Great Falls, VA 22066-1620

RE: Product Name: NEU 1160 Vegetable Oil Insecticide
EPA Reg. No: 67702-4
Your Application Dated May 15, 2008, to Change Country Code in Establishment
Number, Revise Entity Name under Hotline and Revise Container Disposal Statements
per PRN 2007-4

Dear Mr. Talarek:

The Biopesticides and Pollution Prevention Division is in receipt of your application for Notification under 98-10 dated above. A preliminary screen of this request has been conducted for its applicability under PRN 98-10 and it has been determined that the action(s) requested falls within the scope of PRN 98-10. Our records have been duly noted, and the label submitted with this application has been stamped "Notification, received and reviewed" and will be placed accordingly in our records.

Questions concerning this action should be directed to Ms. Diana Hudson at (703) 308-8713 or email at hudson.diana@epa.gov.

Sincerely,

Linda Hollis

Linda Hollis, Chief
Biochemical Pesticides Branch
Biopesticides and Pollution Prevention
Division (7511P)

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: **CAUTION.** Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco.

Environmental Hazards: Do not apply directly to water. Do not contaminate water when disposing of equipment washwaters or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Please read entire label. Use only as directed. Shake well before each use. Thoroughly wet all parts of the pests and plants. Repeat treatment in 1 - 2 weeks if needed.

PESTS/SITES AND APPLICATION INSTRUCTIONS

[The registrant may use one of the following three application directions, either:

DIRECTIONS FOR MIXING

[For products sold in containers without a hose end sprayer]

For 2% formulation: mix 4 teaspoons of concentrate with 1 quart water (or 2 fluid oz. concentrate with 3 quarts water). Shake well before each use and stir or shake diluted spray frequently during use. Apply one quart of formulation for 3 square yards.

"Apply at a rate of 2% formulation. Using hand-held trigger sprayers, hand sprayers or backpack sprayers, thoroughly spray insect pests with diluted product until plants are wet. Repeat treatment in 1-2 weeks if needed. Apply one quart of formulation for 3 square yards."

OR

"Thoroughly spray insect pests until plants are wet. Repeat treatment in 1-2 weeks if needed. This container will cover XXX square feet and make XX gallons of spray.

To use the Hose 'N Go® Sprayer. These instructions are to be used only for the Hose 'N Go® Sprayer.

1. Shake well before use.
2. Connect spray nozzle to garden hose.
3. Turn on the water from the faucet.
4. When you are ready to spray, turn the red knob on top so that it points to the MIX position on the spray head. (Fig. 1)
5. The spray deflector on the front of the hose-end applicator can be rotated to give a stream or fan spray. (Fig. 2)

To Stop Spraying

6/18

1. When you are finished spraying or if you have to stop spraying at any time, turn the red knob back to the OFF position. (Fig. 3)
2. Turn off the water from the faucet.
3. Turn the red knob to H₂O then OFF, to drain the water from the hose (Fig. 4)
4. Unscrew spray nozzle from hose.

[Depending on the container size, registrants must use one of the following statements:

[For 16-ounce container] This container will cover 648 square feet.

OR

[For 24-ounce container] This container will cover 972 square feet.

OR

[For 32-ounce container] This container will cover 1296 square feet.

OR

[For 1-gallon container] This container will cover 5184 square feet. "

OR

"Thoroughly spray insect pests until plants are wet. Repeat treatment in 1-2 weeks if needed. This container will cover XXX square feet and make XX gallons of spray.

To use the Hose-End Sprayer- These instructions are to be used only for the Hose-End Sprayer

1. Shake well before use
2. Connect spray nozzle to garden hose. Turn on the water from the faucet.
3. When you are ready to spray, turn knob "ON" to begin spraying, "OFF" to stop spraying at any time.
4. Turn off water from faucet. Turn knob to "WATER" then "OFF" to rinse spray nozzle and release water pressure before disconnecting spray nozzle from garden hose.

[Depending on the container size, registrants must use one of the following statements:

[For 16-ounce container] This container will cover 648 square feet.

OR

[For 24-ounce container] This container will cover 972 square feet.

OR

[For 32-ounce container] This container will cover 1296 square.

OR

[For 1-gallon container] This container will cover 5184 square feet.]"

