Dear Ms. Tackema:

Subject: Edition Tank Mix Herbicide (Tank Mix with Cleanwave Herbicide for Control of  
Kochia and Broadleaf Weed Control in Wheat in Certain States)  
EPA Registration No. 67760-90  
Application Dated February 10, 2009

The labeling referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act as amended is acceptable, provided you make the following changes.

1. In the second paragraph, revise the phrase "rotational cropping recommendations" to read "rotational cropping **intervals**".
2. In the second paragraph, revise the last sentence to read "Do not use the tank mix if restrictions on Cleanwave label conflict with the **instructions** on the Cheminova label.

Submit one copy of your final printed label incorporating the above changes. A stamped copy of labeling is enclosed for your records.

Supplemental labeling must be incorporated into master labeling and copies of master labeling submitted to the Agency for our files at your next printing or within two (2) years from the date of acceptance of supplemental labeling, whichever comes first. The Agency will consider a convincing argument as to why a supplemental label should not appear on a master label on a case by case basis.

Sincerely,

*James A. Tompkins*

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. EDITION™ BROADSPEC or EDITION™ TANK MIX can be mixed with 7 to 14 fluid ounces per acre of CLEANWAVE herbicide for improved kochia and broadleaf weed control in wheat. Apply from the 3-leaf crop growth stage through early jointing (Zadoks scale 30).

| Cleanwave (fl oz/ac) | Kochia (inches) |
|----------------------|-----------------|
| 7-14                 | <2"             |
| 14                   | 2-8"            |

Refer to the EDITION™ BROADSPEC or EDITION™ TANK MIX label and the CLEANWAVE label for information regarding use restrictions, labeled crops, rotational cropping recommendations, sprayer cleanup, use precautions and other information. The most restrictive provisions on either label will apply. Do not use the tank mix if any restrictions on the CLEANWAVE label conflict with the recommendations on the Cheminova label.

## SURFACTANTS

Unless otherwise specified, add a Cheminova recommended nonionic surfactant, having at least 80% active ingredient, at 1 to 2 quarts per 100 gallons of spray solution (0.25 to 0.5% v/v) when EDITION™ BROADSPEC or EDITION™ TANK MIX is tank mixed with CLEANWAVE herbicide. Consult your agricultural dealer, applicator, or Cheminova representative for a listing of recommended surfactants. Antifoaming agents may be used if needed. Do not use low rates of liquid nitrogen fertilizer solution as a substitute for surfactant.
