POINTER™ Insecticide

For Systemic Insect Control in Landscape Ornamentals
(such as those in domestic landscape/garden areas, public display plantings, recreation areas, highway and other transportation rights-of-way, utility rights-of-way, scenic corridors, storage areas, forest areas, campgrounds, and other uncultivated, nonagricultural areas) and Interior Plantscapes

For Use By Professional Arborists/Applicators with the ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System
• Easy • No Drilling • No Posting • Saves Time and Money

Active Ingredient:
Imidacloprid (CAS No. 138261-41-3) 5%
Other Ingredients 95%
Total 100%
Contains 6 grams (0.2 oz.) active ingredient per 120 ml (4 oz.) bottle.

Keep Out of Reach of Children
WARNING
See insert for additional precautionary statements.

Net Wt. 4 oz. (120 ml)

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
Refer to insert for complete Directions for Use

ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System Wedgle™ Direct-Inject™ is designed to be used only with ArborSystems pre-bottled chemicals. Tampering with bottles or contents may cause non-warranted damage to your treatment system.

How to Figure Number of Injection Sites

Be sure to follow the directions on the insert to determine how many 1-ml injection sites are needed on any given tree.

Usually this is approximately one injection* for every 5" to 6" of trunk circumference. Make WedgeChek™ insertions evenly spaced around the flare of the tree.

*Depending on type of bark, the dosage per injection site may have to be reduced to ½ ml per site and the number of injection sites doubled.

Storage and Disposal

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store above 65°F in a cool, dry place and in such a manner as to prevent cross contamination with fertilizers, food, feed and other pesticides. Store in original container out of reach of children, preferably in a locked storage area. **Pesticide Disposal:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. **Container Disposal:** Triple rinse, or equivalent, then: offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or by incineration; or if allowed by state and local authorities, by burning. If burned stay out of smoke.

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals

WARNING: Harmful if swallowed, inhaled or absorbed through skin. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear safety glasses. Thoroughly wash with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

First Aid

If Swallowed	<ul style="list-style-type: none"> • Immediately call a poison control center or doctor for treatment advice. • Have person sip a glass of water if able to swallow. • Do not induce vomiting unless told to do so by the poison control center or doctor. • Do not give anything by mouth to an unconscious person.
If Inhaled	<ul style="list-style-type: none"> • Move person to fresh air. • If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible. • Call a poison control center or doctor for further treatment advice.
If on Skin or Clothing	<ul style="list-style-type: none"> • Take off contaminated clothing. • Immediately rinse skin with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice.
If in Eyes	<ul style="list-style-type: none"> • Hold eye open and rinse slowly and gently with water for 15-20 minutes. • Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. • Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

{Note: The First Aid statements' grid format will be used if market label space permits; otherwise a paragraph format will be used.}

Environmental Hazards

This product is highly toxic to fish and aquatic invertebrates. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment

washwaters. This product is highly toxic to bees exposed to direct treatment or residues on blooming plants or weeds. Do not apply this product or allow it to drift to blooming plants or weeds if bees are visiting the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

GENERAL INFORMATION Do Not Apply to Food Bearing Plants

ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System Using the Patented Wedgle™ Tip and WedgeChek™

The treatment system is easy. Most trees can be treated in as little as five minutes allowing arborists/applicators to treat trees quickly. Commercial operators will make more money, handle more business and create more satisfied customers while ground maintenance crews are more productive, more confident and have greater peace of mind. May be used in sunny or overcast conditions. Each system weighs just three pounds and the hassle of hauling around extra equipment and larger amounts of chemical is eliminated. Everything about this system is more efficient and operators will be up and running in just 15 minutes.

With no holes to drill, long term wounding is prevented and by injecting chemicals into the cambial area without introducing air, pathogens are not allowed into the tree and potential decay never starts. After 120 injections you have only one small container of which to dispose. Concerns you may have had when spraying will be eliminated. And with a closed system there is no mixing. Chemicals are injected directly into the tree.

The treatment system is effective. Wedge-shaped needles inject chemical into the active layer of the tree. Because of this, not only is the effectiveness of the chemical increased, control of most problems is reached in as little as five days. The Wedgle also means less chemical used, less chemical purchased and less time spent in each area without having to worry about the quality of your work. Whether you use your system as a preventative, concerned about potential problems, or you're using an IPM approach, needing a curative for definite results, you will have season control with one application.

Quicker and more efficient use of your time and resources. Start using tomorrow's technology on the trees you're treating today, with the world's most effective tree treatment system: the ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System.

The ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System injects pesticides or micronutrients into a tree with minimal wounding. This system injects chemicals into the area of bark separation where the chemical can actively be transferred to other parts of the tree. Injections made during the spring or summer will be more successful than waiting until the fall. Specifically, each tree needs to be inspected. The bark needs to be pliable and that depends upon local weather conditions.

Note: When using Pointer Insecticide, the ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System must be cleaned periodically to prevent clogging.

How to Use the ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System

1. Use protective eyewear and rubber or neoprene gloves when handling or installing the ArborSystems Wedgle™ Direct-Inject™ Tree Treatment System.
2. Attach the chemical bottle to the Wedgle™ Direct-Inject™ Unit.
3. Attach the Wedgle Tip to the Wedgle™ Direct-Inject™ Unit. Make sure the small hole in the tip is pointing straight up. Set the delivery volume on the unit to 1 ml or ½ ml, as appropriate.
4. Determine the thickness of the bark. Insert the Wedgle Tip into the fissure of the tree. If the tip penetrates more than the length of a WedgeChek, the injection will be made in the fissure. If the tip penetrates less than the length of a WedgeChek, the injection will be made through the tight bark of the tree. On thin-barked trees, you may find it necessary to insert the WedgeChek in only one-half as far as normal.
5. Insert the WedgeChek™ punch into the tree. Remove the punch and squeeze the trigger to remove the bark core. Examine the core to make sure the core that has been removed is approximately the same length as the WedgeChek. Repeat this step while moving around the flare of the tree. Be sure to follow the label directions on this insert to determine how many injection sites are needed on any given tree. Usually this is approximately 1 injection for every 4" to 6" of trunk circumference.
6. Place the WedgeChek on the protruding pin on the bottom of the grip then insert the WedgeChek directly into the punched hole. The barbs on the WedgeChek will secure it in the tree.

