Attention: Lynn P. Tordo, MS. **Regulatory Manager**

Subject: ACTICIDE MBS 2550 EPA Registration No. 67071-56 Notification Dated September 18, 2012 EPA Received Date October 5, 2012

This will acknowledge receipt of your notification, submitted under the provisions of FIFRA Section 3(c)(9).

Proposed Notification

- Label Changes as required by the State of California and per PR Notice 98-10

General Comments

Based on a review of the submitted material, the following comments apply:

The Notification is in compliance with PR Notice 98-10 and is acceptable. This information has been added to your file.

If you have any questions concerning this letter, please contact Martha Terry at (703) 308-6341.

Sincerely,

Marshall Swindell

Product Manager (33) **Regulatory Management Branch 1** Antimicrobials Division (7510P)

Mr. Marshall Swindell, Product Manager 33 Regulatory Management Branch I Antimicrobial Division, OPP (7510W) U.S. ENVIRONMENTAL PROTECTION AGENCY 2777 Crystal Dr. (Potomac Yard South) Arlington, VA 22202

Re: <u>Product</u>: ACTICIDE[®] MBS 2550, EPA Registration No. 67071-56 Notification of label change <u>Company</u>: Thor GmbH; <u>US Agent</u>: Thor Specialties, Inc

This is a notification and not subject to fees

Dear Mr. Swindell:

This label change notification is submitted by Thor Specialties, Inc., U.S. agent for Thor GmbH. This notification of label change is as required by the State of California and per PR Notice 98-10 / 95-2.

The State of California requested that we submit this notification with regards to the addition of the qualifier "*not approved for use in the state of California".

Modifications are as follows:

The following modification has been made to the Information Sheet:

A qualifier (*) has been added to the front of the following use which is not currently approved in California: *Adhesives and tackifiers

The attached material consists of the following:

- 1. Application Form for a Notification to modify the label.
- 2. Copy of ACTICIDE[®] MBS 2550 label with changes marked (FOR REFERENCE ONLY)
- 3. Final Printed copy of proposed ACTICIDE® MBS 2550 label

If you have any questions or need added information, please do not hesitate to contact me at your convenience.

Sincerely,

Tordo

Lynn P. Tordo, M.S. Regulatory Manager

THIS ACTICIDE® MBS 2550 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE® MBS 2550

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PRESERVATIVE FOR LATICES: ACTICIDE® MBS 2550 microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of synthetic and natural polymer latices (including process wash waters) including: acrylics, styrene-butadiene, carboxylated styrene-butadiene, ethylene-vinyl acetate and biopolymers intended for industrial use such as xanthan gum, gum arabic, guar gum, protein derived polymers, starches and casein derived polymers including latices for paper and paperboard. Add 0.05% to 0.4% ACTICIDE[®] MBS 2550 (0.5 - 4.0 lbs. to 1000 lbs. of emulsion).

For polymers that are highly susceptible to biodeterioration, add up to 1.0% ACTICIDE® MBS 2550 (10.0 lbs. to 1000 lbs of polymer).

Examples of such polymers include those with low free-monomer, low VOC content, high concentrations of reactive Redox agents, low solids content, high surfactant content, natural carbohydrate stabilizers / thickeners, and those with long shelf-life / storage requirements.

PRESERVATIVE FOR BUILDING MATERIALS: ACTICIDE® MBS 2550 microbiocide is recommended as an incontainer preservative for the control of bacteria and fungi in building materials such as mastics, caulks, joint cements, spackles and grouts, and concrete admixtures. Add 0.05% to 0.4% ACTICIDE® MBS 2550 (0.5 - 4.0 lbs. to 1000 lbs. of fluid).

*PRESERVATIVE FOR ADHESIVES AND TACKIFIERS: ACTICIDE® MBS 2550 microbiocide is recommended as a preservative for the control of bacteria and fungi in water soluble and water dispersed adhesives such as animal glues, vegetable glues, natural rubber latices, polyvinyl acetate, styrene-butadiene and acrylic latices. ACTICIDE® MBS 2550 microbiocide is recommended as a preservative for tackifiers derived from rosin and hydrocarbon resins. Add 0.05% to 0.4% ACTICIDE[®] MBS 2550 (0.5 – 4.0 lbs. to 1000 lbs. of fluid). * Not approved for these uses in the state of California

PRESERVATIVE FOR DISPERSED PIGMENTS (MINERAL SLURRIES): ACTICIDE® MBS 2550 microbiocide is recommended for the control of bacteria and fungi in the manufacture and storage of dispersed pigments such as refractory coatings, ceramic glazes, kaolin clay, montmorillonite clay, titanium dioxide, calcium carbonate, calcium sulfate, barium sulfate, magnesium silicate and kieselguhr. Add 0.03% to 0.3% ACTICIDE® MBS 2550 (0.3 – 3.0 lbs per 1000 lbs of dispersion).

