Bridgeton, MO 67044

Attention: Mr. Joseph E. Dyer

**Subject** Rat Control Pellets  
EPA Reg. No. 67517-23  
Revised label  
Our letter of July 17, 2002  
Your letter of August 9, 2002

**Purpose** The purpose of your submission is to amend the label of your product in accordance with our July 17, 2002, letter.

**Review of label** The labeling submitted with the above letter, under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) is acceptable, provided that you make the following labeling change and submit one (1) copy of final printed labeling to us:

1. Retain the "IF SWALLOW" text of your label as mandatory. Because of the large number of oral incidents every year, the person handling the incident needs that information to obtain the advice and reassurance needed.

A copy of the stamped label is enclosed for your records.

**Existing stocks** Stocks of existing labels may be used for eighteen (18) months.

**Consequence for non-compliance** If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product constitutes acceptance of this condition.

PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS  
CAUTION

Keep away from humans, domestic animals and pets. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling bait. If swallowed this material may reduce the clotting ability of the blood and cause bleeding.

\*[FIRST AID

If Swallowed ° Call a poison control center or doctor immediately for treatment advice.  
° Have person sip a glass of water if able to swallow.  
° Do not induce vomiting unless told to do so by a poison control center or doctor.  
° Do not give anything by mouth to an unconscious person.]

HOT LINE NUMBER

Have the product container or label with you when calling a poison control center or doctor for treatment. You may also contact 1-800-858-7378 for health concerns, emergency medical treatment information or pesticide incidents.

NOTE TO PHYSICIAN

If ingested, administer Vitamin K, intramuscularly or orally as indicated in bishydroxycoumarin overdoses. Repeat as necessary based on monitoring of prothrombin times.

ENVIRONMENTAL HAZARDS

This product is toxic to mammals and birds. For Terrestrial uses, do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

\*Note #1: The use of bracketed [ ] first aid statements is optional.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions.

**IMPORTANT:** Do not expose children, pets or other nontarget animals to rodenticides. To help to prevent accidents:

1. Store product not in use in a location out of reach of children and pets.
2. Apply bait in locations out of the reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from stations when they are lifted, units must be secured or otherwise immobilized. Even stronger bait stations are needed in areas open to hooved livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
3. Dispose of product container and unused, spoiled and unconsumed bait as specified on this label.

**USE RESTRICTIONS:** This product may be used to control Norway rats, roof rats, and house mice in and around homes, industrial and agricultural buildings, and similar man-made structures. Do not place bait in areas where there is a possibility of contaminating food or surfaces that come in direct contact with food. Do not broadcast bait.

**SELECTION OF TREATMENT AREAS:** Determine areas where rodents will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, in or beside burrows, in corners and concealed places, between floors and walls, or in locations where rodents or their signs have been seen. Protect bait from rain or snow. Remove as much alternative food accessible to rodents as possible.

**APPLICATION DIRECTIONS:**

**FOR NORWAY AND ROOF RATS:** Apply 4 to 16 ounces of RAT CONTROL PELLETS per placement. Maintain an uninterrupted supply of fresh bait for at least 10 days.

**FOR HOUSE MICE:** Apply 1/4 to 1/2 ounce (one to two level tablespoons) of RAT CONTROL PELLETS at 8 to 12 foot intervals. Larger placements (up to 2 ounces) may be needed at points of very high mouse activity. Maintain an uninterrupted supply of fresh bait for at least 15 days.

6/6

SIDE/BACK PANEL  
IMMEDIATE CONTAINER

DIRECTIONS FOR USE (CONTINUED)

**RATS AND MICE:** Replace contaminated or spoiled bait immediately. Collect and properly dispose of all dead rodents and leftover bait. To discourage reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

STORAGE AND DISPOSAL

---

**HOUSEHOLD USE:**

**PESTICIDE STORAGE:** Store only in original container in a cool, dry place inaccessible to children and pets.

**CONTAINER DISPOSAL:** If Empty: Do not reuse this container. Place in trash or offer for recycling if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place any unused product down any indoor or outdoor drain.

**NON-HOUSEHOLD USE:**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Keep product in tightly closed original container. Store in dry area not accessible to children or pets, domestic animals or wildlife. Do not store near material with a strong odor.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:** Dispose of empty container in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned stay out of smoke.
