MERGAL® S 89R Paste is an antimicrobial preservative for control of fungi and algae growing on paints, coatings, plasters, sealants, and fillers used for architectural products, finishes, and special purpose coatings which are exposed to warm, moist, and humid conditions favoring microbial growth.

Typically MERGAL® S 89R Paste should be added at the beginning of the formulation process while mixing of the final product (paint, plaster, etc.) to assure uniform distribution of the MERGAL® S 89R Paste.
