 Covington, GA 30209-1508

### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

#### Storage and Disposal

**Storage:** Store in a cool, dry (preferably locked) place inaccessible to children and pets. Do not use or store near heat or open flame. **Disposal:** Do not reuse empty container; wrap and put in trash.

**USE ONLY IN WELL VENTILATED AREA  
HOLD BOTTLE IN UPRIGHT POSITION WHEN SPRAYING**

#### READ ENTIRE LABEL BEFORE EACH USE

#### USE ONLY ON DOGS OR CATS

#### CATS AND DOGS

Cover animal's eyes with hands and with a firm stroke to get a proper spray mist, spray head, ears and chest until damp. With fingertips, rub into face around mouth, nose and eyes. Then spray neck, middle and hind quarters, finishing legs last. For best penetration of spray to the skin, direct spray against the natural lay of the hair. On long haired dogs, rub your hand against the lay of the hair, spraying the ruffled hair directly behind the hand. Make sure spray thoroughly wets ticks. Do not reapply product for 2-3 days. Do not use on puppies or kittens under 12 weeks. Consult a veterinarian before using this product on debilitated, medicated, aged, pregnant or nursing animals.

#### DIRECTIONS FOR LIQUID DISPENSING COMB

#### Kills Fleas, Ticks and Lice on Contact

The teeth of the comb are made of a porous nylon fiber much like a felt-tip pen. By simply combing your pet, the special flea and tick killing liquid saturates the comb's sturdy teeth and coats the animal's skin, fur and hair, killing fleas and ticks on contact. The special liquid also contains agents to help keep your pet's coat smooth and shiny, so your pet benefits from a healthy grooming, too. Comb is safe and gentle enough to be used daily.

Remove plug. Holding comb level, slowly add liquid through filling hole until wick is visibly damp. Do not overfill. Replace plug and allow a few minutes for teeth to become moistened. Thoroughly comb pet with a slow grooming motion. Be sure that both tips and sides of the teeth contact the skin, inner fur and hair. For pets with thick fur, groom by pushing back fur and combing around the roots. After use, wipe teeth gently with a dry paper towel or tissue. Store in a sealed plastic bag. Do not use on puppies or kittens under 12 weeks. Consult a veterinarian before using this product on debilitated, medicated, aged, pregnant or nursing animals.

#### PET'S SLEEPING QUARTERS

Spray around baseboards, windows, door frames, wall cracks and local area of floors. If mosquitoes, gnats or flies are present, lightly spray into the air. Repeat as needed. The pet's bedding should be sprayed, making sure the area beneath the bedding is sprayed. After spray has dried, remove old bedding and replace with fresh bedding. Treat pets with a flea and tick control product registered for use on pets before allowing them to enter treated area.

#### HORSES/FOALS

Use full strength to control stable flies, horse flies, deer flies, face flies, gnats and mosquitoes. Apply to face, legs, flanks, top line and other body areas commonly attacked by these flies. Do not wet horse's skin with excessive spray. After application, thoroughly brush to bring out bright sheen on the coat. Repeat treatment as needed. If treatment of foals under six weeks old is necessary spray fingertips and rub onto coat. Not for use on horses/foals intended for human consumption.

#### PRECAUTIONARY STATEMENTS

#### Hazards to Humans & Domestic Animals

**WARNING: Humans:** Causes eye irritation. Do not get in eyes or on clothing. Harmful if swallowed or inhaled. Avoid breathing mist. Avoid contamination of food. Thoroughly wash with soap and water after use. **Animals:** Sensitivities may occur after using ANY pesticide product for pets. If signs of sensitivity occur, bathe your pet with mild soap and rinse with large amounts of water. If signs continue, immediately consult a veterinarian

**First Aid**
