

**PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

DANGER:

CORROSIVE: may cause severe skin and eye irritation or chemical burns to broken skin. Causes eye damage. Wear safety glasses or goggles and rubber gloves when handling this product. Wash after handling. Avoid breathing vapors. Ventilate poorly ventilated areas as soon as possible. DO NOT return until odor has dissipated.

ENVIRONMENTAL HAZARDS:

This pesticide is toxic to fish. Do not discharge effluent containing this product into the lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge sewage treatment plant effluent. For guidelines contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS:

STRONG OXIDIZING AGENT: Mix only with water according to label directions. Mixing this product with organic matter e.g. in feces, urine, e.g. chemicals or ammonia, acids, detergents, etc. will release hazardous chlorine gas with a irritating to eyes, lungs and mucous membranes.

DEFLECTION FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. NOTE: This product degrades with age. Use a chlorine test kit and increase dosage, as necessary, to obtain the level of available chlorine.

SANITATION IN MEAT AND POULTRY PROCESSING PLANTS SANITATION OF SURFACES SUCH AS PROCESSING EQUIPMENT, DAILY EQUIPMENT, FOOD UTENSILS, DISHES, SILVERWARE, GLASSES SINK TOPS, COUNTER TOPS, REFRIGERATED STORAGE AND DISPLAY EQUIPMENT AND OTHER NONPOROUS FOOD CONTACT SURFACES IN CANNERIES, MEAT PACKING PLANTS, DAIRIES, AND OTHER FOOD INDUSTRIES.

DIKES METHOD-A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that available chlorine does not drop below 30 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 5 oz. of Low-Temp Sanitizer with 10 gallons to provide approximately 200 ppm available chlorine by weight.

Apex Low-Temp Sanitizer is an ideal tableware sanitizer and disinfectant for mechanical spray warewashing machines.

Clean equipment surfaces in the normal manner. Prior to use, rinse all surfaces with sanitizing solution, maintaining contact with the solution for at least 2 minutes. Of solution contains less than 30 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient Low-Temp Sanitizer to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment and do not soak equipment overnight.

Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

DIKES METHOD-A solution of 100 ppm available chlorine may be used in the sanitizing solution if a chlorine test kit is available. Solutions containing an initial concentration of 100 ppm available chlorine must be tested and adjusted periodically to insure that the available chlorine does not drop below 30 ppm. Prepare a 100 ppm sanitizing solution by thoroughly mixing 2 - 1/2 oz. of Low-Temp Sanitizer with 10 gallons of water. If no test kit is available, prepare a sanitizing solution by thoroughly mixing 5 oz. of Low-Temp Sanitizer with 10 gallons of water to provide approximately 200 ppm available chlorine by weight.

Clean equipment in the normal manner. Prior to use, rinse equipment in the sanitizing solution for at least 2 minutes and allow the solution to drain. If solution contains less than 30 ppm available chlorine, as determined by a suitable test kit, either discard the solution or add sufficient Low-Temp Sanitizer to reestablish a 200 ppm residual. Do not rinse equipment with water after treatment. Sanitizers used in automated systems may be used for general cleaning but may not be re-used for sanitizing purposes.

SANITATION OF SURFACES SUCH AS CUTTING BLOCKS, WOOD-TOP TABLES, STEAM TABLE BOARDS, AND OTHER POROUS FOOD CONTACT SURFACES-

SPRAY/POO METHOD- Clean all surfaces after use. Prepare a 600 ppm available chlorine sanitizing solution of sufficient size by thoroughly mixing Low-Temp Sanitizer in a ratio of 15 oz. with 10 gallons of water, use spray or fogging equipment with non-ionic hypochlorite solutions. Always empty and rinse spray/fog equipment with potable water after use. Thoroughly spray or fog all surfaces until wet, allowing excess sanitizer to drain. Ventilate area for at least two hours. Prior to using equipment, rinse all surfaces with a 200 ppm available chlorine solution. Prepare a 200 ppm solution by thoroughly mixing 5 oz. of Low-Temp Sanitizer with 10 gallons of water.

STORAGE AND DISPOSAL:

STORAGE: Store this product in a cool dry area, away from direct sunlight and heat to avoid deterioration. In case of spill, flood area with large quantities of water. Product or mixtures that cannot be used should be diluted with water before disposal in a sanitary sewer. Do not contaminate food or feed by storage, disposal or cleaning equipment.
