AQUA CHEM BALANCED FOR CLEAN POOLS BLACK OUT

{Optional marketing statements that may be used with swimming pool algaecide.}
[For Use in White Plaster Pools Only]
[For Killing Black Algae]
[Algaecide]

ACTIVE INGREDIENT:

KEEP OUT OF REACH OF CHILDREN DANGER

Trichloro-s-triazinetrione

99.0%

Other Ingredients

1.0%

TOTAL INGREDIENTS

100.0%

(Available Chlorine 90%)

FIRST AID: IF SWALLOWED: Drink promptly large quantities of water. Do not induce vomiting. Avoid alcohol. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately. IF IN EYES: Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Get medical attention. IF ON SKIN: Wash with plenty of soap and water. Get medical attention. IF INHALED: Remove to fresh air. If not breathing, give artificial respiration, preferably, mouth-to-mouth. Get medical attention. NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage. [IN CASE OF MEDICAL EMERGENCY, CALL] [1-303-623-5716] [telephone number supplied by supplemental registrant].]

See [back] [side] panel for additional precautionary statements.

NET WEIGHT

{Directions to be used for swimming pool algaecide}

WHY TO USE THIS PRODUCT: This product is a potent way to destroy green and other types of algae in white plaster pools. It is especially effective against black algae because it can be applied directly to the black spots which occur with this type of growth.

IMPORTANT NOTES:

- When using other products, as outlined in directions for this product, always follow label directions for those products.
- Sunlight, rainfall, temperature, number of swimmers and frequency of pool use affect the rate of chlorine loss. Adjust cleaning and chemical maintenance accordingly. To eliminate harmful algae and micro-organisms, superchlorinate pool every 2-4 weeks.
- 3. Use this product ONLY on white plaster pool surfaces. It can bleach or damage painted surfaces or vinyl or fiberglass materials.
- 4. When applying this product on surfaces near water inlets and outlets, shut off pump before application and wait until granules have dissolved completely.

DIRECTIONS FOR USE:

It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN

- 1. Ensure all pool equipment is working properly. Backwash filter following manufacturer's directions.
- 2. Check chlorine level with a test kit and adjust to 1-3 ppm by adding [Stabilized Granular Chlorinator] [a stabilized granular chlorinator].
- 3. Check water pH, alkalinity and calcium hardness with a test kit. Adjust pH to 7.2 7.6 by adding [pH Decreaser] [pH Down] to lower pH, or [pH Add] [pH Up] to raise pH. Adjust alkalinity to 80 125 ppm for plaster pools, 125 150 for vinyl or fiberglass pools by adding [an alkalinity increaser] [Total Alkalinity Increaser] [Alkalinity Plus]. Adjust calcium hardness to 200 275 ppm for plaster pools, 175 225 for vinyl or fiberglass pools by adding Calcium Hardness Increaser.
- 4. Turn off the pump, vigorously brush all algae spots and wait 4 hours for the pool to become stationary.

NOW USE THIS PRODUCT

- At night or when the pool is not in use, broadcast this product directly over pool surface, concentrating dosage over algae spots. Do not add this product to pool skimmer.
- 2. Wait approximately 24 hours, then turn pump on and remove dead algae from pool surfaces by trushing and then vacuuming.
- 3. For large surface areas heavily covered with algae spots, this product may be spread over surface at a rate of 2 pounds per 10,000 gallons of pool capacity.

Reentry into treated swimming pool is prohibited above levels of 3 ppm chlorine due to risk of body injury.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. CONTAINER DISPOSAL: Do not reuse container, but place in trash collection. Rinse thoroughly before discarding in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: CORROSIVE: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with scap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with other chemicas. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water.