PRESERVATIVE FOR PAINTS AND COATINGS: ACTICIDE® MBS 2550 microbiocide is recommended as an in-container preservative for the control of bacteria and fungi in water based coatings such as paper and wood coatings and paints used for architectural product finishes and special purpose coatings. Add 0.05% to 6.4% ACTICIDE[®] MBS 2550 (0.5 – 4.0 lbs. to 1000 lbs. of paint, or coating fluid formulation or polymer latex).

e

THIS ACTICIDE[®] MBS 2550 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE[®] MBS 2550

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*Special purpose coating uses: Include use as a: <> preservative for electrodeposition paints or solutions, <> preservative for photoplating solutions or coatings, <> preservative in fount (or fountain) solutions used in the printing process as a maintenance fluid/coating and as a special coating for printing plates, and <> preservative in spin finish coatings for fibers. The application/addition directions for these special purpose coating uses are: * Not approved for these uses in the state of California

*Electrodeposition: ACTICIDE[®] MBS 2550 microbiocide is recommended as a tankside additive for the control of bacteria, fungi, and algae in re-circulating electrodeposition systems and associated rinse systems. Alternately, ACTICIDE[®] MBS 2550 microbiocide may be added through the components of the electrodeposition paint prior to their addition to the electrodeposition system.

Tankside Addition To Electrodeposition Systems: ACTICIDE[®] MBS 2550 microbiocide should be dispensed into the recirculating rinse system, ultrafilter permeate, or final distilled rinse system at a point to insure uniform mixing. When the system is noticeably fouled, add up to 0.4% ACTICIDE[®] MBS 2550 microbiocide (based on the total gallons of fluid in the system). Repeat until control is achieved. When microbial control is evident, add up to 0.1% ACTICIDE[®] MBS 2550 (based on the total gallons of fluid in the system) weekly or as needed to maintain the system. A change of frequency of treatment may be required depending on the rate of dilution of the preservative with the makeup fluid, the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc.

Treatment Of Electrodeposition Paint Components: Initial Dose of Paint Components: ACTICIDE[®] MBS 2550 microbiocide should be added to the resin, pigment, or other component of the electrodeposition paint at a level to ensure that the final use-dilution fluid will contain no more than 300 ppm isothiazolones

* Not approved for these uses in the state of California

Information Sheet# 560(d1) - 08/13/2012 Page 2 of 4 EPA Reg. No. 67071-56 Manufactured For: Thor GmbH

U.S. Office:

THIS ACTICIDE[®] MBS 2550 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE[®] MBS 2550

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

*Photoplate Processing, Photo Processing, Fountain Solutions, And Ink/Ink Components:

ACTICIDE[®] MBS 2550 microbiocide is recommended for the control of bacteria and fungi in photoplate processing such as stabilizer solutions and in fountain solutions. ACTICIDE[®] MBS 2550 microbiocide is recommended for water-based printing inks such as flexographic, gravure, screen and ink jet types. ACTICIDE® MBS 2550 microbiocide is recommended for the control of bacteria and fungi in printing ink components such as resins, plasticizers, water soluble dyes, pigments, gelling agents, waves, surfactants, and thickeners. ACTICIDE[®] MBS 2550 microbiocide should be added to achieve the recommended dosage range for ink, ink components, fountain solutions and photoplate processing chemicals of 0.05% to 0.4%-on a total weight basis. A level adjustment may be necessary to accommodate the slight change in solution formulations. ACTICIDE® MBS 2550 may be added to concentrates so long as the final usedilution product contains not more than 300 ppm active ingredients.

