Do not apply if rainfall is expected within 3 hours of application. Do not irrigate within 3 hours of application. Do not apply to the same area more than 4 times a year, not including spot treatments.

If unsure of grass sensitivity, test spray a small area of your lawn. To avoid staining, wait until treated area dries before re-entry. **Do not apply if rainfall is expected within 3 hours of application.** Do not irrigate within 3 hours of application. Do not apply to the same area more than 4 times a year, not including spot treatments.

What will I see?

Works quickly. Treated moss or algae will turn brown or black.

Occasionally a darkening of the grass leaf blades can occur after treatment, however the grass will recover within a few days to weeks. **May stain thatch** (dead grass under lawn); this does not affect the health of the grass.

Use Precautions:

Do not apply to drought stressed grass; ensure lawn is well watered prior to application. Do not apply when the daytime temperature will exceed 85°F. Do not apply to bentgrass. If unsure of grass sensitivity, test spray a small area of your lawn. Do not apply to newly seeded areas prior to grass seed germination. **Avoid spraying desirable plants.** Any desirable plants or structures accidentally contacted should be rinsed with water. To avoid staining, wait until treated area dries before re-entry. **Do not apply if rainfall is expected within 3 hours of application.** Do not irrigate within 3 hours of application. Do not apply to the same area more than 4 times a year, not including spot treatments.