6/13

7. Insert the Wedge Tip with a straight motion through the WedgeChek. Make sure the hole in the tip passes completely through the WedgeChek. As the tip is pushed through the WedgeChek and the bark the blunt-edged tip automatically stops when it reaches the wood.
8. With a smooth motion, firmly squeeze both handles at the same time. This allows the bark to separate and the chemical to be deposited into the area. The WedgeChek plugs the hole, allowing the chemical to remain in the tree.
9. Slowly withdraw the tip and repeat this step while moving around the flare of the tree.
10. Move laterally and make the next injection until the entire tree trunk has been treated. After the tree has taken up the chemical, each WedgeChek can either be removed or left in the tree.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its label.

GENERAL INFORMATION

Tree Insecticide Injectors

Do not Apply to Food-Bearing Plants

This product contains an insecticide that is injected into holes drilled into the tree trunk at the flare of the tree. The pre-measured doses are convenient and easy to use. The insecticide controls Adelgids, Armored Scales (suppression), Aphids, Elm Leaf Beetles, Black Vine Weevil Larvae, Eucalyptus Longhorned Borer, Flatheaded Borers (including bronze birch borer and alder-birch borer), Japanese Beetles, Lace Bugs, Leafhoppers, Leafminers, Mealybugs, Pine Tip Moth Larvae, Psyllids, Royal Palm Bugs, Soft Scale Insects, Sawfly Larvae, Thrips (suppression), White Grub Larvae (such as Japanese beetle larvae, Chafers, *Phyllophaga* spp., Asiatic Garden Beetle and Oriental Beetle) and Whiteflies on all types of ornamental trees.

{Illustration of measuring tree}	{Illustration of tree and drilling hole}	{Illustration of product application}
----------------------------------	--	---------------------------------------

<p>Tools: Tape measure and 3/8" drill. Dosage: Measure the circumference of the tree trunk at the flare of the tree. You will need one ampule (0.036 oz.) for every four to six inches of circumference.</p>	<p>Instructions: Drill 1/2" deep holes into the tree at the flare of the tree. Drill the holes at a downward slant (about 45°). Evenly space the holes around the tree. Use only a clean, sharp drill bit. Brad point drill bits are best.</p>	<p>Use rubber or neoprene gloves when handling this product. Cut off the tip and squeeze the chemical into the holes. Use one ampule for each hole.</p>
--	---	--

Treatments are more effective early in the growing season. Injections to conifers may be either slow in uptake or have no uptake at all.

Note: Holes drilled in a tree are wounds. Do not drill holes (3/8 inch and larger at 3-inch spacing) in a tree more than once a year or more than two consecutive years.

[Storage and Disposal]

Storage: Store above 65°F in a cool, dry place and in such a manner as to prevent cross contamination with fertilizers, food, feed and other pesticides. Store in original container out of reach of children, preferably in a locked storage area.

Disposal: If empty, do not reuse ampules. Place in trash or offer for recycling if available. If partly filled, call your local solid or household waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

PRECAUTIONARY STATEMENTS
Hazards to Humans & Domestic Animals

WARNING: Harmful if swallowed, inhaled or absorbed through skin. Causes substantial but temporary eye injury. Do not get in eyes or on clothing. Wear safety glasses. Thoroughly wash with soap and water after handling. Remove contaminated clothing and wash clothing before reuse.

First Aid

Dear Ms. Daniel:

Subject: ArborSystems
 Pointer™ Insecticide
 EPA Reg. No. 69117-1

On behalf of its client **ArborSystems**, RegWest Company, LLC is submitting the attached materials as notification of a label revision for subject product. RegWest Company will act as sole agent in this endeavor.

Attached are the following:

1. Application for Pesticide: Other
2. One **Reference Label** (illustrates the revisions)
3. One **New Label** (incorporating the revisions)
4. Two copies of final printed labeling

Please note the final printed labeling does **not** represent the full text of the EPA stamped accepted label.

As illustrated on the **Reference Label**, the label revisions include:

1. Deletion of the emergency medical treatment information phone number from the 'First Aid' section (this sentence is optional per PR Notice 2001-1).

The following revisions are pertinent only to the homeowner use section of the master label:

2. Correction of the net contents information, including the correction of the individual ampule size (from 0.36 oz. to 0.036 fl. oz.); the ampules were always 0.036 fl. oz.
3. Addition of information that this product is being distributed by Monterey for ArborSystems.
4. Changing the instruction to 'measure at 4 feet above the ground,' as this is no longer a valid instruction within the industry. This will also standardize this instruction with the professional use label.
5. Reinstatement of the 'Precautionary Statements' section (there is no change to the section; it is identical to that approved in the professional use label section. This section was merely omitted from the previously submitted draft labeling).
6. Adding the verbiage for the individual ampule label (all verbiage is taken directly from the approved labeling and meets current requirements for very small labels on very small containers).

Please contact me at (970) 353-0611 or kim@regwest.com if you require additional information or have any questions.

Regards,
RegWest Company, LLC
