U.S. ENVIRONMENTAL PROTECTION AGENCY
Office of Pesticide Programs
Antimicrobials Division (7510C)
401 "M" St., S.W.
Washington, D.C. 20460

EPA Reg. Number:

67262-32

Date of Issuance:

APR 26 2002

Term of Issuance:

Conditional

Name of Pesticide Product:

3" Tablets

NOTICE OF PESTICIDE:

Registration
 Reregistration

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Recreational Water Products, Inc.
P.O. Box 887
Scottdale, GA 30079

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for reregistration of your product under FIFRA section 4.

2. Change the label by revising the EPA Registration Number to read, "EPA Reg. No. 67262-32".

3. Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Signature of Approving Official:

Robert S. Brennis, PM 32

Date:

APR 26 2002

{All text in brackets [xxx] is optional and may or may not be included on a final label.}
{All text in braces {xxx} is administrative and will not appear on a final label.}

3" Tablets

{Optional marketing statements that may be used with pool sanitization with 1 inch tablets.}
[Slow-Dissolving Sanitizer for Routine Use in Automatic Feeders or Floaters]
[Kills Bacteria]
[Kills Bacteria and Algae]

{Optional marketing statements that may be used with pool sanitization with 3 inch tablets.}
[Slow-Dissolving Sanitizer for Routine Use in Automatic Feeders, Floaters, or Plastic Skimmers]
[Kills Bacteria]
[Kills Bacteria and Algae]

{Optional marketing statements that may be used with pool sanitization with sticks.}
[Slow-Dissolving Sanitizer for Routine Use in Automatic Feeders, Floaters, or Plastic Skimmers]
[Kills Bacteria]
[Kills Bacteria and Algae]

ACTIVE INGREDIENT: Trichloro-s-triazinetriene 94.05%
OTHER INGREDIENTS:5.95%
TOTAL INGREDIENTS:100.00%
(Available Chlorine 84.65%)

ACCEPTED

EPA Letter Dated:

APR 26 2002

Under the Federal Insecticide, Fungicide, and Rodenticide Act as amended, for the pesticide, registered under EPA Reg. No.

67262-32

KEEP OUT OF REACH OF CHILDREN
DANGER

FIRST AID: IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth, if possible. Call poison control center or doctor for treatment advice. IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. IF SWALLOWED: Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person. Note to Physician: Probable mucosal damage may contraindicate the use of gastric lavage. [IN CASE OF MEDICAL EMERGENCY, CALL [1-303-623-5716] [1-877-800-5553] [telephone number supplied by supplemental registrant].]

See [back] [side] panel for additional precautionary statements.

{Directions to be used for pool sanitization with 1 inch tablets}

POOL SANITIZATION WITH 1 INCH TABLETS

WHY TO USE THIS PRODUCT: This product is one of the most efficient types of stabilized chlorinating sanitizers and is for use in automatic feeders and floaters. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and kill bacteria in your pool. Unlike unstabilized pool sanitizers such as calcium hypochlorite or liquid chlorinating product (bleach), this product contains both chlorine and a stabilizer that reduces chlorine loss from sunlight.

IMPORTANT NOTES:

1. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
2. Sunlight, rainfall, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss. Adjust cleaning and chemical maintenance accordingly.
3. Use this product in an automatic feeder or floater designed for this product.
4. Do not add other chemicals into the feeder or floater where this product is in use as a fire or explosion may occur.
5. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN:

1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-50 PPM with stabilizer.
2. Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.2-7.6. Adjust alkalinity to 80-125 PPM for plaster pools and 125-150 for vinyl or fiberglass pools. Adjust calcium hardness to 200-275 PPM for plaster pools, 175-225 for vinyl or fiberglass pools. Be sure to follow label directions when using other products as outlined in directions for this product.
3. Check the free available chlorine level and adjust to 1-3 PPM by adding a granular chlorinating product.

5/11

NOW USE THIS PRODUCT

START-UP/INITIAL TREATMENT:

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
2. Add this product to feeder or floater and then, test for the free available chlorine level, and adjust the feeder or floater to maintain a free available chlorine level between 1-3 PPM.
3. When free available chlorine level is adjusted to 1-3 ppm, add the algicide appropriate to your needs.

ROUTINE MAINTENANCE:

Add this product to the floater or feeder to maintain a constant free available chlorine level of 1-3 PPM. Check the floater or feeder often and refill as needed.

{Directions to be used for pool sanitization with 3 inch tablets}

POOL SANITIZATION WITH 3 INCH TABLETS

WHY TO USE THIS PRODUCT: This product is one of the most efficient types of stabilized chlorinating sanitizers and is for use in automatic feeders, floaters, or skimmers. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and kill bacteria in your pool. Unlike unstabilized pool sanitizers such as calcium hypochlorite or liquid chlorinating product (bleach), this product contains both chlorine and a stabilizer that reduces chlorine loss from sunlight.

IMPORTANT NOTES:

1. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
2. Sunlight, rainfall, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss. Adjust cleaning and chemical maintenance accordingly.
3. Use this product in an automatic feeder, floater, or skimmer designed for this product.
4. Do not add other chemicals into the feeder, floater, or skimmer where this product is in use as a fire or explosion may occur. Use this product in a skimmer only if the skimmer and the piping between skimmer and pump are plastic. In vinyl pools, do not leave the pump turned off for more than 8 hours when this product is in the skimmer. If the pump is off for more than 8 hours, bleaching and damage to liner may occur.
5. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw tablets directly into pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN:

1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-50 PPM with stabilizer.
2. Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.2-7.6. Adjust alkalinity to 80-125 PPM for plaster pools and 125-150 for vinyl or fiberglass pools. Adjust calcium hardness to 200-275 PPM for plaster pools, 175-225 for vinyl or fiberglass pools. Be sure to follow label directions when using other products as outlined in directions for this product.
3. Check the free available chlorine level and adjust to 1-3 PPM by adding a granular chlorinating product.

