GENERAL DIRECTIONS

- Ideal for integrated disease management programs.

Bio-Save™ 100 is a naturally occurring biological control agent for postharvest fruit applications only. Do not add directly to waxes, soaps or sanitizers. Do not add to chlorinated water. Application of most chemical fungicides should occur after Bio-Save™ 100 has been applied. Contact your EcoScience technical advisor for more information.

Bio-Save™ 100 must be suspended in water for at least 10 minutes prior to use. Agitate periodically to maintain suspension and agitate the suspension prior to application to fruit.

After opening sealed container, use entire package of Bio-Save™ 100.
