Strain of *Bacillus subtilis*

Innovative natural product solutions for pest management

## Supplemental Label for Use on Hop and Peanut (Not for Use in California)

Revises Master label dated June 20, 2000

### SERENADE® BIOFUNGICIDE WETTABLE POWDER EPA Reg. No. 69592-4

FOR CONTROL OF POWDERY MILDEW (*Sphaerotheca macularis*) ON HOP AND EARLY  
 LEAF SPOT (*Cercospora* spp.) ON PEANUT

#### DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

CROP	DISEASE	RATE Lbs/acre	USE RECOMMENDATIONS
Hop	Powdery Mildew <i>Sphaerotheca macularis</i>	6 - 10	Begin applications when environmental conditions are conducive to threatening or rapid disease development. Continue sprays at 7-day intervals or as needed. Apply in sufficient water to ensure full coverage. As plants mature use higher label rates.
Peanut	Early Leaf Spot <i>Cercospora</i> spp.	4 - 8	Begin applications when environmental conditions are conducive to threatening or rapid disease development. Continue sprays at 7-day intervals or as needed. Peanut hay may be fed to livestock.

All applicable directions, restrictions and precautions on the EPA-registered label are to be followed.

This Supplemental Label for use on Hop and Peanut must be in the possession of the user at the time of pesticide application on either of these crops.