7/11

**NOW USE THIS PRODUCT
START-UP/INITIAL TREATMENT:**

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
2. If using a feeder or floater, add this product and then, test for the free available chlorine level, and adjust the feeder or floater to maintain a free available chlorine level between 1-3 PPM.
3. If using a plastic skimmer, add one tablet of this product per 10,000 gallons of pool water and test for the free available chlorine level, adding more tablets as necessary to maintain a free available chlorine level of 1-3 PPM.
4. When free available chlorine level is adjusted to 1-3 ppm, add the algicide appropriate to your needs.

ROUTINE MAINTENANCE:

Add this product to the floater, feeder, or skimmer to maintain a constant free available chlorine level of 1-3 PPM. Check the floater, feeder, or skimmer often and refill as needed.

{Directions to be used for pool sanitization with sticks}

POOL SANITIZATION WITH STICKS

WHY TO USE THIS PRODUCT: This product is one of the most efficient types of stabilized chlorinating sanitizers and is for use in automatic feeders, floaters, or skimmers. This slow dissolving product releases sufficient chlorine to reduce the growth of harmful algae and kill bacteria in your pool. Unlike unstabilized pool sanitizers such as calcium hypochlorite or liquid chlorinating product (bleach), this product contains both chlorine and a stabilizer that reduces chlorine loss from sunlight.

IMPORTANT NOTES:

1. Shock your pool every week and also after heavy rain or heavy use to help keep your pool water properly maintained.
2. Sunlight, rainfall, temperature, number of swimmers, and frequency of pool use affect the rate of chlorine residual loss. Adjust cleaning and chemical maintenance accordingly.
3. Use this product in an automatic feeder, floater, or skimmer designed for this product.
4. Do not add other chemicals into the feeder, floater, or skimmer where this product is in use as a fire or explosion may occur. Use this product in a skimmer only if the skimmer and the piping between skimmer and pump are plastic. In vinyl pools, do not leave the pump turned off for more than 8 hours when this product is in the skimmer. If the pump is off for more than 8 hours, bleaching and damage to liner may occur.
5. To avoid damage to pool surface or materials do not allow product to come in direct contact with these materials. Do not throw sticks directly into pool.

DIRECTIONS FOR USE: It is a violation of Federal Law to use this product in any manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

BEFORE YOU BEGIN:

1. Ensure all pool equipment is working properly. Adjust stabilizer levels to 40-50 PPM with stabilizer.
2. Test the water's pH, alkalinity, and calcium hardness and adjust to the correct level. Adjust pH to 7.2-7.6. Adjust alkalinity to 80-125 PPM for plaster pools and 125-150 for vinyl or fiberglass pools. Adjust calcium hardness to 200-275 PPM for plaster pools, 175-225 for vinyl or fiberglass pools. Be sure to follow label directions when using other products as outlined in directions for this product.
3. Check the free available chlorine level and adjust to 1-3 PPM by adding a granular chlorinating product.

9/11

**NOW USE THIS PRODUCT
START-UP/INITIAL TREATMENT:**

1. If water is cloudy or green, superchlorinate pool with appropriate shock product until pool is clear.
2. If using a feeder or floater, add this product and then, test for the free available chlorine level, and adjust the feeder or floater to maintain a free available chlorine level between 1-3 PPM.
3. If using a plastic skimmer, add one stick of this product per 10,000 gallons of pool water and test for the free available chlorine level, adding more sticks as necessary to maintain a free available chlorine level of 1-3 PPM.
4. When free available chlorine level is adjusted to 1-3 ppm, add the algicide appropriate to your needs.

ROUTINE MAINTENANCE:

Add this product to the floater, feeder, or skimmer to maintain a constant free available chlorine level of 1-3 PPM. Check the floater, feeder, or skimmer often and refill as needed.

10/11

Reentry into treated swimming pools is prohibited when free available chlorine levels are above 3 PPM due to risk of body injury.

STORAGE AND DISPOSAL: Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food or feed by storage or disposal. **CONTAINER DISPOSAL:** Do not reuse container, but place in trash collection. Rinse thoroughly before discarding in trash.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGER: Corrosive: Causes irreversible eye damage and skin burns. May be fatal if absorbed through skin. May be fatal if inhaled. Do not breathe dust or fumes. Irritating to nose and throat. Harmful if swallowed. Do not get in eyes, on skin or on clothing. Wear goggles or face shield, protective clothing and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, or using tobacco. Remove contaminated clothing and wash before reuse.

PHYSICAL OR CHEMICAL HAZARDS: CONTAINS A STRONG OXIDIZING AGENT. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. When using automatic feeding devices, always follow manufacturer's directions as to the proper addition of sanitizer product to chlorinators. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter, or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area. Flood area with large volumes of water.

{Environmental hazards statement for end-use products in containers of less than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS This pesticide is toxic to fish and aquatic organisms.]

{Environmental hazards statement for end-use products in containers equal to or greater than 50 pounds (solid, dry weight).}

[ENVIRONMENTAL HAZARDS This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.]
