

AUG 15 2002

Edward W. Lyle  
Regulatory Counsel  
1805 - 45<sup>th</sup> Street, NW  
Washington, DC 20007-2070

Subject: CFR Packaging, Inc.  
Clor Mor Granular Trichlor  
EPA Registration No. 69681-10  
Application Date: May 20, 2002  
Reviewer Receipt Date: May 21, 2002

Dear Mr. Lyle:

The following amendment, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended, is acceptable with the conditions listed below:

- To change the primary brand name of the product from Allchem Granular Trichlor to Clor Mor Granular Trichlor.
- To add a super chlorination statement to the label at the request of California Department of Pesticide Regulation.
- To modify the First Aid statement per PR Notice 2001-1.
- To add optional marketing text.

**Conditions**

Revise the label as follows:

1. Add the re-entry statement at the end of "Swimming Pool Disinfectant" directions for use. It appears after the "Algaecide" directions for use but not after the Swimming Pool.

"Re-entry into treated swimming pools is prohibited above levels of 3 ppm of chlorine due to risk of bodily injury."

| CONCURRENCES |          |  |  |  |  |  |  |
|--------------|----------|--|--|--|--|--|--|
| SYMBOL       | 7510c    |  |  |  |  |  |  |
| SURNAME      | Mitchell |  |  |  |  |  |  |
| DATE         | 8-15-02  |  |  |  |  |  |  |

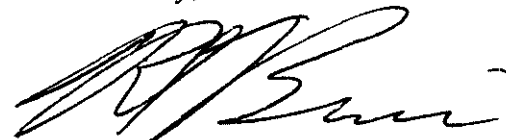

2. *The swimming pool directions for use should read: "Ensure all pool equipment systems are in proper working condition. **Backwash the filter following manufacturer's directions . . .**"*
  
3. *The directions for use for "Superchlorination" must include the statements:*
  - *The pH should be maintained between 7.2 and 7.6.*
  - *Use pool only when the chlorine residual is between 1.0-3.0 ppm.*
  - *Frequency of treatment, and dosage is dependent on temperature and bather load.*

**General Comments**

*A stamped copy of the labeling accepted with conditions is enclosed. Submit three (3) copies of your final printed labeling before distributing or selling the product bearing the revised labeling.*

*Should you have any questions or comments concerning this letter, please contact Delores Williams at (703) 308-6372.*

*Sincerely,*

*Robert S. Brennis  
Product Manager - Team 32  
Regulatory Management Branch II  
Antimicrobials Division (7510C)*

{Text in brackets [xxx] is optional and may or may not be included on any final label.}  
{Text in braces (xxx) is for administrative purposes and will not appear on any final label.}

# CLOR MOR GRANULAR TRICHLOR

{Optional marketing statements that may be used with swimming pool disinfection.}  
[Completely Soluble]  
[Stabilized]  
[Disinfectant]  
[Slow Dissolving]  
[Dissolves Completely]  
[UV Stabilizer built in]  
[Contains no metals]

{Optional marketing statements that may be used with algaeicide.}  
[For white plaster pools]  
[Completely Soluble]  
[Concentrated]  
[Algaeicide]  
[Slow Dissolving]  
[Dissolves Completely]  
[Kills black algae]  
[Kills black and green algae]  
[Removes unsightly algae spots]  
[Contains no metals]  
[Will not stain pool surfaces]

**ACTIVE INGREDIENT:**  
Trichloro-s-triazinetriene. . . . . 99%  
**INERT INGREDIENTS:** . . . . . 1%

Available Chlorine 90%

## KEEP OUT OF REACH OF CHILDREN DANGER

### FIRST AID

**Have the product container or label with you when calling a poison control center or doctor, or going for treatment.**  
**IF ON SKIN OR CLOTHING:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.  
**IF IN EYES:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.  
**IF SWALLOWED:** Call poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by poison control center or doctor. Do not give anything by mouth to an unconscious person.  
**IF INHALED:** Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call poison control center or doctor for treatment advice.  
**NOTE TO PHYSICIAN:** Probable mucosal damage may contraindicate the use of gastric lavage.  
**SEE [BACK] [SIDE] PANEL FOR PRACTICAL TREATMENT AND PRECAUTIONARY STATEMENTS.**

**ACCEPTED  
with COMMENTS  
EPA Letter Dated:**

AUG 15 2002

Under the Federal Insecticide,  
Fungicide, and Rodenticide Act as  
amended, for the pesticide,  
registered under EPA Reg. No. 69681-10

**PRECAUTIONARY STATEMENTS  
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER**

**CORROSIVE.** Causes irreversible eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through the skin. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking or using tobacco. Remove contaminated clothing and wash before reuse.

**ENVIRONMENTAL HAZARDS:** This product is toxic to fish and aquatic organisms. Do not contaminate water by cleaning of equipment or disposal of waste. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

**PHYSICAL AND CHEMICAL HAZARDS:** This product is a strong oxidizer and contact with organic matter may cause fire. Contact with water liberates irritating chlorine containing gases. At temperatures above 325 degrees F decomposes with liberation of toxic gases. In case of fire or thermal decomposition, isolate container and flood with large amounts of water.

