Subject: Label Amendment – Changes Required by the Boric Acid
Interim Registration Review Decision
Product Name: 3” Tablets Plus
EPA Registration Number: 67262-30
Received Date: 11/30/2018
Action Case Number/Decision Number: 549083

Dear Ashley Ashe,

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

The Agency, in accordance with the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, has completed reviewing all of the information submitted with your application to support the Registration Review of the above referenced product in connection with the boric acid amended interim decision, and has concluded that your submission is acceptable.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6) you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 12 months from the date of this letter. After 12 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product

would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) list examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Compliance.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Megan Snyderman by phone at 202-566-0639 or via email at snyderman.megan@epa.gov.

Sincerely,

A handwritten signature in blue ink, appearing to read 'J. Gayoso', is centered below the 'Sincerely,' text.

Jose Gayoso, Senior Regulatory Advisor
Reevaluation Branch
Antimicrobials Division (7510P)
Office of Pesticide Programs

Enclosure: Accepted Label

{All text in braces {xxx} is administrative and will not appear on a final label.}*

3" Tablets Plus

ACTIVE INGREDIENTS:

Trichloro-s-triazinetriene 79.2%

Boron sodium oxide (B₄Na₂O₇), pentahydrate 10.0%

OTHER INGREDIENTS [(Clarifiers and Filtration Enhancers)] 10.8%

TOTAL INGREDIENTS 100.0%

(Available Chlorine: 72.0%)

DANGER

KEEP OUT OF THE REACH OF CHILDREN

FIRST AID: IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a poison control center or doctor. Do not give anything by mouth to an unconscious person. **IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. **IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IN CASE OF MEDICAL EMERGENCY, CALL [1-877-800-5553] [1-866-366-5048].

Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage.

See [back] [side] panel for additional precautionary statements.

{Following chart is optional.}

Our Ingredients:	What They Do:
Trichloro-s-triazinetriene	Kills Bacteria, Kills Algae, Destroys Organic Wastes
Boron sodium oxide	Prevents Algae

(B ₄ Na ₂ O ₇)pentahydrate	
Clarifier/Filtration Enhancer	Makes water Crystal Clear

Why to use this product:

This patented, multifunctional product, is a breakthrough in 3" tablet technology that will provide a noticeably clear pool with few algae problems. This chlorinated sanitizer kills bacteria and unsightly algae, clears up cloudy water, and inhibits future algae growth. The product's patented blend of Sun Shield™ protected chlorine, special clarifier, filtration enhancer, and algae preventative provides the perfect solution for clear and inviting pool water. This product can be used in skimmers, floaters, and feeders.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. **READ ENTIRE LABEL AND USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS FOR USE.**

WATER BALANCE: Optimum product performance and swimmer comfort will be achieved if you test, adjust and maintain to the following: pH between 7.2 and 7.6, total alkalinity between 80 and 125 PPM for plaster pools and 125 – 150 PPM for vinyl, fiberglass and painted pools, and calcium hardness between 200 and 250 PPM for plaster pools, and 175-225 PPM for vinyl, fiberglass, and painted pools while using this product.

INITIAL START-UP: Follow these steps if you are opening your pool in the spring, the pool has not been maintained for several weeks, or if the pool is freshly filled. Backwash and clean the filter per the filter manufacturer's directions. Add stabilizer to establish a minimum level of 20-30 PPM cyanuric acid. Add a granular chlorinating product to the pool water, following that product's label directions, until you obtain a chlorine level of 1-3 PPM. When using other products as outlined in directions for this product, always follow directions on those products.

ROUTINE USE IN SKIMMERS: Add one tablet to the pool skimmer basket for each 10,000 gallons of water. Monitor chlorine level and adjust the number of tablets as needed to maintain a chlorine level between 1 and 3 PPM. Distribute the tablets evenly among all skimmer baskets. Before adding other products through the skimmer, it is important to remove these tablets first, as an explosion or fire may result. Replace the tablets in the skimmer after completing other product additions. Adjusting the hours of pool circulation or the number of tablets added to the skimmer helps to regulate the chlorine level. The number of tablets required and frequency of addition will vary with the number of swimmers, water temperature, rain showers, and pump operating time. Operate the pump a minimum of 10 hours per day for best results. Do not let these tablets come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

ROUTINE USE IN CHLORINATORS, FLOATERS, AND FEEDERS: Fill unit with these tablets. Monitor chlorine level and adjust the feeding mechanism to maintain a chlorine level of 1 to 3 PPM. The number of tablets required and the feeding mechanism adjustment will vary with the number of swimmers, water temperature, rain showers, and pump operating time. Operate the pump a minimum of 10 hours per day for best results. Check and refill the chlorinator, floater, or feeder as needed. Do not let these tablets come in direct contact with vinyl liners or other bleachable surfaces as damage may occur.

Reentry into treated swimming pools is prohibited when chlorine levels are above 3 PPM due to risk of bodily injury.

DISCHARGE DIRECTIONS FOR COMMERCIAL AND RESIDENTIAL POOL

USES - Before draining a treated pool, contact your local sanitary sewer and storm drain authorities and follow their discharge instructions. Do not discharge treated pool water to any location that flows to a gutter, storm drain or natural water body unless discharge is allowed by state and local authorities.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Offer for recycling if available or place in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive. Causes irreversible eye damage. Causes skin irritation. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear safety glasses or goggles and use rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

PHYSICAL OR CHEMICAL HAZARDS: STRONG OXIDIZING AGENT: Do not mix with any other chemicals except water. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire, and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

In the Directions for Use section see specific "Discharge Directions for Commercial and Residential Pool Uses."

NOTE: User assumes all responsibility for use not in accordance with directions.
