.W.  
Washington, D.C. 20460

EPA Reg. Number:  
66675-4

Date of Issuance:  
2/9

Term of Issuance:  
Conditional

Name of Pesticide Product:  
Magna-Bon Pro-Tech

NOTICE OF PESTICIDE:  
 Registration  
 Reregistration  
(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Magna-Bon Corporation  
1699 NW 9th Street  
Okeechobee, FL 34972

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.
2. Add the phrase "EPA Registration No. 66675-4" to your label before you release the product for shipment.
3. Submit one (1) copy of your final printed labeling before you release the product for shipment. Refer to the A-79 enclosure for a further description of final printed labeling.

Signature of Approving Official:

Date:

page 2  
EPA Reg. No. 66675-4

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

### Ingredients

Active Ingredient:	
Copper Sulfate Pentahydrate*	19.8%
Inert Ingredients:	80.2%
Total	100.0%

\*Equivalent to 5.0% metallic copper

KEEP OUT OF THE REACH OF CHILDREN

## DANGER

### STATEMENT OF PRACTICAL TREATMENT

**Eyes:** In case of eye contact, flush with plenty of potable water for at least 15 minutes and CALL A PHYSICIAN.

**Skin:** If contact occurs, wash thoroughly with soap and water.

**If Swallowed:** If accidental ingestion occurs, drink large quantities of milk, egg whites, gelatin solution, or if these are not available, drink large quantities of water. CALL A PHYSICIAN OR POISON CONTROL CENTER

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

### STORAGE AND DISPOSAL

**Prohibition:** Do not contaminate water, food or feed by storage or disposal.  
**Storage:** Store in a safe place away from PETS AND KEEP OUT OF THE REACH OF CHILDREN. Store away from excessive heat. Magna-Bon Pro-Teck will freeze. Always keep container closed. Store Magna-Bon Pro-Teck in its original container only. Bulk Magna-Bon Pro-Teck shall be stored and handled in stainless steel, fiberglass, PVC's, polypropylenes or plastic equipment. Keep away from galvanized pipe and any nylon storage handling equipment.  
**Pesticide Disposal:** Excess Magna-Bon Pro-Teck should be disposed of through label use. Do not contaminate lakes, rivers or streams as this may cause fish kill. Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance. In the event of a spill, neutralize with limestone or baking soda before disposal. Concentrate may deteriorate concrete.  
**Container Disposal:** Do not reuse empty container. Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by other approved State and local procedures.

**For Potable Drinking Water in Lakes, Ponds and Reservoirs:** For fastest results apply one (1) gallon of Magna-Bon Pro-Teck to each sixty thousand (60,000) gallons of water. For potable water systems, do not exceed one (1) gallon of Magna-Bon Pro-Teck to each sixty thousand (60,000) gallons of water (1 ppm copper).  
**In Irrigation Conveyance Systems:** For continuous addition, add one (1) gallon of Magna-Bon Pro-Teck in sixty thousand (60,000) gallons of water.

**PRECAUTIONARY STATEMENTS**  
Hazards To Humans And Domestic Animals

**DANGER**

Corrosive: May cause irreversible eye damage. Do not get into eyes or on clothing. Wear goggles or safety glasses. Harmful if swallowed, inhaled or absorbed through the skin. May cause allergic skin response. Avoid contact with skin. Wash thoroughly with soap and water after handling.

**ENVIRONMENTAL HAZARDS**

Do not apply directly to water, except as specified on this label. Do not contaminate water by disposal of equipment washwaters.

**GENERAL INFORMATION**

Magna-Bon Pro-Teck is a copper sulfate pentahydrate formulation used to control bacterial odor and algae in potable drinking water and irrigation conveyance systems.

**GENERAL ALGAE/BACTERIAL ODOR CONTROL**

For algae/bacterial odor control, apply in late spring or early summer when algae and bacteria first appear. The dosages are variable and depend upon algae/bacteria species, water hardness, water temperature, amount of algae/bacteria present, as well as whether water is clear, turbid, flowing or static. Preferably, the water should be clear with the temperature above 60°F or 15.6°C. Higher dosages are required at lower temperatures, higher algae/bacteria concentration, and for hard waters. Application should be done by pouring Magna-Bon Pro-Teck directly from the container into the lakes, ponds, reservoirs or irrigation canals. Several application points speed up dispersal. Static water requires less chemical for algae/bacteria control than does flowing water. Use higher dosages for chara, nitella and filamentous algae (pond scum), and lower dosage for planktonic algae. If there is uncertainty about the dosage, begin with a lower dose and increase until control is achieved, or until the maximum allowable level has been reached. Treatment of algae can result in oxygen loss from the decomposition of dead algae. This loss can cause fish suffocation. If the algae cover more than one-third (1/3) of the total water area, treat in sections. Treat one-third (1/3) to one-half (1/2) of the water area in a single operation and wait for ten (10) to fourteen (14) days between treatments. Begin treatment along the shore and proceed outward in bands to allow fish to move into untreated areas. In regions where ponds freeze in winter, treatment should be done six (6) to eight (8) weeks before expected freeze time to prevent masses of decaying algae under an

ice cover. Trout and certain other species of fish may be killed at recommended application rates, especially in soft or acidic waters. Before treating bodies of water, consult proper state authorities, such as the fisheries commission or conservation department to obtain any necessary permits.

**In Lakes, Ponds and Reservoirs:** For fastest results apply Magna-Bon Pro-Teck evenly throughout the water. Apply one (1) gallon Magna-Bon Pro-Teck to each sixty thousand (60,000) gallons of water (1 ppm copper).

**In Irrigation Conveyance Systems:** For continuous addition, add one (1) gallon Magna-Bon Pro-Teck to each sixty thousand (60,000) gallons. For conveyance systems longer than ten (10) miles, it is recommended that the above dosage be dispersed among injection points every ten (10) miles. However, do not exceed the total dosage of one (1) gallon Magna-Bon Pro-Teck to each sixty thousand (60,000) gallons of water.

**APPLICATION AND HANDLING EQUIPMENT**

Application, handling or storage equipment must consist of either fiberglass, PVC's, polypropylenes, viton, most plastic, aluminum or stainless steel. Never use mild steel, nylon, brass or copper around full strength Magna-Bon Pro-Teck. Always rinse equipment free and clean of Magna-Bon Pro-Teck each night with plenty of fresh, clean water. Concentrate will destroy cotton and nylon material. Always store Magna-Bon Pro-Teck above 32°F. Do not allow Magna-Bon Pro-Teck to freeze. Freezing may cause product separation. Seller makes no warranty for the performance of product which has been frozen. Useful formulas for calculating water volume and flow rates to find the capacity of a water storage containment in gallons: Multiply the water volume in cubic feet by 7.5.

Note: 1 CFS/hr = 27,000 gallons.

1 Acre foot = 326,000 gallons.

**LIMITED WARRANTY AND LIMITATIONS OF REMEDIES**

Seller warrants that the product conforms to the chemical description and is reasonably fit for the purpose stated on the label for use under normal conditions, but makes no other warranties of FITNESS OR MERCHANTABILITY expressed or implied, or any other warranty if the product is used contrary to the label instructions or under abnormal conditions or under conditions not foreseeable to the seller. In no case shall the seller be liable for more than the cost of this product to the buyer, and will in no event be liable for any consequential special or indirect damages connected with the use or handling of this product. This product is offered and the buyer or user accepts it subject to the foregoing terms which may not be varied.