{Directions to be used for swimming pool disinfection.}

**DIRECTIONS FOR USE**

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and use directions.

**SWIMMING POOL DISINFECTANT**

This product, when used as directed, is effective as a swimming pool water disinfectant.

**SUPERCHLORINATION**

Superchlorination is necessary at the start of the bathing season, upon filling the pool, every week during hot weather and following heavy rains. Superchlorination is performed by adding two or three times the normal amount of chlorine to oxidize and remove unwanted organic and inorganic material. A granular chlorinated agent, which will dissolve quickly, should be used for superchlorination. Follow the directions for use found on the granular product labelled for superchlorination use. Bathes should not be permitted to enter the pool during superchlorination until the chlorine residual is less than 3.0 ppm.

**MAINTENANCE TREATMENT**

Ensure all pool equipment and systems are in proper working condition. When using other products as outlined in directions for this product, always follow directions on those products. Adjust and maintain pool water pH in the range of 7.2-7.6 as indicated by a suitable test kit. For maximum effectiveness, it is recommended that the pool be first stabilized with 25-35 ppm of Cyanuric Acid to reduce chlorine loss in sunlit pools. This product introduces chlorine and additional Cyanuric Acid into the pool to assure a stabilizing effect.

**DOSAGE:** To initially achieve 1.0-1.5 ppm available chlorine, add 1.25 oz. product per 1000 gallons of water. Add 1/4 oz. product per 1000 gallons of water daily or as needed to maintain that level. A free available chlorine level of 1.0 - 1.5 ppm should be maintained. Check pool frequently with a test kit and maintain residual chlorine level between 1.0 and 1.5 ppm and pH of 7.2 - 7.8.

**APPLICATION: Skimmer** – Use this method to avoid damage and staining to vinyl liner, fiberglass and painted pool surfaces. First, empty skimmer and any in-line automatic chemical feeding device of all chemicals and debris. Filter system should be on and water flowing through the skimmer. Pour correct dosage of this product directly into the skimmer making certain that the product is drawn into the system and does not accumulate. Accumulated product may generate explosive gases resulting in serious bodily injury. Keep pump-filter system running for at least four hours following treatment. **Broadcast** – Scatter correct dosage across deep end of pool being careful to avoid wind-blown dust from entering eyes. Keep pump-filter system running for at least four hours following treatment. Use broadcast method **only** in white plaster pools.

{Directions to be used for algacide.}

**ALGAECIDE**

This product, when used as directed, kills algae and will rid your pool of unsightly algae spots.

Use this product only in **WHITE PLASTER POOLS. DO NOT** use this product in painted, vinyl lined, fiberglass or colored plaster surface pools as damage may occur to the pool surface. Read entire label and use strictly in accordance with precautionary statements and directions. Ensure all pool equipment and systems are in proper working condition. When using other products as outlined in directions for this product, always follow directions on those products. Adjust and maintain pool water pH in the range of 7.2-7.6 as indicated by a suitable test kit. For maximum effectiveness, it is recommended that the pool be first stabilized with 25-35 ppm of Cyanuric Acid to reduce chlorine loss in sunlit pools. This product introduces chlorine and additional Cyanuric Acid into the pool to assure a stabilizing effect.

Before using this product, shut off pump and vigorously brush all surface clinging algae. Wait one hour for the water to become stationary before product application. **DOSAGE:** Use two pounds of this product per 10,000 gallons for medium to heavy algae growth and one pound per 10,000 gallons for light algae growth. **APPLICATION:** At night or when the pool is not in use, broadcast this product directly into the water in the deep end of the pool and over any visible algae growth. Twelve hours after chemical treatment turn pump on and vacuum dead algae through the filter. Brush any remaining algae and clean/ backwash filter. If live algae are still visible, repeat treatment.

**REENTRY:** REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM OF CHLORINE DUE TO RISK OF BODILY INJURY.

**HOW TO CALCULATE POOL CAPACITY**

**SHAPE OF POOL                    GAL. OF WATER (Dimensions in ft.)**

- Rectangular. . . . . Length x width x avg. depth x 7.5
- Circular. . . . . Diameter x diameter x avg. depth x 5.9
- Oval with straight sides . . Long diameter x short diameter x avg. depth x 6.7

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Store in a dry, cool and well-ventilated area. Avoid moisture getting into container. Keep off wet floors. In case of spillage, wash with large amounts of water. After each use, keep container tightly closed. **Oxidizing material.** Keep away from flames, sparks and all sources of heat. Avoid contact with organic material.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL (FIBERBOARD):** Completely empty liner by shaking and tapping sides or bottom to loosen clinging particles. Empty residue into application equipment. Then dispose of liner in a sanitary landfill or by incineration if allowed by State and local authorities. If drum is contaminated and cannot be reused, dispose of drum in same manner.

**CONTAINER DISPOSAL (PLASTIC):** Triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.
