181

STOP! READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazards to Humans & Domestic Animals

CAUTION: Harmful if swallowed. Do not allow contact with eyes or skin.

Statement of Practical Treatment

If Swallowed: Induce vomiting by drinking water and touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

If Inhaled: Remove victim to fresh air.

If In Eyes: Flush with plenty of water. Get medical attention if irritation persists.

If On Skin: Wash with plenty of soap and water.

Environmental Hazards

Do not apply directly to water

Do not contaminate water when disposing of equipment washwaters.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

STORAGE & DISPOSAL

STORAGE: Store in original bag in a locked storage area inaccessible to children or pets. Storage area should be cool and dry. Keep bag tightly closed. Reseal bag by rolling down top to product level and taping or clipping. Do not store near seeds, bulbs, or in greenhouses.

PESTICIDE DISPOSAL: Do not contaminate water, food, or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of at an approved waste disposal facility.

CONTAINER DISPOSAL: Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration or if allowed by State and local authorities, by burning. If burned, stay out of smoke.

IMPORTANT! Always wash hands, face, and arms with soap and water before smoking, eating, drinking, or toileting. Before removing gloves, wash them with soap and water. Keep all unprotected persons, children, livestock, and pets away from treated area. Do not rub eyes or mouth with hands. If you feel sick in any way. STOP work and get help right away. See Statement of Practical Treatment.

DICHLOJELL ROOT KILLER CREAM

DIRECTIONS FOR USE

For use in Municipal and Residential sewer lines to kill tree roots and prevent regrowth.

ACTIVE INGREDIENT:

Dichlobenil (2,6 Dichlorobenzonitrile) 0.5%

Inert Ingredients 99.5%

TOTAL 100.00%

Contains dichlobenil which kills the roots and prevents new growth. Dichlobenil is readily absorbed on organic and inorganic colloids of sludge and clay in pipe joints providing residual control of root regrowth by inhibiting the development of actively dividing meristem cells in root tips. New root growths from outside the pipe joints are retarded or inhibited in growth when they come in contact with the pipe.

KEEP OUT OF REACH OF CHILDREN

CAUTION

This labeling must be in the possession of the user at the time of application.

EPA REG #

EPA EST. #62820-NB001

Manufactured under license by:

Toby's Chemical Company Inc.

209 First Street

Silver Creek, Nebraska 68663

308-773-2429

Net Weight: 25# (Box)

or 5# (5)

(U.S. Patent Pending)

Municipal and Storm Sewer Lines: 8" in diameter x 300' long - Using an 8" tube, as a funnel, string the sewer line with a jetter hose, cable, or rod. Pour 50# of "Dichlojell" cream into the sewer line to be treated. Attach a 6" diameter ball plug or balloon to the hose, cable, or rod and draw the plug through the sewer line pushing the "Dichlojell" cream ahead of it. As it pushes the cream ahead of it, the cream is smeared onto and coats all pipe surfaces and is squeezed onto and into root masses by the ball plug as it is pulled down the line. We recommend also pulling a TV camera down the line to observe the application while it is taking place. The Dichlojell cream sticks to and stays in the line around the joints and if not washed away, it will prevent root regrowth.

University tests have shown that roots soaked for 1 hour in 100 ppm Dichlobenil are completely killed. Dichlojell contains 5,000 ppm Dichlobenil as a topical cream / ointment in a jelled water mixture.

Line Size - 300' Long

8" Diameter - Use 50#

16" Diameter - Use 150#

32" Diameter - Use 450#

For larger lines we recommend using a raft to float the Dichlojell and a physical barrier down the line to coat all the roots.

Residential Sewer Lines 4" - 6" Diameter

Pour 10# of Dichlojell per 75' of 4" to 6" diameter line into the cleanout or line opening. Attach a physical barrier device such as a ball plug, mop head, or other material to push the Dichlojell down the line ahead of the cable end until you reach and move past the point where you cut the roots out.

Dichlojell should be applied annually to prevent root regrowth.
