{Directions to be used for shock application, Option A}

[WHY TO USE THIS PRODUCT: This premium shock product is easy to use and performs multiple, important maintenance functions. Shock Plus® effectively oxidizes during shock treatment organic contaminants that cause cloudy water, musty odors and eye irritation by utilizing advanced patented technology. This technology combines oxidizers, water clarifiers, flocculants and buffers to provide crystal clear water with no cloudy residue and without increasing pH like ordinary shock products.

Shock Plus is designed for use in all pool types by adding the product directly to the pool without pre-dissolving. Because it dissolves rapidly and performs multiple maintenance functions, this product works fast and effectively, allowing swimming to resume in as little as 15 minutes.* Shock Plus is ideal for both last minute and routine maintenance applications.]
