FOR OUTDOOR RESIDENTIAL USE ONLY

EPA Reg. No. 67760-61

EPA Est. No. XXXX-AA-XX

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

BEFORE YOU USE

Read and follow directions when using.

- GLYFOS READY-TO-USE WEED & GRASS KILLER will kill or injure all green vegetation contacted.
 - Do not spray desirable plants or grasses - they will die too.
 - If a desirable plant is accidentally sprayed, immediately rinse it off with plenty of water.
 - Apply when wind is calm.
 - To avoid tracking product onto desirable plants, keep people and pets off treated areas until spray has dried.
 - This product is not recommended for spot weed control in lawns since it also kills lawn grasses. To control these weeds without harming the lawn, use a selective herbicide such as [product to be inserted by distributor].
- All ornamental flowers, trees & shrubs as well as the following berries, fruits, vegetables and herbs may be planted 1 day after application: artichoke (Jerusalem), beans (all), beet greens, blackberry, blueberry, boysenberry, broccoli, Brussels sprout, cabbage (all), carrot, cauliflower, celery, chard (Swiss), chicory, collards, currant, dewberry, elderberry, endive, gooseberry, horseradish, huckleberry, kale, kohlrabi, leek, lentil, lettuce, loganberry, mustard greens, okra, olallieberry, onion, parsley, parsnip, potato, radish, rape greens, raspberry (black & red), rhubarb, rutabaga, spinach, sweet potato, turnip, & yams.
- These fruits, vegetables and herbs may be planted 3 days after application: corn, cucumber, eggplant, garlic, gourds, melons (all), pea (all), pepper (all) pumpkin, squash (summer & winter), tomatillo, tomato (by seed), & watercress.
- Tomatoes from transplants and all berries, fruits, vegetables and herbs not listed in the previous 2 bullet points may be planted 30 days after application.
- If used to control weeds around berries, wait 14 days after the last application before harvesting.

DIRECTIONS FOR USE (Continued)	
HOW TO APPLY Shake well before use.	<ul style="list-style-type: none"> • Adjust nozzle to a coarse spray. • Spray the weeds or grasses you want to kill until thoroughly wet but not dripping. <p>TIPS:</p> <ul style="list-style-type: none"> • Use a sheet of cardboard or plastic to protect desirable plants from contact with the product. • To Kill Vines, <ul style="list-style-type: none"> - For vines growing up non-living objects, such as poles & fences, or tree trunks with mature bark, cut the vines to a height of 3 – 4 feet and spray thoroughly. - For vines growing up shrubs or trees with green bark, cut the vines at their base and spray thoroughly. • To Kill Brush, <ul style="list-style-type: none"> - For brush taller than 5 feet, cut to the ground and spray regrowth. • To Kill Stumps, <ul style="list-style-type: none"> - Cut living stump close to the ground. - Immediately spray all remaining surfaces thoroughly.
FOR BEST RESULTS	<ul style="list-style-type: none"> • Apply on sunny days with daytime temperatures above 60 °F. • Rain or watering 2 hours after application will not wash away effectiveness.
HOW GLYFOS READY-TO-USE WEED & GRASS KILLER WORKS	<p>This nonselective systemic herbicide enters plants through the leaves and moves down into the roots, killing weeds by stopping the production of a substance found only in plants. Any product not absorbed by plants breaks down into natural materials without moving into or on the soil to untreated plants. Weeds yellow and wilt within hours with complete kill in 1 to 2 weeks.</p>
