Environmental Hazards

This product is highly toxic to aquatic and estuarine invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes. **Bee Caution:** This pesticide is highly toxic to bees exposed to direct treatment or to residues remaining on the treated area. Do not apply when bees are actively visiting the crop, cover crop or weeds blooming in the treated area. Applications should be timed to provide the maximum possible interval between treatment and the next period of bee activity.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This bait may be used to protect flowers, ornamentals, shrubs, deciduous fruits and the vegetables named below. Apply on the ground and adjacent to plants. Do not apply to edible parts of the plants. Broadcast applications may be used when there is a heavy infestation. Repeat applications as necessary.

Special Instructions for Improved Performance are:

1. Slugs and snails favor dark, damp places. Bait where these pests stay during daylight hours.
2. Be sure area to be baited is damp. In dry weather, water area well before baiting.
3. Apply bait in evening as these pests feed mainly at night.
4. In ornamental and border areas, until infestation is under control, bait should be renewed at least every 7 to 10 days or more frequently if necessary.
5. Since snails and slugs migrate extensively, when invasions from adjacent areas are anticipated a barrier of the bait will aid in control.

Buyer assumes all risks of use, storage or handling of this product not in strict accordance with this label.
