2 fl. oz. (4 TBSP) in 2 gallons of water treats 12 sq. ft. <u>Azaleas, Camellias, Rhododendrons, and Other Shrubs</u> •1 fl. oz. (2 TBSP) in 1 quart of water per foot of plant height

FOR BEST RESULTS:

- Begin using this product in the spring when plants are actively growing
- Reapply every 6 weeks for a total of 3 applications per year. In areas where disease occurs frequently and the soil is sandy, the application interval can be shortened to 4 - 5 weeks for a total of 4 applications per year.
- Ensure the product gets down into the root zone by:
 - Pulling mulch away from plants to be treated.
 - Building a well around individual plants.
 - Pouring the drench solution slowly to allow the soil to absorb it.

• Keep rose, flower, and shrub beds clean.

This minimizes harborage sites for diseases and insects (for additional cultural practices, consult your County Extension Service).

HOW IMIDA-TEB GARDEN SC WORKS:

Water moves the product down into the root zone where it is taken up and moved into the plant. The entire plant, even new growth, is fed and protected against insects and disease. Rain or watering cannot wash off this long-lasting systemic protection. 91491
