(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Clorox Professional Products Company  
c/o PS&RC  
P.O. Box 493  
Pleasanton, CA. 94566-0803

**Note:** Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Antimicrobials Division prior to the use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act. Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec. 3(c)(7)(A) provided that you:

1. Submit and/or cite all data required for registration/reregistration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data.
2. Submit two copies of the revised final printed label for the record changing the EPA File Symbol 67619-RG to EPA Registration Number 67619-13.
3. Make the following label changes:

Change the Precautionary Statements to read: "Causes substantial, but temporary, eye injury. Do not get in eyes or on clothing. Avoid contact with clothing. Wear protective eyewear. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse."

- Add the First Aid Statement "Call a Poison Control Center or doctor for treatment advice" for the "If in eyes" section.
- Add the First Aid Statement "Call a Poison Control Center or doctor for treatment advice" for the "If on skin" section.

- Page 2 of your label:

- a. Under the heading "DISINFECTION", change "No rinsing required." to "Rinse with potable water for food-contact surfaces. For all others, no rinsing is required."
- b. Label must change contact times for bacteria and mycobacterium from 30 seconds to 1 minute. Delete the TB and Bacteria references in the banner that pertain to 30 seconds. Only HIV type is permitted.
- c. Under the heading "ORGANISMS", add the word "Human" before Hepatitis A, B, and C listings to clarify any discrepancy with animal strains.

- a. You must review and comply with DIS/TSS-18, Label Requirements for Farm Use Disinfectants and DIS/TSS-19, Label Requirements for Poultry House Disinfectants since farms and poultry facilities are mentioned on label use sites. Specifically, the removal of animals, litter, feed and water from premises before use; as well as a pre-cleaning step with soap and water, followed by ventilation and a potable water rinse before reuse of facilities is required.

- Page 8 of your label

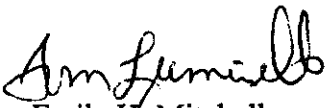

- a. In Table 4 Food Service, middle column; change "any washable (food and non-food contact) surface where disinfection is needed" to "any washable (food and non-food contact) hard, non-porous inanimate surface where disinfection is needed excluding glassware, utensils, or dishes."

Copies of the reviews of your data submissions are enclosed.

Submit two copies of the revised final printed label for the record.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

*The following is only for products with medical devices listed on the label:*

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced either into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

### **Specific Instructions for Use Against HIV-1**

This product kills HIV-1 on precleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS).

**Special instructions for using this product to clean and decontaminate against HIV-1 on surfaces/objects soiled with blood/body fluids:**

**Personal Protection:** When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks and eye coverings.

**Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product. Allow surfaces to remain wet for 30 seconds. Wipe excess. Allow to air dry.

**Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

**To clean -and/or- remove stains:** [Set trigger to SPRAY or FOAM.] Spray, wait a few minutes, and allow to air dry. [If streaking is observed, wipe with a clean, damp [cloth or] paper towel.] [If excess foam dries on nozzle, rinse with warm water.]

**To remove mildew stains:** Turn nozzle to FOAM position. Spray 6-8 inches from surface until surface is thoroughly covered. Allow foam to deeply penetrate mildew and problem areas. Wipe with a wet sponge or cloth, and rinse. Heavy mildew buildup may require longer contact time, or two cleanings. [If excess foam dries on nozzle, rinse with warm water.] [This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking.]

**To kill mold and mildew on hard, porous surfaces** [such as grout and cement]: Spray surface until thoroughly wet, let stand 10 minutes, and rinse. [Repeat application[, if necessary].] [If excess foam dries on nozzle, rinse with warm water.] [This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking.]

**To clean soap scum:** Spray, wait a few minutes, wipe with sponge. Heavy soap scum or mildew buildup may need two cleanings. This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking. [If excess foam dries on nozzle, rinse with warm water.]

**To clean and disinfect toilet bowls:** Flush toilet and add 1 cup this product to bowl. Brush to thoroughly wet all surfaces including under rim. Let stand 5 minutes before flushing.

**Floors:** Mop washable floors including no-wax floors, linoleum, vinyl and ceramic tile with 1 cup this product per gallon of warm water. Rinse for best shine.

Works on grout, [bath]tubs, toilets, fiberglass, shower doors, vinyl curtains, counters -or- countertops, sinks, glass, plastic, glazed ceramic tile, unglazed ceramic tile, no-wax floors, basement floors, windowsills, refrigerator seals, and under the sink. Rinse immediately after use on rubber, plastic and vinyl. [Avoid prolonged contact with metal and old porcelain as this product can react with these materials and leave a "rusty" stain.] Do not use on wood or painted surfaces unless you plan to refinish or repaint them. [This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking.] Avoid contact with aluminum, clothes, fabric, carpet or paper surfaces as they will discolor.