Controls:

Adelgids	Aphids	Mites
Leafhoppers	Mealybugs	Scale
Phylloxera	Psyllids	Immature plant bugs
Sawfly larvae	Whitefly	Powdery Mildew

For use on:

VEGETABLES	FRUITS & NUTS	ORNAMENTAL & SHADE TREES
Beans	Apples	Birch
Cabbage	Cherries	Evergreens
Corn	Citrus	Holly
Curcubits	Figs	Oak
Melons	Grapes	
Peas	Pears	
Potatoes	Nuts	

Soybeans
Tomatoes

Raspberries
Strawberries

Houseplants; Flowering, Foliage and Bedding Plants

POWDERY MILDEW CONTROL

For control of powdery mildew on fruits, vegetables, roses, shrubs, houseplants and ornamentals: Thoroughly apply to both upper and lower leaf surfaces. Continue every 7-14 days as needed until disease is eliminated.

DIRECTIONS FOR DORMANT USE

Controls egg stages of pests present in dormant season and scale insects, mites and mealybugs on dormant shrubs (such as roses), evergreens, woody plants, fruit trees and shade trees. For dormant use apply a 2% formulation, mix 4 teaspoons of concentrate with 1 quart water (or 2 fluid ounces concentrate with 3 quarts water). Thoroughly wet the dormant plants or trees.

USE PRECAUTIONS

Oil removes the glaucous (blue) bloom from such evergreens as Colorado blue spruce and Koster spruce. Use caution on blooms and buds and on oil sensitive plants such as: Chamaecyparis, Cryptomeria, Japanese Holly, Red Cedar and Smoke Tree. If concerned about sensitivity of plants, test spray a portion of the plant and wait several days to determine if burn occurs before spraying larger areas.

Do not combine with sulfur and do not follow a previous application of sulfur or apply sulfur following an application of this material until sufficient time has elapsed for safety (at least 30 days).

When used in combination with or immediately before or after spraying, this product may increase the phytotoxicity of dinitro compounds, or fungicides such as Captan, Folpet, Karathene and Morestan, or copper compounds. If in doubt, treat a small area with a combination spray and wait several days to determine if burn occurs.

Do not use NEU1160 spray when temperatures are above 90°F. When temperatures drop below 32°F during the night, do not spray tree and vine crops until daytime temperatures have warmed to a point above 35°F and crops are free from moisture due to melting frost or heavy dews.

Use of the NEU1160 on citrus after October 1 is capable of increasing the tree's susceptibility to cold damage.

STORAGE AND DISPOSAL

9/18

STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals.

DISPOSAL:

If empty: Nonrefillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

BATCH CODE

[The registrant may use one of these optional statements, either:

"WARRANTY STATEMENT

www.neudorff.com [in the alternative, the distributor's telephone number and website address may be used]

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals: CAUTION. Avoid contact with skin or clothing.

12/18

Personal Protective Equipment (PPE) Requirements: Applicators and other handlers must wear: long-sleeved shirt and long pants; shoes plus socks; and chemical resistant gloves. Follow the manufacturer's instructions for cleaning/ maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

IMPORTANT: When reduced PPE is worn because a closed system is being used, handlers must be provided all PPE specified above for "applicators and other handlers" and have such PPE immediately available for use in an emergency, such as a spill or equipment breakdown.

User Safety Recommendations

- Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Users should remove clothing immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards: For terrestrial uses: Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your State or Tribe, consult the State/Tribe agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and the restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard (WPS).

13/18

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours.

PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water is: coveralls; shoes plus socks and chemical resistant gloves made of waterproof material.

Read entire label. Use only as directed. Shake well before each use. Thoroughly wet all parts of the plants. Repeat treatment in 1 - 2 weeks if needed.

DIRECTIONS FOR MIXING

For field applications, apply 2% formulations, 1 gal of NEU1160 Vegetable Oil Insecticide per 50 gal of water, at a rate of 400 gal/acre.

1. Add sufficient water to the mixing tank to allow proper agitation by pump or paddles.
2. Continue stirring while adding first NEU1160 Vegetable Oil Insecticide then the remaining water.
3. Continue to stir throughout use.
4. Flush fluid in sprayer hose lines back into the tank if the solution has remained unstirred for more than 20 minutes.

PESTS/SITES AND APPLICATION INSTRUCTIONS

Repeat treatment in 1-2 weeks if needed.

