Application for Pesticide - Section I

1. Company/Product Number 67262-17	2. EPA Product Manager 32	3. Proposed Classification ☒ None ☐ Restricted
4. Company/Product (Name) 1" Stabilized Chlorinator Tablets	PM# R. Douglas	
5. Name and Address of Applicant (Include ZIP Code) Recreational Water Products, Inc. P.O. Box 887 Scottdale, GA 30079 ☐ Check if this is a new address	6. Expedited Review. In accordance with FIFRA Section 3(c)(3) (b)(i), my product is similar or identical in composition and labeling to: EPA Reg. No. _____ Product Name _____	

Section - II

☐ Amendment - Explain below.	☒ Final printed labels in response to Agency letter dated <u>July 29, 1993</u>
☐ Resubmission in response to Agency letter dated _____	☐ "Me Too" Application.
☒ Notification - Explain below.	☐ Other - Explain below.

Explanation: Use additional page(s) if necessary. (For section I and Section II.)

Notification per PR Notice 93-10. This is to certify that this notification meets every requirement of PR Notice 93-10.

Section - III

1. Material This Product Will Be Packaged In:				2. Type of Container	
Child-Resistant Packaging ☐ Yes* ☐ No	Unit Packaging ☐ Yes ☐ No	Water Soluble Packaging ☐ Yes ☐ No	☐ Metal ☐ Plastic ☐ Glass ☐ Paper ☐ Other (Specify) _____		
* Certification must be submitted		If "Yes" Unit Packaging wgt.	No. per container	If "Yes" Package wgt.	No. per container
3. Location of Net Contents Information ☐ Label ☐ Container		4. Size(s) Retail Container		5. Location of Label Directions ☐ On Label ☐ On Labeling accompanying product	
6. Manner in Which Label is Affixed to Product ☐ Lithograph ☐ Paper glued ☐ Stenciled		☐ Other _____			

Section - IV

1. Contact Point (Complete items directly below for identification of individual to be contacted, if necessary, to process this application.)			
Name Mark Jernigan	Title Federal Registration Manager	Telephone No. (Include Area Code) (404) 370-1761 ext. 359	
Certification I certify that the statements I have made on this form and all attachments thereto are true, accurate and complete. I acknowledge that any knowingly false or misleading statement may be punishable by fine or imprisonment or both under applicable law.			6. Date Application Received (Stamped)
2. Signature 	3. Title Federal Registration Manager		
4. Typed Name Mark Jernigan	5. Date 7/14/95		

1" TABLETS STABILIZED CHLORINATOR

Concentrated, Slow-Dissolving Sanitizer for Routine Use in Automatic Feeders and Floaters

Pool Time

ACTIVE INGREDIENT: Trichloro-s-triazine-trione _____ 99%
INERT INGREDIENTS: _____ 1%
TOTAL INGREDIENTS: _____ 100%
Available chlorine 90%

KEEP OUT OF REACH OF CHILDREN
DANGER See back panel for additional precautionary statements.
NET WEIGHT: 2.27 kg (5 Lbs.)

WHY To Use This Product

This slow-dissolving, stabilized chlorinator (90% available chlorine) is the most efficient type of sanitizer for pools with automatic feeders or floaters, but is **NOT RECOMMENDED FOR USE IN SKIMMERS**. It reduces chlorine loss due to sun light and other environmental factors better than unstabilized chlorinators such as calcium hypochlorite or liquid chlorine (bleach), and has less effect on pH balance. These slow-dissolving tablets are also available in 3" size for use in summer or all other feeders. For pools without feeders a stabilized but less concentrated (82% available chlorine) chlorinator is available in granular form.

HOW To Use This Product

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

START-UP/INITIAL TREATMENT: Before using this product to open your pool we recommend: 1. Check pool structure and equipment, clean filter (using filter cleaner/degreaser if needed). Also clean pool walls and bottom thoroughly and get fresh reagents for your test kit. 2. If water is cloudy or green, shock (superchlorinate) pool with appropriate shock product. 3. Test pH and adjust to between 7.4 and 7.6 with pH DOWN to lower pH or pH UP to raise pH. 4. Add chlorine stabilizer (dry cyanuric acid) if test shows stabilizer level below 40 ppm. **IMPORTANT:** All sanitizers work better if water is stabilized at the beginning of the pool season. 5. Test total alkalinity (TA) and adjust if needed with total alkalinity increaser to raise TA or pH DOWN to lower TA. 6. Shock pool with the shock product for your type of pool. 7. Test chlorine level and add 1" Tablets to feeder or floater to bring level to 1.0 - 3.0 ppm. 8. When chlorine level is adjusted to 1.0 - 3.0 ppm, set the steps as appropriate to your needs.

ROUTINE MAINTENANCE: Fill feeding device with enough 1" Tablets to assure constant treatment level of 1.0-3.0 ppm available chlorine. Chart below gives dosage guidelines. Weather and pool use affect sanitizer levels, so test pool and check feeding device often and refill as needed.

APPROXIMATE WEEKLY DOSE STABILIZED CHLORINATOR TABLETS*

Appx. Pool Size	7-10° Gallons	Water 60-70°	Water 70-80°	Water 80-90°
14 x 28	15,000	5 oz.	9 oz.	14 oz.
16 x 32	20,000	7 oz.	12 oz.	18 oz.
18 x 36	30,000	10 oz.	18 oz.	27 oz.
20 x 40	35,000	12 oz.	21 oz.	31 oz.
24 x 48	45,000	15 oz.	27 oz.	41 oz.

* Each 1" tablet weighs about 1/2 ounce.

In addition to routine use of this product as directed, PT recommends:
1. At least once a week, test pH and adjust to between 7.4 and 7.6 if needed with pH DOWN to lower pH or pH UP to raise pH. 2. Every 4 weeks, test water stabilization and add chlorine

stabilizer if needed. 3. Every increaser to raise TA or pH 1 your type of pool. 8. Once a USE: 1" TABLETS IN YOUR
STORAGE AND
when not in use. Store in a decomposition, isolate contents before discarding not contaminated food or feed

HAZARD: Highly corrosive on skin, or on clothing. Wear and throat. Avoid breathing. **PHYSICAL AND CHEMICAL:** clean dry vessels. Do not use products. Such use may cause organic matter or other hazardous gases and possible short; do not reuse container large volume of water if used. **ENVIRONMENTAL HAZARD:** effluent containing this product accordance with the requirements and the permitting authority. Do not discharge effluent without previously notifying. For guidance contact your S EPA.

STATEMENT OF PRACTICE: of water. Call a physician or chemical and flush skin with persists, get medical attention 15 minutes. Get medical attention IN THE EVENT OF A MEDICAL