NOTE: To insure uniform mixing, add ACTICIDE[®] MBS 2550 microbiocide to latex or solution slowly with agitation. The actual concentrations required will depend upon such factors as the specific substance to be treated, frequency of repeated microbial contamination expected and level of protection required. * Not approved for these uses in the state of California

*PRESERVATIVE FOR OIL-IN-WATER EMULSIONS: ACTICIDE® MBS 2550 is recommended for use in spinfinish solutions used in the textile industry and photographic emulsions. Add 0.05% to 0.4% ACTICIDE[®] MBS 2550 (0.5 - 4 lbs. to 1000 lbs. of emulsion).

* Not approved for these uses in the state of California

*IN-CONTAINER PRESERVATIVE: ACTICIDE® MBS 2550 is recommended as an in-container preservative for the control of bacteria and fungi in aqueous products such as aqueous emulsions and dispersions including stabilized oil/water emulsions, surface preparation compounds, foam control products, nutrient solutions and aqueous pesticides which includes, but is not limited to, insecticides, termiticides, fungicides, bactericides, algaecides, herbicides, rodenticides [includes use as an in-container preservative for the control of bacteria and fungi in pesticide products for dilution (with a MIT level of not more than 9 ppm in the final solution) applied to crops and for use in pesticide formulations for use on food contact surfaces at rates described for in-container preservative category]. Add 0.025% to 0.4% ACTICIDE® MBS 2550 (0.25 - 4.0 lbs. per 1000 lbs. of aqueous product). * Not approved for these uses in the state of California

THIS ACTICIDE[®] MBS 2550 INFORMATION SHEET MUST ACCOMPANY EACH SHIPMENT OF ACTICIDE[®] MBS 2550

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

HOUSEHOLD, CONSUMER, INDUSTRIAL, INSTITUTIONAL, JANITORIAL PRODUCTS: For the control of bacteria and fungi in liquid and solid soaps, liquid and solid cleaners liquid and solid detergents, liquid and solid laundry products, liquid and solid dishwashing detergents, waxes, polishes liquid and solid fabric treatment/refresher products, liquid and solid air fresheners/deodorizers, car care products, and other similar cleaners. ACTICIDE[®] MBS 2550 may also be used for the control of bacteria and fungi in package utility products such as pre-moistened sponges and mops. ACTICIDE[®] MBS 2550 may also be used for the control of bacteria and fungi in solutions that are then put into/onto wet wipes for use in industrial, commercial, residential and household uses cited above. Wet wipes containing a solution preserved with this product may not be used for personal care, as baby wipes, or for food contact. ACTICIDE[®] MBS 2550 is added at a level of 0.05% to 0.4% (0.5 to 4.0 lb to 1000 lb of product to be protected).

ACTICIDE[®] MBS 2550 microbiocide may be added to those products formulated as concentrates which are in turn diluted for use at a level to ensure that the final use-dilution product will contain between 0.05% to 0.4% ACTICIDE[®] MBS 2550 microbiocide.

*PRESERVATIVE FOR METAL WORKING FLUIDS: ACTICIDE[®] MBS 2550 microbiocide is recommended for the control of bacteria and fungi in aqueous metal working fluid solutions and emulsions. Add 1 gallon (8.8 lb.) per 1000 gallons of emulsion every 4 weeks for maintenance of a non-fouled system. For a noticeably fouled system use an initial dose of up to 4.0 gallons (35.2 lb.) per 1000 gallons emulsion followed by subsequent maintenance dosage above. A higher dosage rate and/or increased frequency of treatment may be required depending upon the nature and severity of contamination, level of control required, filtration effectiveness, system design, etc. The preservative should be dispensed into the use dilution of the metal working fluid using a metering pump and uniformly dispersed throughout the system.

* Not approved for these uses in the state of California

*PRESERVATIVE FOR TEXTILES/CORDAGE PRODUCTS AND TEXTILE-/TEXTILE-FIBERS MAKING

ACTICIDE[®] MBS 2550 is recommended as a preservative for the control of bacteria and fungi in textiles and non-woven products (such as canvas, carpet, cordage, drapes, and shower curtains), in chemicals commonly used in the production of natural and synthetic fibers and fabrics (such as fiber lubricants, spin finishes, sizes, dyestuffs, textile printing inks, dispersants, thickeners, dye fixatives, hand builders and weighters), and in textile coatings. Add 0.05% to 0.4% ACTICIDE[®] MBS 2550 (0.5 – 4 lbs. to 1000 lbs. of fluid).

ACTICIDE® MBS 2550 microbiocide weighs 8.8 lbs. per gallon