Crop	Pest	Application	Rate
Fruit and nut trees - apples, apricots, cherries, nectarines, peaches, pears, plums, prunes, nuts (pecans and almonds)	aphids, apple red bug, scales, European red mite, fruittree leafroller, leafhoppers, mites, pear psylla, certain caterpillars	Dormant, pre-bloom and summer use.	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%

Crop	Pest	Application	Rate
Roses; flowering, foliage and bedding plants - greenhouse and outdoors	aphids, fungus gnats, lace bugs, leafminers, mealybugs, mites, scales, whiteflies	Apply as needed	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%
Cotton	aphids, spider mites, whiteflies	When insects appear - repeat weekly as needed	2%
Sugar beets	leafminer, mites	As needed	2%
Soybeans, melons, tomatoes, vegetables (asparagus, beans, beets, cabbage, cauli-flower, celery, corn, cucurbits, eggplant, lettuce, lima beans, peas, potatoes, peppers, radishes, squash)	aphids, adelgids, armored scale, beetle larvae, cankerworms, certain caterpillars, leafhoppers, leafminers, leafrollers, mealybugs, mites, psyllids, plant bugs, soft scales, webworms, whiteflies	Summer use	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%
Figs	fig scale	Dormant or pre-bloom	2%
Olives	spider mites, scales: parlatoria, oleander and black	Pre-bloom or post-bloom	2%
Small fruits, (grapes, strawberry, blueberry, raspberry, cranberry)	aphids, grape phylloxera, leafhoppers, mealybugs, mites, scales	Dormant and summer use	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%

15/18

Crop	Pest	Application	Rate
Citrus	aphids: citrus mealybug; mites; scale: red, black, yellow & purple	Post-bloom, summer or fall	2%
Ornamental and shade trees (flower and foliage plants, birch, flowering cherry, dogwood, evergreens, hawthorn, holly, magnolia, maple, oak, flowering peach, privet, pyracantha, sycamores)	aphids, adelgids, certain caterpillars, gall mites, lace bugs, leaf beetle larvae, leafhoppers, mealybugs, mites, plant bugs (immature), psyllids (immature), scales (immature), spider mites, whiteflies (immature)	Dormant, pre- bloom and summer use	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%
Houseplants	aphids, fungus gnats, mealybugs, mites, scales, springtails, whiteflies	As needed	2%
	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days.	2%
Forage (alfalfa)	spider mites	As needed	2%
Hops	Powdery mildew	Initiate sprays when disease first appears. Continue sprays every 7-14 days	2%

POWDERY MILDEW CONTROL

For control of powdery mildew on fruits, vegetables, roses, shrubs, houseplants and ornamentals: Start spraying when disease first appears. Thoroughly apply to both upper and lower leaf surfaces. Continue every 7 to 14 days as needed until disease is eliminated. To prevent infection and protect new growth, spray pre-bloom and at early leaf stages.

DIRECTIONS FOR DORMANT USE

Controls egg stages of pests present in dormant season and scale insects, mites and mealybugs on dormant shrubs, evergreens, woody plants, fruit trees and shade trees.

For field applications apply 2% formulation, 1 gal. NEU1160 Vegetable Oil Insecticide per 50 gal of water, at a rate of 400 gal/acre.

USE PRECAUTIONS

Oil removes the glaucous (blue) bloom from such evergreens as Colorado blue spruce and Koster spruce. Use caution on blooms and buds and on oil sensitive plants such as: Chamaecyparis, Cryptomeria, Japanese Holly, Red Cedar and Smoke Tree. If concerned about sensitivity of plants, test spray a portion of the plant and wait several days to determine if burn occurs before spraying larger areas.

For foliage application the spray tank must be free of any sulfur residue before using this material. Do not combine sulfur sprays with this material on foliage during spring and summer months and do not follow a previous application of sulfur or apply sulfur following an application of this material until sufficient time has elapsed for safety (at least 30 days). If in doubt, spray a portion of one tree previously treated with sulfur and wait several days to determine if burn occurs.

When used in combination with or immediately before or after spraying, this product may increase the phytotoxicity of dinitro compounds, or fungicides such as Captan, Folpet, Karathene and Morestan, or copper compounds. If in doubt, treat a small area with a combination spray and wait several days to determine if burn occurs.

Some plants, such as roses, apple trees and strawberries, are sensitive to multiple applications of oil products. Use caution with repeat sprays and if concerned about sensitivity, test spray small areas or individual plants prior to large scale treatment.

Do not use NEU1160 spray when temperatures are above 90°F. When temperatures drop below 32°F during the night, do not spray tree and vine crops until daytime temperatures have warmed to a point above 35°F and crops are free from moisture due to melting frost or heavy dews.

Use of the NEU1160 on citrus after October 1 is capable of increasing the tree's susceptibility to cold damage.

Do not apply this product through any type of irrigation system.

We guarantee your satisfaction or your money back.
