# Clarity™

## GRANULAR CHLORINATING CONCENTRATE

**ACTIVE INGREDIENT:**  
Sodium Dichloro-S-Triazinetrione ... 96.0%  
**INERT INGREDIENTS:** ..... 4.0%  
**TOTAL** ..... 100.0%  
Available chlorine 62 %

**KEEP OUT OF REACH OF CHILDREN**  
**DANGER** See back panel for additional precautionary statements.  
**NET WEIGHT: 5 LBS. (2.27 kg)**

### WHY To Use This Product

This fast-dissolving, stabilized granular chlorinator (62% available chlorine) is the most efficient type of sanitizer for use in pools where scoop application is used. It reduces chlorine loss due to sun light and other environmental factors better than unstabilized chlorinators such as calcium hypochlorite or liquid chlorine (bleach), and has less effect on pH balance. More concentrated (90% available chlorine), stabilized chlorinators are available.

### HOW To Use This Product

**DIRECTIONS FOR USE:** It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**START-UP / INITIAL TREATMENT:** Before using this product to open your pool, Pool Time (PT) recommends: 1. Check pool structure and equipment, clean filter (using PT Filter Cleaner/Degreaser if needed). Also clean pool walls and bottom thoroughly and get fresh PT reagents for your test kit. 2. If water is cloudy or green, shock (superchlorinate) pool with appropriate shock product. 3. Test total alkalinity (TA) and adjust if needed with total alkalinity increaser to raise TA or pH down to lower TA. 4. Test pH and adjust to between 7.4 and 7.5 with pH down to lower pH or pH up to raise pH. 5. Add chlorine stabilizer (dry cyanuric acid) if test shows stabilizer level below 40 ppm. **IMPORTANT** — All sanitizers work better if chlorine is stabilized at the beginning of the pool season. 6. Shock pool with the shock product for your type of pool. 7. Broadcast 4 ounces of this product per 10,000 gallons of water with a scoop. Repeat until your test kit indicates an available chlorine level of 1.0 to 2.0 ppm. 8. When chlorine level is adjusted to 1.0 - 2.0 ppm, add the algicide appropriate to your needs.

**ROUTINE MAINTENANCE:** Check your pool at least weekly with a test kit. Broadcast Clarity Granular Chlorinating Concentrate with a scoop when the available chlorine level falls below 1.0 ppm. Use the Chart below as a dosage guideline to maintain available chlorine at 1.0 to 2.0 ppm.

**APPROXIMATE WEEKLY DOSE OF CLARITY GRANULAR CHLORINATING CONCENTRATE**

Apprx. Pool Size	Apprx. Gallons	Water 60-70"	Water 70-80"	Water 70-90"
14 x 28	15,000	8 oz.	14 oz.	20 oz.
16 x 32	20,000	10 oz.	18 oz.	27 oz.
18 x 36	30,000	15 oz.	27 oz.	40 oz.
20 x 40	35,000	18 oz.	32 oz.	47 oz.
24 x 48	45,000	23 oz.	41 oz.	61 oz.

In addition to routine use of this product as directed, PT recommends:  
1. At least once a week, test pH and adjust to between 7.4 and 7.5 with PT pH DOWN to lower pH or PT pH UP to raise pH. 2. Every 2-3 weeks, test total alkalinity (TA) and adjust with PT TOTAL ALKALINITY INCREASER to raise TA or pH DOWN to lower TA. 3. Every 2 weeks, shock pool with the shock product for your type of pool. 4. Once a week, add the algicide appropriate to your needs.

**STORAGE AND DISPOSAL:** Keep product dry in a tightly closed container, when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. In case of decomposition, isolate container (if possible) and flood area with large amounts of water to dissolve all materials before discarding this container. Do not reuse empty container but place in trash collection. Do not contaminate food or feed by storage or disposal, or cleaning of equipment.

### PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

**DANGER:** Highly corrosive. Causes skin and eye damage. May be fatal if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or safety glasses and rubber gloves when handling this product. Irritating to nose and throat. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

**PHYSICAL AND CHEMICAL HAZARDS - STRONG OXIDIZING AGENT:** Mix only with water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, chlorine gas (and possible fire and explosion). In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well ventilated area. Flood area with large volumes of water, if necessary.

**ENVIRONMENTAL HAZARDS:** This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**STATEMENT OF PRACTICAL TREATMENT IF SWALLOWED:** Drink large amounts of water. Avoid alcohol. DO NOT induce vomiting. Call a physician or poison control center immediately. **IF CONTACT WITH EYES OCCURS:** Flush with cold water for at least 15 minutes. Get medical attention. **IF CONTACT WITH SKIN:** Brush off excess chemical and flush skin with cold water for at least 15 minutes. If irritation persists, get medical attention.

**IN THE EVENT OF A MEDICAL EMERGENCY CALL: 1-303-823-5718**

**How to Determine Pool Capacity**

Shape of Pool	Compute Total Gal. of Water By Multiplying
Rectangle	Length x Width x Average Depth x 7.5
Round	Diameter x Diameter x Average Depth x 5.9
Oval	Long Dia. x Short Dia. x Average Depth x 5.9
Irregular	Consult with pool builder
