JUL 28 2005

Subject: Spin Out Spray  
EPA Reg. No. 67690-28  
Your amendment dated April 5, 2005

Dear Ms Daniels:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act as amended is acceptable provided the following change is made:

1. The "Limitation of Remedies" statement must make it clear that the disclaimer statements are the registrant's and do not come from EPA. This can be done by using statements such as "To the fullest extent permitted by law, the manufacturer shall not be liable..." or "It is the manufacturer's intention that..."

One copy of the label stamped "Accepted with comments" is enclosed for your records. This label supercedes all labels previously accepted for this product. Please submit one copy of the final printed label that incorporates the required changes before the product is released for shipment.

Please note that all copper products are going through re-registration over the next year or so. Changes in labeling in addition to those listed herein may be required.

If you have any questions, please contact Robert Westin by phone at (703) 305-5721 or via email at [westin.robert@epa.gov](mailto:westin.robert@epa.gov).

Sincerely,

A handwritten signature in black ink that reads "Tony Kish".

<p><b>Note to Physician:</b> Solvent presents aspiration hazard.</p>	

See Label for Additional Precautions and Directions for Use.

**Precautionary Statements**

**Hazards to Humans and Domestic Animals**

**CAUTION**

Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing vapor or spray mist. Wash thoroughly with soap and water after handling.

**NOTE:** Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. **INTENTIONAL MISUSE BY DELIBERATELY CONCENTRATING AND INHALING THE CONTENTS MAY BE HARMFUL OR FATAL.**

**Environmental Hazards**

This pesticide is toxic to fish and aquatic organisms. Do not apply directly to water.

**Physical or Chemical Hazards**

**Extremely Flammable.** Contents under pressure. Keep away from fire, sparks, and heated surfaces. Do not puncture or incinerate container. Exposure to temperatures above 130° F may cause bursting.

**Directions for Use**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Use only with adequate ventilation.

**Storage and Disposal**

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in a cool, dry place.

**Pesticide Disposal:** Do not puncture or incinerate!

**If Empty:** Place in trash or offer for recycling if available.

**If Partly Filled:** Call your local solid waste agency or 1-800-CLEANUP for disposal instructions.

**General Information**

- ◆ Spin Out Spray is a root growth regulator that acts as a root pruning agent to control root spiraling and promote the development of a fibrous root system. Spin Out Spray treated plastic, clay, wood, concrete or cellulose plant containers can be used to control root growth on container-grown trees, shrubs, bedding plants and houseplants at any stage of plant development from seedlings to large container-grown trees.
  
- ◆ Spin Out Spray can also be sprayed over wounds and cuts in tree bark to seal the wound and help prevent bacterial and fungus infections of the tree. Spray an even coat of Spin Out Spray over tree wounds or cuts. One coat of Spin Out Spray should protect wounds or cuts for up to one year or until average size wounds have healed.

**Application Directions**

**Plant Containers and Tree Wound Dressing**

Plant containers/tree wound areas should be clean and dry before applying Spin Out Spray. Used containers should be free of any loose soil. Do not apply Spin Out Spray

directly on plants or soil except as a tree wound dressing. Do not apply Spin Out Spray when the temperature is below 50° F. Apply in a well-ventilated area.

1. Protect surrounding areas with drop cloth or newspapers.
2. For best results, can temperature should be between 70° and 90° F.
3. Shake can vigorously for at least one minute after mixing ball rattles.
4. Aim opening of spray button toward the surface and away from you. Fingertip should not extend over the front of the spray button.
5. While holding can about 6 to 8 inches from surface, press spray button firmly and move back and forth in a steady even motion. Don't try to achieve full loading in one coat. Apply several thin coats for a better finish and longer root control/bacterial and fungus infection protection.
6. For extended root control/bacterial and fungus infection protection, apply additional thin coats.
7. If clogging develops, carefully remove spray button from the can with a twisting motion and clean the opening. DO NOT STICK PINS OR OTHER OBJECTS INTO CAN. While holding the can and spray button opening away from you, gently replace spray button with a twisting motion.
8. Clean spray button immediately after use by turning can upside down and pressing spray button until no more product comes out.
9. Allow Spin Out Spray to dry thoroughly before filling plant container with soil.

### **Special Precautions**

NOTE: Some containers, particularly bedding plant containers, may be treated with a slipping agent for easy unstacking. Slipping agents usually appear waxy and can prevent the adhesion of Spin Out Spray. We do not recommend the application of Spin Out Spray under these conditions.

**Note:** This product may be reactive on metal surfaces such as galvanized roofing. Avoid contact with metal surfaces.

---

### **Warranty Disclaimer**

SePRO Corporation warrants that the product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. SEPRO CORPORATION MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.
