Subject: Sanitizer Cleaner
EPA Registration No. 67517-53
Application Date: May 23, 2003
Receipt Date: June 6, 2003

Dear Mr. Dyer:

The following amendments, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, are acceptable:

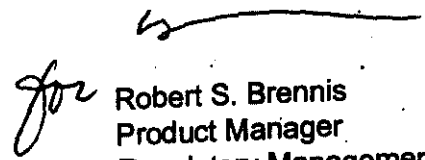

- Revision of First Aid Statement in accordance with PR Notice 2001-1

General Comments

A stamped copy of the accepted labeling is enclosed. Submit one (1) copy of your final printed label before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please contact me at 703-308-6264.

Sincerely,

Robert S. Brennis
Product Manager
Regulatory Management Branch II
Antimicrobials Division (7510C)

SIDE/BACK PANEL

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
DANGER**

Corrosive: Causes irreversible eye damage. Causes skin irritation. Harmful if swallowed, inhaled or absorbed through skin. Do not get in eyes, on skin or on clothing. Wear goggles, face shield or safety glasses. Wash thoroughly after handling. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS

This Pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or public waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD

STRONG OXIDIZING AGENT. Contact with water slowly liberates irritating and hazardous chlorine containing gases. Decomposes at 460°F to 480°F with liberation of harmful gases. Will burn with the evolution of chlorine and equally toxic gases.

Mix only with water. Use clean dry utensils. **DO NOT ADD THIS PRODUCT TO ANY DISPENSING DEVICE CONTAINING REMNANTS OF ANY OTHER PRODUCT.** Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic material, or other chemicals may start a chemical reaction with generation of heat, liberation or hazardous gases, and possible fire and explosion.

IN CASE OF FIRE: If possible, isolate container in open air or well ventilated area. Flood with large volume of water.

IN CASE OF CONTAMINATION OR DECOMPOSITION: DO NOT reseal container.

DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL BEFORE USE

This product is recommended for use on hard (non-porous) surfaces or on dishes, glasses, food processing equipment or utensils including dairy and brewery equipment or utensils that need a strong sanitizer treatment with little or no cleaning action. The material is very effective on table tops, tanks, vats, floors, walls, dishes, glasses, metallic processing plant and restaurants. It is particularly effective on surfaces which contact food.

SIDE /BACK PANEL

DIRECTIONS FOR USE (CONTINUED)

For sanitizing pipelines, tanks, and other equipment in food and beverage processing plants, food handling establishments, industrial and institutional establishments. First thoroughly clean all areas before sanitizing. Then dissolve **SANITIZER CLEANER** in water to obtain 100 ppm available chlorine solution by diluting 1/2 ounce per 7 gallons of water. Solutions having a minimum original strength of 100ppm shall be in contact with the equipment for at least 2 minutes. The solution during the sanitizing process should not be allowed to fall below 50 ppm chlorine. No rinse is required.

Clean object to be sanitized with a suitable hard surface cleaner and rinse with potable water to remove gross filth and heavy soil from surface. Dissolve 3/4 ounce of this product per 10 gallons of water to give a solution containing 100 ppm available chlorine. Apply the sanitizing solution to the surface to be sanitized and let stand 2 to 5 minutes. The surface is then ready for use.

The same solution may be used in the feed tanks of immersion or spray type machine providing 2 to 5 minutes contact time for sanitizing dishes, glasses, food processing equipment and utensils. Clean and rinse items prior to sanitizing. They are ready to use.

The sanitizing solution should be used promptly after mixing. If the solution is allowed to stand or is reused and tests show the level of chlorine has not been maintained, add more of this product to maintain a use solution of 100 ppm available chlorine.

STORAGE AND DISPOSAL

=====

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Keep product dry in tightly closed container when not in use. Store in a cool, dry well-ventilated area away from heat or open flame. In case of decomposition, isolate container if possible, and flood with large amounts of water to dissolve all material before discarding.

Pesticide Disposal: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional office for guidance.

Container Disposal: Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.
