Subject: Syngenta Seeds – Field Crops - NAFTA, Agrisure® RW Rootworm-Protected Corn
EPA Registration No. 67979-5
Minor Label (“Fast Track”) Amendment
Submission dated 09/16/2008

Dear Ms. Vlachos:

The Agency has reviewed your request to amend the subject product registration, which included the following changes to the product label:

- 1) Replacement of the trademark symbol, which follows ‘Agrisure,’ with ‘®’ to reflect that the trademark is now registered,
- 2) Correction of the OECD Unique Identifier to ‘SYN-IR604-5,’
- 3) Addition of statements that allow for ‘stacking’ by conventional plant breeding,
- 4) Correction of minor typographical errors, and
- 5) Clarification of the current primary brand name utilized for the product.

The changes referred to above, submitted in connection with registration under FIFRA section 3(c)(7)(A), are acceptable provided that you:

- 1) Submit and/or cite all data required for registration of your product under FIFRA section 3(c)(5) when the Agency requires all registrants of similar products to submit such data.

Agrisure® RW Rootworm-Protected Corn
Plant-Incorporated Protectant:
Modified Cry3A Protein for Corn Rootworm Control

This product is effective in controlling or suppressing damage caused by larvae of some corn rootworm species feeding on corn roots.

Active Ingredient:

Modified Cry3A protein and the genetic material necessary for its production (via elements of pZM26) in corn (SYN-IR6Ø4-5)..... ≤ 0.029%*

Other Ingredients:

Phosphomannose isomerase and the genetic material necessary for its production (via elements of pZM26) in corn (SYN-IR6Ø4-5)..... ≤ 0.002%*

*Percentage in whole plants on a dry-weight basis.

Keep Out of Reach of Children

CAUTION

EPA Registration No. 67979-5

ACCEPTED

NOV 03 2008

Under the Federal Insecticide, Fungicide,
and Rodenticide Act, as amended, for
the pesticide registered under
EPA Reg. No. 67979 - 5

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This plant-incorporated protectant may be combined through conventional breeding with other registered plant-incorporated protectants that are similarly approved for use in combination, through conventional breeding, with other plant-incorporated protectants to produce inbred corn lines and hybrid corn varieties with combined pesticidal traits.

The following information regarding commercial planting must be included in the Grower Guide for Agrisure® RW Rootworm-Protected Corn.

Insect Resistance Management

Growers of Agrisure® RW Rootworm-Protected Corn must plant a structured refuge of at least 20% non-corn-rootworm-protected Bt corn that may be treated with insecticides as needed to control corn rootworm larvae. Growers will not be permitted to apply corn-rootworm-labeled insecticides to the refuge for control of insect pests while adult corn rootworm are present unless the Agrisure® RW Rootworm-Protected Corn field is treated in a similar manner.

Refuge planting options include: blocks adjacent to Agrisure® RW Rootworm-Protected Corn fields, perimeter strips, or in-field strips.

External refuges must be planted adjacent to (e.g., across the road from) Agrisure® RW Rootworm-Protected Corn fields.

When planting the refuge in strips across the field, refuges must be at least 4, and preferably 6, consecutive rows wide.

Insecticide treatments for control of corn rootworm larvae may be applied. Instructions to growers will specify that insecticides labeled for control of corn rootworm adults cannot be applied while adults are present in the refuge unless the Agrisure® RW Rootworm-Protected Corn field is treated in a similar manner.

If the refuge is planted in a field that is in a crop rotation system, then Agrisure® RW Rootworm-Protected Corn must also be planted in a field that is in a crop rotation system.

If the refuge is planted on continuous corn, then the Agrisure® RW Rootworm-Protected Corn field may be planted on either continuous corn or in a field that is in a crop rotation system.

These refuge requirements do not apply to operations related to the seed increase/propagation of Agrisure® RW Rootworm-Protected Corn inbred and hybrid seed.

Corn Insects Controlled or Suppressed

Corn has been genetically transformed to produce a modified Cry3A protein for control or suppression of the following coleopteran insects:

Western corn rootworm (*Diabrotica virgifera virgifera*)
Northern corn rootworm (*Diabrotica longicornis barberi*)
Mexican corn rootworm (*Diabrotica virgifera zea*)
