**Conditional****NOTICE OF PESTICIDE:**

  x   Registration  
       Reregistration

Name of Pesticide Product:

Blondie

(under FIFRA, as amended)

Name and Address of Registrant (include ZIP Code):

Clorox Professional Products Company

c/o PS&amp;RC; P.O. Box 493

Pleasanton, CA 94566-0803

Note: Changes in labeling differing in substance from that accepted in connection with this registration must be submitted to and accepted by the Registration Division prior to use of the label in commerce. In any correspondence on this product always refer to the above EPA registration number.

On the basis of information furnished by the registrant, the above named pesticide is hereby registered/reregistered under the Federal Insecticide, Fungicide and Rodenticide Act.

Registration is in no way to be construed as an endorsement or recommendation of this product by the Agency. In order to protect health and the environment, the Administrator, on his motion, may at any time suspend or cancel the registration of a pesticide in accordance with the Act. The acceptance of any name in connection with the registration of a product under this Act is not to be construed as giving the registrant a right to exclusive use of the name or to its use if it has been covered by others.

This product is conditionally registered in accordance with FIFRA sec 3(c)(7)(a) provided that you:

1. Submit and/or cite all data required for registration of your product under FIFRA sec. 3(c)(5) when the Agency requires all registrants of similar products to submit such data; and submit acceptable responses required for re-registration of your product under FIFRA section 4.
2. Make the labeling changes listed below before you release the product for shipment:
  - a. Revise the "EPA Registration Number to read, "EPA Reg. No. 67619-24".

- b. To satisfy OPPTS 830.6317 (Storage Stability) and OPPTS 830.6320 (Corrosion Characteristics) requirements, results for a minimum of 1 year from a GLP-compliant storage stability and corrosion characteristics study must be provided as a condition of registration within a year of registration or as soon as the study is completed. As noted in the Product Chemistry review dated March 23, 2011, these studies are reported as being in process and must be reported to the Agency upon completion.
- c. The word "safe" must be removed from the label in the following contexts:
  - a. Based upon statutory interpretation, regulations, and guidance per FIFRA section 2(q)(1), 3(c)(9), and 12(a)(1)(E); 40 CFR 156.10(a)(5)(ix); PRN 2001-3, 92-2, and 98-10; and the Label Review Manual, OPP cannot allow registrants to place the word "safe" on pesticide labels. The statement, "Safe for use on hospital surfaces" must therefore be removed from page four of the label.
  - b. The phrase, "Designed to be equipment safe" must be removed from page three of the label. Pesticide registrants wishing to provide clear information about a product's applicable use sites without confusing the consumer about product safety may use terms "Compatible with..." or "Suitable for use on..." on non-food contact surfaces.
  - c. The term "color safe" on page three of the label is acceptable.
- d. The term "gentle" and "mild" cannot be used to describe a pesticide product or pesticidal claim with the rationale being that the term makes implied safety claims for the product. Thus the phrases, "Gentle enough to use everyday", "Gentle for use", "Gentle on hospital equipment", and "Gentle on surfaces" must be removed from page three, and "gentle for daily cleaning" from page four. "Gentle enough for everyday use" must also be removed from page eight.
- e. Should you wish to retain a reference to the company's website on your label, then please be aware that such a reference transforms the website into labeling under the Federal Insecticide Fungicide and Rodenticide Act sec 2 (p) (2) and then the website is subject to review by the Agency. If the website content is false or misleading, the product would be misbranded and its sale or distribution unlawful to sell or distribute under FIFRA section 12(a)(1)(E). In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process. Although EPA has not yet determined the extent to which it will routinely review company websites, if the Agency finds or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from claims approved through the registration process, the website may be referred to the EPA's Office of Enforcement and Compliance Assurance.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product constitutes acceptance of these conditions.

#### DIRECTIONS FOR USE Continued

**For labels that list medical premises and metal and/or stainless steel surfaces, one of the following statements must be used:**

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**For products with medical devices listed on the label, the following must be used:**

This product is not for use on critical or semi-critical medical device surfaces.

#### **Special Instructions for Use Against HIV-1, HBV, and HCV**

This product kills HIV-1, HBV and HCV on precleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings [(hospitals, nursing homes)] or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS), Human Hepatitis B [(Virus)] (HBV) and Human Hepatitis C [(Virus)] (HCV).

**Special instructions for using this product to clean and decontaminate against HIV-1, HBV and HCV on surfaces/objects soiled with blood/body fluids: Personal Protection:** When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks and eye coverings. **Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product. **Contact Time:** Allow surface to remain wet for HBV, HCV and HIV-1 for 30 seconds. The contact times for other bacteria, viruses, and fungi may differ. See product label for contact times. **Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

**To Preclean Instruments Prior to Terminal Sterilization/High Level Disinfection:** As a precleaning spray - Place instruments into a suitable container. Spray **this product** onto instruments to thoroughly wet all surfaces. Let stand for up to 10 minutes. Rinse instruments. As a precleaning immersion solution - Fill appropriate size container with a sufficient amount of **this product** to completely submerge instruments. Place instruments into the container of **this product**, cover, and allow to soak for up to 10 minutes. Remove and rinse, and follow with an appropriate cleaning and disinfecting process. Change solution daily. As a manual instrument cleaner - Thoroughly pre-rinse dirty instruments under running water to remove visible, gross debris. Immerse pre-rinsed instruments into an appropriate size container filled with **this product**. Scrub instruments using a stiff bristle brush until visibly clean. Submerge instruments while scrubbing. Rinse instruments thoroughly. Change solution daily. Follow with an appropriate disinfection process. Cleaning of critical and semi-critical devices must be followed by an appropriate terminal sterilization/high-level disinfection process.

