Subject: CPPC Tsunami
EPA Registration No. 67619-12
Application Date: April 7, 2009
Receipt Date: April 8, 2009

Dear Ms. Lawson:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the comments listed below:

Proposed Amendment:

- Revise Storage and Disposal Statement per PR-Notice 2007-4
- Correct names of organisms "*Escherichia coli*" and "*Salmonella enterica*"
- Add optional marketing claims
- Revise "air vents" to read "air vent exteriors"
- Add net contents
- Add text to clarify efficacy against Avian Influenza A virus

Comments:

1. The Agency defines "refillable" as follows: "Refillable container" means a container that is intended to be filled with pesticide more than once for sale or distribution. The registrant determines whether a container is intended to be refilled for sale or distribution (in which case it is a refillable container) or if it is not intended to be refilled for sale or distribution (in which case it is not a refillable container) and implements its decision by labeling the container appropriately. Therefore, each proposed Storage and Disposal statement must include the following statement: "Nonrefillable container. Do not reuse or refill empty container."
2. You must remove all instances of the word "please" from the proposed Storage and Disposal statements.

3. You must revise the statement "Kills Avian Influenza A virus on precleaned environmental surfaces" to read "Kills Avian Influenza A virus on precleaned hard, non-porous surfaces."
4. The proposed term "compatible with" is too vague. This term must be removed from the label wherever it appears. The proposed term "suitable for use" is acceptable, and may be substituted.

General Comments:

A stamped copy of the labeling accepted with comments is enclosed. Submit one (1) copy of your final printed label before distributing or selling the product bearing the revised labeling.

Should you have any questions concerning this letter, please contact Wanda Henson at (703) 308-6345.

Sincerely,

for Wanda G. H.

Use Sites: See Tables 1-5.

The following is only for products with medical devices listed on the label:

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Special Instructions for Use Against HIV-1, HBV and HCV

This product kills HIV-1, HBV and HCV on precleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS), Human Hepatitis B Virus (HBV) and Human Hepatitis C Virus (HCV).

Special instructions for using this product to clean and decontaminate against HIV-1, HBV and HCV on surfaces/objects soiled with blood/body fluids:

Personal Protection: When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks and eye coverings.

Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product.

Contact Time: Allow surfaces to remain wet for 30 seconds, [rinse and] let air dry. For all other organisms, see directions for contact times.

Disposal of Infectious Materials: Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.
