# CPPC STORM

**The following is only for products with medical devices listed on the label:**

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**Special Instructions for Use Against HIV-1, HBV, and HCV**

This product kills HIV-1, HBV and HCV on precleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS), Human Hepatitis B [(Virus)] (HBV) and Human Hepatitis C [(Virus)] (HCV).

**Special instructions for using this product to clean and decontaminate against HIV-1, HBV and HCV on surfaces/objects soiled with blood/body fluids:**

**Personal Protection:** When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks and eye coverings.

**Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product.

**Contact Time:** Allow surfaces to remain wet for 30 seconds. Wipe excess. [Rinse.] Allow to air dry. For all other organisms, see directions for contact times.

**Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids should be autoclaved and disposed of according to local regulations for infectious waste disposal.

**To clean -and/or- remove stains:** [Set trigger to SPRAY or FOAM.] Spray, wait a few minutes, [rinse] and allow to air dry.

[If streaking is observed, wipe with a clean, damp [cloth or] paper towel.] [If excess foam dries on nozzle, rinse with warm water.]

**To remove mildew stains:** Turn nozzle to FOAM position. Spray 6-8 inches from surface until surface is thoroughly covered. Allow foam to deeply penetrate mildew and problem areas. Wipe with a wet sponge or cloth, and rinse. Heavy mildew buildup may require a longer contact time, or two cleanings. [If excess foam dries on nozzle, rinse with warm water.] [This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking.]

**To clean soap scum:** Spray, wait a few minutes, wipe with sponge. Heavy soap scum or mildew buildup may need two cleanings. This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking. [If excess foam dries on nozzle, rinse with warm water.]

**To clean and disinfect toilet bowls:** Flush toilet and add 1 cup of this product to bowl. Brush to thoroughly wet all surfaces including under rim. Let stand 5 minutes before flushing.

**Floors:** Mop washable floors including no-wax floors, linoleum, vinyl and ceramic tile with 1 cup of this product per gallon of warm water. Rinse for best shine.

Works on grout, [bath]tubs, toilets, fiberglass, shower doors, vinyl curtains, counters -or- countertops, sinks, glass, plastic, glazed ceramic tile, unglazed ceramic tile, no-wax floors, basement floors, windowsills, refrigerator seals, and under the sink. Rinse immediately after use on rubber, plastic and vinyl. [Avoid prolonged contact with metal and old porcelain as this product can react with these materials and leave a "rusty" stain.] Do not use on wood or painted surfaces unless you plan to refinish or repaint them. [This product may not be able to remove soap scum and mildew embedded in hard water deposits, old grout or silicone caulking.] Avoid contact with aluminum, clothes, fabric, carpet or paper surfaces as they will discolor.

**FARM PREMISE AND POULTRY HOUSE DISINFECTANT [INSTRUCTIONS]:**

**[Directions For Use:]**

1. Do not use in milking stalls, milking parlors, or milk houses (for phenolics, cresylic acid, and pine oils).
2. Remove all poultry or animals and feeds from premises, trucks, vehicles, coops, crates, and enclosures.
3. Remove all litter and manure or droppings from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities and fixtures occupied or traversed by animals or poultry.
4. Empty all troughs, racks, and other feeding and watering appliances.
5. Thoroughly clean all surfaces with soap or detergent and rinse with water.
6. Saturate all surfaces with the recommended disinfecting solution for a period of 10 minutes.
7. Immerse all halters, ropes, and other types of equipment used in handling and restraining animals, as well as forks, shovels, and scrapers used for removing litter and manure.
8. Ventilate buildings, cars, boats, coops, and other closed spaces. Do not house livestock or poultry or employ equipment until treatment has been absorbed, set, or dried.
9. Thoroughly scrub all treated feed racks, mangers, troughs, automatic feeders, fountains, and waterers with soap or detergent, and rinse with potable water before reuse.
