PRECAUTIONARY STATEMENTS:

HAZARDS TO HUMANS AND DOMESTIC ANIMALS:

CAUTION: Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Avoid breathing spray mist. Wash thoroughly with plenty of soap and water after handling.

ENVIRONMENTAL HAZARDS:

Do not apply directly to water. Do not dispose of leftover pesticide into bodies of water.

STORAGE AND DISPOSAL:

DO NOT CONTAMINATE WATER, FOOD OR FEED BY STORAGE OR DISPOSAL:

STORAGE: Store product in original container in a cool (not in direct sunlight), dry, locked place out of reach of children. If product is stored below 50°F the wax component in the formula will solidify. Therefore, it will be necessary to warm the product to above 50°F to make it sprayable. Do not put concentrate or dilute spray into food or drink container. Avoid contamination of feed and foodstuffs. Store upright so that handles and spray nozzle are above the level, of contents of container.

PESTICIDE DISPOSAL: Do not reuse empty bottle except as specified in the directions to prepare more Ready-To-Use product. Use the directions on the E-RASE Refill container to prepare more Ready-To-Use product. When ready to discard this Ready-To-Use container, securely wrap partially filled or empty container in newspaper and put in trash.

PURE PRODUCT FROM THE JOJOBA SEED For Powdery Mildew Control

DIRECTIONS FOR USE:READ ENTIRE LABEL BEFORE USING

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

WHERE TO USE:

To control powdery mildew on plants in and around the home including, but not limited to, roses, flowers, foliage plants, ornamentals, strawberries, and vegetables.

HOW TO USE:

Shake well. Adjust spray nozzle to give a coarse spray. Aim at spots of powdery mildew infection and spray thoroughly until wet. E-RASE is a contact control agent that requires thorough spray coverage to achieve control of powdery mildew. Shake E-RASE container frequently while using. One application should be sufficient, depending on conditions favoring the development of disease. However, repeat applications may be required in 7 to 14 days under severe disease conditions. Spray anytime powdery mildew is active, but no more than once a week. New growth may need to be treated weekly to be protected.

Do not apply when temperatures drop below 50°F.

IMPORTANT NOTE: Complete wetting of foliage will be difficult to achieve on pubescent (hairy leafed) plants. Because of the pubescence, it will be necessary to continue spraying until the spray penetrates through the hairs and wets the actual upper surface of the leaf. Some plant species may be sensitive to E-RASE. Environmental factors significantly affect plant damage. E-RASE has been tested on numerous ornamental plants without toxic effects, however, not all species and varieties grown have been tested. It is recommended that a small branch or a few leaves be treated as recommended before treating the entire plant to be sure no damage occurs. Wait one day to check for plant damage to occur following test sprays on sensitive plants.

Shake well before using and shake spray solution frequently during use.

NOTICE: Buyer assumes all responsibility for safety, use and disposal, not in accordance with directions.
