DIRECTIONS FOR USE

GENERAL CLASSIFICATION

It is a violation of Federal Law to use this product
in a manner inconsistent with it's labeling.

ENHANCED OIL RECOVERY SYSTEMS: For controlling
slime-forming bacteria, sulfide-producing bacteria,
yeasts and fungi in oil field water, polymer or
micellar floods, water-disposal systems, or other oil
field water systems, add 1-60 ppm HALCO/EXXON ENERGY
CHEMICALS, L.P. EC6116A (0.1-6.4 gal. EC6116A per 2400
barrels of water) depending on the severity of contami-
nation. Additions should be made with a metering pump
either continuously or intermittently.

Addition of EC6116A may be made at the free water
knockouts before or after the injection pumps and
injection well headers.

NOTE: Add EC6116A separately to the system.
In order to avoid decomposition of EC6116A due to
the high pH of many additive formulations, do not
mix it with other additives.
