**Re: Notification to update label per PR Notices 2007-4 and 98-10 and Confirmation of Primary Brand Name Change**

**Product: EC6107A (EPA Reg. No. 68708-8)**

Dear Marshall:

On behalf of our client, Nalco Company, enclosed please find a notification for **EC6107A** to update the container handling statements per PR Notice 2007-4 and make the following change per PR Notice 98-10:

- Update the registrant name and address

This notification is consistent with the guidance in PR Notice 2007-4 and PR Notice 98-10.

Nalco submitted an amendment dated April 17, 2003 to update the first aid statements and change the primary brand name from Surflo B11 to EC6107A. The Agency approved the amendment on June 23, 2003. Based on a review of PPIS and NPIRS, it does not appear that the Agency records were updated to reflect this name change. Copies of the 2003 correspondence and subsequent correspondence dated June 30, 2004 are included with this package for your reference. **Please update Agency records to reflect the change in brand name to EC6107A.**

In addition to the above correspondence, enclosed is EPA Form 8570-1, with the required certification statement, along with one copy of the proposed label with changes highlighted. Please let me know if you have any questions or need anything further.

Correspondence for this matter should be sent to me at the Washington, D.C. address identified above. If you require any further information please contact me at (202) 429-3095. Thank you for your attention to this matter.

Sincerely,

*Juli Mann*

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**USE WITH CLOSED DELIVERY SYSTEMS ONLY**

EC6107A may be used continuously or in slug treatment as described below. The frequency of addition depends on many factors that should be established by biological tests. To optimize use of EC6107A, follow the procedures below.

**USAGE PROCEDURES**

- SLUG METHOD** – When the system is noticeably fouled, apply 12 fluid ounces per 1000 gallons of water (95 ppm of product). This treatment should be applied at a point in the system where it will be uniformly mixed. Repeat on a weekly basis, or as needed to establish control.

When microbial control is evident, the treating rate may be lowered to 6 fluid ounces per 1000 gallons of water (47 ppm of product) weekly, or as needed to maintain control.

- CONTINUOUS METHOD** – Before beginning a continuous treatment, apply a slug treatment of 12 fluid ounces per 1000 gallons of water (95 ppm of product). Maintain this treatment by applying 0.5 to 2.5 fluid ounces per 1000 gallons of water (4 to 20 ppm of product).
