**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Use this product only as specified on the label. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your state or tribe, consult the agency responsible for pesticide regulation.

**AGRICULTURAL USE REQUIREMENTS**

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soils, or water is: coveralls, waterproof gloves and shoes plus socks.

**GENERAL INFORMATION**

ENFROST is specially-formulated urea solution that reduces the ice-nucleating activity of ice-nucleating bacteria which are naturally present on leaf surfaces.

The use of ENFROST as a frost control agent also provides 1.9 lbs. of available nitrogen per gallon, which should be considered in the overall fertilizer program.

## GENERAL USE DIRECTIONS

To reduce frost damage, apply ENFROST at rates given below using sufficient volume of spray solution to achieve complete coverage of the foliage. Dilution rates of up to 50 parts of water per 1 part of ENFROST may be needed in order to achieve complete coverage.

This product may be applied using aerial or ground equipment.

Applications should be made if temperatures are expected to fall below 32°F. Repeat applications may be necessary after a 10-day interval if cold weather persists. Make no more than 6 applications/crop/season. Effectiveness may be reduced by removal of material by rain or irrigation washing.

The use of ENFROST may result in minor tissue burn, depending on application rate and crop sensitivity.

An agriculturally-approved, nonionic surfactant (cleared for application to growing crops) may be added to enhance coverage. Use at 0.125% by volume (1 pint per 100 gallons of spray solution).

### Dilute Application Mixing Procedure

1. Fill Tank with 1/2 required water
2. Add ENFROST
3. Add remaining required water
4. Add surfactant, if used
5. Agitate until thoroughly mixed

**All dosage rates are based on undiluted ENFROST.**
