Subject: Assault Mouse Killer Station  
EPA Registration No. 67517-77  
Revised Labeling submitted April 18, 1998

321/15

Dear Mr. Dyer,

Your submission of proposed revised labeling for EPA Reg. No. 67517-77, dated April 18, 1998, which included a revised label for the 1.5-oz. non-tamper-resistant bait station and a proposed new name for this product, has been reviewed. The proposed new product name, "Assault Mouse Killer Station," is acceptable. The revised label is acceptable provided that you modify the label as indicated below.

1. The expression "Safety Doors," which appears on the front panel, could be construed as a safety claim which would misbrand the product [see 40 CFR 156.10(a)(5)(ix and x)]. To remove this concern, either change "Safety Doors" to "Mouse Doors" or delete the entire front-panel reference to "Safety Doors." The reference to "Safety Doors" is made superfluous by the text of the third paragraph of the "APPLICATION DIRECTIONS:" subsection of the "DIRECTIONS FOR USE:".
2. When final labels are printed, retain the organizational format for the "DIRECTIONS FOR USE" that was used for the proposed label submitted April 18, 1998. As you claim there is no "outer package" and did not submit labeling for an "outer package" for this product, there may be no outer package (aside from a clear plastic wrap which does not obscure any label text) used when this product is displayed for retail sale..

In addition, from the proposed use directions for this product, it appears to us that the old "COUNT DOWN" bait station design still is to be used for this product. Please let us know immediately if this impression is not correct.

Recycled/Recyclable  
Printed on paper that contains  
at least 75% recycled fiber

2/6

Please submit one **copy** of your revised final printed labeling before you release the product for **shipment**. If the above specified conditions are not complied with, the **registration** will be subject to cancellation in accordance with FIFRA section 6(e). Your **release** for shipment of the product bearing the amended labeling constitutes **acceptance** of these conditions.

A stamped copy of the label is enclosed for your records. If you have any questions about this letter, please call me at (703) 305-5417 or (703) 305-5404.

Sincerely yours,

Peg Perreault

**SIDE/BACK PANEL**

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS  
CAUTION**

Keep away from humans, domestic animals and pets. May be harmful or fatal if swallowed. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling bait station.

**FIRST AID**

IF SWALLOWED: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of the throat with finger. If person is unconscious, do not give anything by mouth and do not induce vomiting.

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

IF ON SKIN: Wash with plenty of soap and water. Get medical attention if irritation persists.

**NOTE TO PHYSICIAN:**

This product is not an anticoagulant type of rodenticide. If ingested, limit absorption by either emesis or gastric lavage. Sublethal symptoms, if present, would be the result of cerebral edema and should be treated accordingly through administration of an osmotic diuretic and corticosteroid.

**ENVIRONMENTAL HAZARDS**

This product is toxic to mammals and birds. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark.

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions.

**IMPORTANT:** THIS IS NOT A TAMPER-RESISTANT BAIT STATION. DO NOT USE THIS PRODUCT IN AREAS ACCESSIBLE TO CHILDREN, PETS, DOMESTIC ANIMALS, AND NONTARGET WILDLIFE.

SIDE/BACK PANEL

DIRECTIONS FOR USE (CONTINUED)

**USE RESTRICTIONS:** For indoor use only. This product may be used to control house mice in homes, and industrial, commercial, and agricultural buildings. Do not use this product in sewers or any outdoor area. Do not place this ready-to-use bait station in any area where there is a possibility of contaminating food or surfaces that come into contact with food. Do not break station open and/or deliberately remove bait from it.

**SELECTION OF TREATMENT AREAS:** Determine indoor areas where rodents will most likely find and consume the bait. Generally, these are along walls, by gnawed openings, or beside burrows, in corners and concealed places, in walls, or floor voids, or in other locations where rodents or signs of rodents have been seen. Use only on dry surfaces. Remove as much alternative food as possible.

**APPLICATION DIRECTIONS:** ASSAULT MOUSE KILLER STATION does not contain an anticoagulant rodenticide. Generally, mice will consume a toxic dose in a single-night's feeding with death occurring two or more days later.

Place ASSAULT MOUSE KILLER STATION bait stations at 8- to 12-foot intervals in locations where this label permits this product to be used. Once stations are opened, mice may enter station and gnaw through thin plastic screening to obtain bait.

To make bait available to mice, insert a quarter into the slot in each white circular "doors" and turn counterclockwise for 1/4 turn, aligning the bumps on the doors with the arrows on the top of the station. Store the doors beside the mouse entrances by inserting the pegs on the backs of the doors through the small holes provided. Replace and "lock" doors in mouse entrances before moving or disposing of ASSAULT MOUSE KILLER STATION stations.

Highest bait consumption is expected to occur during the first day or two after treatment begins. After several days, inspect stations and replace those from which nearly all bait has been removed if there is continued evidence of mouse activity. Maintain baiting program for at least one week and continue until all signs of mouse activity have ceased or it becomes clear that the mice remaining are not attracted to the stations or the bait.

Collect and dispose properly of all dead mice and spilled bait. Dispose of used bait stations as indicated below in the "CONTAINER DISPOSAL" paragraph. To discourage reinfestation, limit sources of food, water, and harborage for mice. If reinfestation does occur, repeat treatment.

6/6

SIDE/BACK PANEL

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal.

**PESTICIDE STORAGE:** Store in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** To prevent accidental spillage of unconsumed bait, the safety "doors" in mouse entrances must be replaced and "locked" before moving or disposing of bait stations. Dispose of used stations in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

**NOTICE OF WARRANTY**

PM RESOURCES, INC. MAKES NO WARRANTY OF MERCHANTABILITY, FITNESS FOR ANY PARTICULAR PURPOSE, OR OTHERWISE, EXPRESSED OR IMPLIED CONCERNING THIS PRODUCT OR ITS USES WHICH EXTEND BEYOND THE USE OF THE PRODUCT UNDER NORMAL CONDITIONS IN ACCORD WITH THE STATEMENTS MADE ON THIS LABEL.
