MASTER LABEL

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION !

PERSONAL PROTECTIVE EQUIPMENT:

Applicators and other handlers must wear long-sleeved shirt and long pants, shoes plus socks. Follow Manufacturer's instructions for cleaning/ maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep PPE separately from other laundry.

User Safety Recommendation:

Users should wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

ENVIRONMENTAL HAZARDS

Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water by cleaning of equipment or disposal of wastes

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

This Product is recommended for selectively killing trees, brush and woody vegetation in all noncropland sites including forests, parks, fence rows, highway, utilities and railroad rights-of-way, industrial and residential sites, and are recommended for controlling the following species; Alder, Australian pine, Aspen (Quacking), Big Leaf Maple, Birch, *Black gum, Brazilian pepper, Ceanothus, Cherry, Chinese Tallow, *Cottonwood *Dogwood, Douglas Fir, Elm, *Eucalyptus, *Hickory, Lodgepole Pine, Madrone, *Maple, Mountain Maple, Melaleuca, Oak, Ponderosa Pine, Poplar, *Red maple, Southern Yellow Pine, Sweetgum, Sycamore, Vine Maple and Willow. [*Considered hard to control (Use tighter spacing)] This Product may be used for killing trees in areas where surface water is present or in intertidal areas, however do not apply to trees that may later be standing in water above the point of injection. For effective results,

MASTER LABEL

the ECOPLUG must be applied such that the contents of the active ingredient is in direct contact with the tree's phloem tissue (the first living tissue under the bark). Application should be made using only FIC Inc. tools or tools recommended by FIC Inc.

For trees with 2.5 inches or less diameter at breast height (DBH), inject one ECOPLUG per tree. For trees greater than 2.5 inches DBH, inject one ECOPLUG every 5-7 inches, evenly around the circumference of the tree on the same horizontal plain and below living limbs.

The contents of the ECOPLUG moves throughout the tree from the point of injection to all roots and shoots. Effects appear gradually (normally within 2 to 4 weeks depending on moisture conditions and growth stage) beginning with wilting, followed with yellowing and browning of the foliage, and finally with deterioration of all roots and shoots.

This Product may also be used to treat the stumps of cut trees and brush. However results can vary greatly, depending on time between cutting and treatment, the height of stump, condition of vascular tissue and precision of ECOPLUG application.

NOTE: Do not apply to trees when their sap is frozen. When making application on Melaleuca, use the longer hammer Bit available from FIC Inc. Even with the longer Bit, some Melaleuca bark may need cutting away to insure proper ECOPLUG placement.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE). The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

STORAGE AND DISPOSAL

Do not contaminate water, foodstuffs, feed or seed by storage or disposal. Keep container closed, at the end of each use period, replace unused Product in to the original container and reseal.

Wastes resulting from use of this product that cannot be used or chemically reprocessed should be disposed of in a landfill approved for pesticide disposal or in accordance with applicable Federal, State and local procedures.