Using AOAC approved test methods (under Good Laboratory Practices, [GLPs]), in the presence of 5% blood serum, this product [-or- **product name**] kills the following organisms on hard, nonporous inanimate surfaces:

**ORGANISMS:**

<b>Bacteria:</b>	
<b>30 second contact time</b>	
Acinetobacter baumannii [A. baumannii]	[ATCC 19606]
Campylobacter jejuni [C. jejuni]	[ATCC 29428]
Carbapenem Resistant Klebsiella pneumoniae [CRKP]	[ATCC BAA-1705]
Enterobacter aerogenes [E. aerogenes]	[ATCC 13048]
Escherichia coli [E. coli]	[ATCC 11229]
Escherichia coli O157:H7 [E. coli]	[ATCC 35150]
Extended Spectrum Beta Lactamase producing Escherichia coli [(ESBL producing E.coli)]	[ATCC BAA-196]
Extended Spectrum Beta Lactamase producing Klebsiella pneumoniae [(ESBL producing Klebsiella pneumoniae)]	[ATCC 700603]
[‡]Multidrug Resistant Klebsiella pneumoniae [MDR K. pneumoniae]	[ATCC 51503]
Pseudomonas aeruginosa [P. aeruginosa]	[ATCC 15442]
Salmonella enterica [S. enterica]	[ATCC 10708]
Stenotrophomonas maltophilia [S. maltophilia]	[ATCC 25596]
Penicillin-Resistant Streptococcus pneumoniae [PRSP]	[ATCC 700677]
Streptococcus pyogenes [S. pyogenes]	[ATCC 19615]
Vancomycin Resistant Enterococcus faecalis [VRE]	[ATCC 51575]
<b>1 minute contact time</b>	
Community Acquired Methicillin Resistant Staphylococcus aureus [CA-MRSA]	[NARSA NRS384 (genotype USA300)]
Methicillin Resistant Staphylococcus aureus [MRSA]	[ATCC 33592]
Methicillin Resistant Staphylococcus aureus [MRSA]	[ATCC 33591]
Staphylococcus aureus [S. aureus]	[ATCC 6538]

### Pandemic 2009 H1N1 Influenza A virus\*\*\*

#### Claims:

- Respiratory illnesses attributable to Pandemic 2009 H1N1 are caused by influenza A virus. This product (**Product Name**) is a broad-spectrum hard surface disinfectant that has been shown to be effective against influenza A virus and is expected to inactivate all influenza A viruses including Pandemic 2009 H1N1 (formerly called swine flu).
- This product has demonstrated effectiveness against influenza A virus and is expected to inactivate all influenza A viruses including Pandemic 2009 H1N1 influenza A virus.
- This product has demonstrated effectiveness against influenza A virus and is expected to inactivate all influenza A viruses including Pandemic 2009 H1N1 (formerly called swine flu).
- Kills Pandemic 2009 H1N1 influenza A virus (formerly called swine flu).
- Kills Pandemic 2009 H1N1 influenza A virus.

\*\*\* per Agency guidance dated October 22, 2009 "Guidance for Testing and Labeling Claims against Pandemic 2009 H1N1 Influenza A Virus (formerly called Swine Flu)" [www.epa.gov/oppad001/h1n1-guide.html](http://www.epa.gov/oppad001/h1n1-guide.html)

- Kills [2009] H1N1 [Flu Virus]
- Kills Germs -and/or- Flu Viruses [including [2009] H1N1]
- Kills [99.9% of] Germs including [2009] H1N1 [Flu Virus]
- Effective against [2009] H1N1 [Flu Virus]

#### Use Sites:

This product [-or- **product name**] is designed specifically as a general [ready-to-use] [non-abrasive] cleaner and disinfectant for use in:

Animal Life Science Laboratories	Locker Rooms	Public Restrooms
Athlete/Recreational Facilities	Lodging Establishments	Retail Businesses
Food Processing Plants	Manufacturing Facilities	Schools
Food Service Establishments [Restaurants]	Nursing Homes	Shower Rooms
[Commercial Kitchens]	Office Buildings	Transportation Terminals
Homes	Operating Rooms	Veterinary Clinics
Hospitals	Patient Rooms	
ICU Areas	Pet Shops	

where housekeeping is of prime importance in controlling the hazard of cross contamination.

#### [Environmental] Surface[s] [Materials]:

This product [-or- **product name**] is formulated to disinfect hard, nonporous, inanimate environmental surfaces:

baked enamel surfaces	glazed ceramic tile	shower stalls
bathrooms	glazed porcelain	stainless steel surfaces
bathtubs	laminated surfaces	vinyl
cabinets	metal surfaces	walls
chrome	plastic and painted surfaces	
floors	plastic surfaces	

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act  
amended, for the pesticide,  
registered under EPA Reg. No.

67619-24

For unfamiliar surfaces, test in a small, inconspicuous area first. [For use in the kitchen on counters, sinks, exterior surfaces of appliances, and stovetops. A rinse with potable water is required for surfaces in direct contact with food.] [[In addition], this product [-or- **product name**] deodorizes those areas that generally are hard to keep fresh smelling, such as garbage storage areas, empty garbage bins and cans, basements, restrooms and other areas which are prone to odors caused by microorganisms.]
