OFFICE OF

PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

UNITED STATES ENVIRONMENTAL PROTECTION AGENCY WASHINGTON, D.C. 20460

10/23/01

S.R. Siemer, PhD Siemer & Associates 4672 W. Jennifer, Suite 103 Fresno, CA 93722

Dear Dr. Siemer:

1

Subject: Label Amendment Application Dated August 21, 2001 to Modify Directions for Use. EPA Registration No. 68186-3

The amendment referred to above, submitted in connection with registration under FIFRA section 3(c)(7)(A), is acceptable provided that you:

- Submit and/or cite all data required for registration/reregistration of your product under FIFRA section 3(c)(5) and section 4 when the Agency requires all registrants of similar products to submit such data.
- Submit five (5) copies of your final printed labeling before you release the product for shipment.

If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6(e). Your release for shipment of the product bearing the amended labeling constitutes acceptance of these conditions.

A stamped copy of the label is enclosed for your records.

Sincerely,

Sheryl Reilly, Branch Chief Biochemical Pesticides Branch Biopesticides and Pollution Prevention Division (7511C)

Enclosure

DIRECTIONS FOR USE:

READ ENTIRE LABEL BEFORE USING

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

WHERE TO USE:

To control powdery mildew on plants in and around the home including, but not limited to, roses, flowers, foliage plants, omamentals strawberries, and vegetables.

HOW TO PREPARE SPRAY SOLUTION:

This refill product must be mixed with water before use. Follow the directions below.

- 1. Using the top of this refill container as a measuring device, pour one ounce of the refill solution into an empty E-RASE Ready-To-Use container.
- 2. Then add tap water to the E-RASE Ready- To-Use container until the water level reaches the 32-ounce mark on the side of the container.
- 3. Shake well to make sure that refull and water are thoroughly mixed.

HOW TO USE:

Adjust spray nozzle to give a coarse spray. Aim at spots of powdery mildew infection and spray thoroughly until wet. E-RASE is a contact control agent that requires thorough spray coverage to achieve control of powdery mildew. Shake E-RASE container frequently while using. One application should be sufficient, depending on conditions favoring the development of disease. However, repeat applications may be required in 7 to 14 days under severe disease conditions. Spray anytime powdery mildew is active, but no more than once a week. New growth may need to be treated weekly to be protected

Do not apply when temperatures drop below 50°F.

IMPORTANT NOTE: Complete wetting of foliage will be difficult to achieve on pubescent (hairy leafed) plants. Because of the pubescence, it will be necessary to continue spraying until the spray penetrates through the hairs and wets the actual upper surface of the leaf. Some plant species may be sensitive to E-RASE. Environmental factors significantly affect plant damage. E-RASE has been tested on numerous ornamental plants without toxic effects, however, not all species and varieties grown have been tested. It is recommended that a small branch or a few leaves be treated as recommended before treating the entire plant to be sure no damage occurs. Wait one day to check for plant damage to occur following test sprays on sensitive plants.

NOTICE: Buyer assumes all responsibility for safety, use and disposal, not in accordance with directions.
