Subject: PRIA Label Amendment – To add one organism to the label and revise the skin irritation toxicity category from III to IV  
Product Name: Elf  
EPA Registration Number: 67619-37  
Start Date: December 29, 2020  
Action Case Number: 00216934

Dear Mr. Herber:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

A stamped copy of your labeling is enclosed for your records. This labeling supersedes all previously accepted labeling. Pursuant to 40 CFR 156.10(a)(6), you must submit one copy of the final printed labeling before you release the product for shipment with the new labeling. In accordance with 40 CFR 152.130(c), you may distribute or sell this product under the previously approved labeling for 18 months from the date of this letter. After 18 months, you may only distribute or sell this product if it bears this new revised labeling or subsequently approved labeling. "To distribute or sell" is defined under FIFRA section 2(gg) and its implementing regulation at 40 CFR 152.3.

Should you wish to add/retain a reference to the company's website on your label, then please be aware that the website becomes labeling under FIFRA and is subject to review by the Agency. See FIFRA section 2(p)(2). If the website is false or misleading, the product would be misbranded and unlawful to sell or distribute under FIFRA section 12(a)(1)(E). 40 CFR 156.10(a)(5) lists examples of statements EPA may consider false or misleading. In addition, regardless of whether a website is referenced on your product's label, claims made on the website may not substantially differ from those claims approved through the registration process, FIFRA section 12(a)(1)(B). Therefore, should the Agency find or if it is brought to our attention that a website contains false or misleading statements or claims substantially differing from the EPA approved registration, the website will be referred to the EPA's Office of Enforcement and Assurance.

Action Case No./Decision No. 00216934

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Karen M. Leavy by phone at (703)-308-6237, or via email at [Leavy.Karen@epa.gov](mailto:Leavy.Karen@epa.gov).

**KILLS HIV, HBV and HCV ON PRE-CLEANED HARD NONPOROUS SURFACES/OBJECTS PREVIOUSLY SOILED WITH BLOOD/BODY FLUIDS** in healthcare settings or other settings in which there is an expected likelihood of soiling of hard, nonporous surfaces/objects with blood/body fluids, and in which the surfaces/objects likely to be soiled with blood/body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 [(HIV-1) (associated with AIDS)], Hepatitis B Virus (HBV), and Hepatitis C Virus (HCV).

#### **Special Instructions for Cleaning and Decontamination Against Bloodborne Pathogens -or- HIV-1 (AIDS Virus), HBV and HCV on Surfaces/Objects Soiled with Blood/Body Fluids.**

**Personal Protection:** When handling items soiled with blood or body fluids, use disposable gloves, gowns, masks, and eye coverings.

**Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before applying this product.

**Contact Time:** Allow treated surfaces to remain visibly wet for 30 sec[onds]. For [all] other organisms, see directions for contact times.

**Disposal of Infectious Materials:** Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal.

#### ***This statement to be used on institutional labels with medical and dental use sites, medical devices and/or bloodborne pathogens:***

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semicritical medical devices prior to sterilization or high level disinfection.

**ULTRASOUND TRANSDUCERS:** For use on external surfaces of Ultrasound Transducers only To disinfect: Pre-clean ultrasound gel from external transducer to be disinfected by using a clean wash cloth. Then thoroughly wet the probe with a towelette. Treated surface must remain visibly wet for a full two (2) minutes. Use additional wipes if needed to assure continuous 2 minute wet contact time. Let air dry.

#### **POULTRY HOUSES, BROODERS AND HATCHERIES TO DISINFECT [AND DEODORIZE] HARD, NONPOROUS SURFACES: [AGAINST AVIAN INFLUENZA A VIRUS:**

**Poultry House:** Remove all animals and feeds from premises and enclosures such as coops or cages. Remove all litter, droppings, and manure from walls, tables, surfaces of coops, cages, and other facilities and fixtures occupied or traversed by animals. Empty all troughs, racks, and other feeding and watering applications. Thoroughly clean all surfaces with soap or detergent and rinse with water. Thoroughly wet surfaces by using enough wipes on treated surface to remain wet for 2 min[utes]. After application, ventilate coops and other closed spaces. Do not house animals or employ equipment until treatment has been absorbed, set, or dried. Thoroughly scrub all treated feed racks, mangers, automatic feeders, fountains and waterers with soap or detergent and rinse with potable water before reuse. **Hatcheries:** Remove all animals and feeds from the premises and enclosures. Pre-clean all surfaces such as hachers, setters, trays, racks, carts, sexing tables, and other hard surfaces with soap and detergent and rinse with water. Then, thoroughly wet surfaces by using enough wipes on treated surfaces to remain visibly wet for 2 min[utes]. After application, ventilate coops and other closed spaces. ### Emerging Viral Pathogen Claims

**Product Name** -or- this product qualifies for emerging pathogen claims per the EPA’s “Guidance to Registrants: Process for Making Claims Against Emerging Viral Pathogens not on EPA-Registered Disinfectant Labels” when used in accordance with the appropriate use directions indicated below.

This product meets the criteria to make claims against certain emerging viral pathogens from the following viral categories:

- Enveloped viruses
- Large non-enveloped viruses

<i>For an emerging viral pathogen that is a/an..</i>	<i>..follow the directions for use for the following organisms on the label.</i>
Enveloped virus	Norovirus <sup>◇</sup>
Large, non-enveloped virus	Norovirus <sup>◇</sup>

**Product name** -or- this product has demonstrated effectiveness against viruses similar to **insert name of emerging virus** on hard, nonporous surfaces. Therefore, **Product name** -or- this product can be used against **insert name of emerging virus** when used in accordance with the directions for use against Norovirus on hard, nonporous surfaces. Refer to the CDC -or- OIE website at **insert pathogen-specific website address** for additional information.

**Insert name of illness/outbreak** is caused by **insert name of emerging virus**. **Product name** -or- this product kills similar viruses and therefore can be used against insert name of emerging virus when used in accordance with the directions for use against Norovirus on hard, nonporous surfaces. Refer to the CDC -or- OIE website at **insert pathogen-specific website address** for additional information.

### Deodorizing

- Deodorizer
