Fungicide, and Rodenticide Act,  
as amended, for the pesticide  
registered under  
EPA Reg. No. 69167-2

**BACK of DRAFT LABEL**

**STOPLITE** is a unique insect repellent containing a blend of concentrated botanical and vegetable oils and essences used for centuries to repel biting insects. These oils provide Vitamin E, a known antioxidant. **STOPLITE** absorbs quickly into the skin, leaving it soft and silky, not oily or greasy.

**DIRECTIONS FOR USE:** It is a violation of federal law to use this product in a manner inconsistent with its labelling.

Apply as needed to exposed skin for maximum protection, smoothing liberal amounts onto the skin. Can be applied to the face and neck, being careful not to place **STOPLITE** directly into the eye. To maintain efficacy, reapply after one hour. If you are bitten prior to use, **STOPLITE** can relieve the itching when immediately applied to the bite.

**PRECAUTIONARY STATEMENTS:** This product is intended for external use only and not for internal consumption. In case of eye contact, wash eyes with plenty of water. May cause skin irritation in rare cases. If so, wash with mild soap and water. Get medical attention if irritation persists.

Secure cap tightly and store in cool dark area.

Manufactured exclusively in the USA for Cartilage Technologies, St. Michael, Barbados, W.I.
