Subject: G-Tab9 Tablet
EPA Registration Number: 70060-26
Letter Date: October 19, 2012
EPA Receipt Date: October 25, 2012

Dear Ms. Anastasiou:

This acknowledges receipt of the following notification, submitted in accordance with the provisions of PR Notice 98-10 under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) section 3(c) 9.

Proposed amendments:

- Update Storage & Disposal section according to PR Notice 2007-4.

General comments:

Based on a review of the material submitted, the notification as referenced above is **acceptable**. A copy of the notification has been added to the product's file.

Should you have any questions or comments concerning this letter, please contact Eliza Blair via email at blair.eliza@epa.gov or by telephone at (703) 308-7279.

Sincerely,

A handwritten signature in black ink, appearing to read "Monisha Harris", written over a circular stamp or mark.

**SUBJECT: BASF Corporation
G-Tab9 Tablet (EPA Reg. No. 70060-26)
Notification**

Dear Ms. Harris:

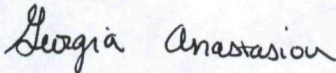

On behalf of BASF Corporation, I am submitting a notification for the product **G-Tab9 Tablet (EPA Reg. No. 70060-26)**. The purpose of this submission is to update the storage and disposal section in accordance with PR Notice 2007-4.

Enclosed please find the following documents in support of this submission:

1. Application for Pesticide which includes a sign certification statements in accordance with PR Notice 2007-4;
2. One (1) copy of the revised label with changes highlighted; and,
3. Two (2) copies of the revised label.

If you have any questions, or require any additional information, please feel free to contact me by phone at 202-393-3903 ext. 19, by fax at 202-393-3906, or by email at georgia@lewisharrison.com.

Sincerely,

Georgia Anastasiou
Agent for BASF Corporation

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

DISINFECTION OF DRINKING WATER (EMERGENCY/PUBLIC/INDIVIDUAL SYSTEMS)

PUBLIC SYSTEMS: G-Tab9 Tablet can be used to disinfectant drinking water. The source of the water to be treated may be from rivers, lakes, wells, cisterns, or similar systems. A chlorine dioxide residual concentration of no less than 0.2 ppm and no more than 0.6 ppm, throughout the system, is sufficient to provide adequate disinfection. Prepare a use-solution of approximately 0.6 ppm of chlorine dioxide by dissolving 1 gram of G-Tab9 Tablet per 40 gallons of water [2.5 grams per 100 gallons]. Check water frequently with a chlorine dioxide test kit. Bacteriological sampling must be conducted at a frequency of no less than that prescribed by the Nation Interim Primary Drinking Water Regulations. Contact your local Health Department for further details.

INDIVIDUAL SYSTEMS: DUG WELLS- Upon completion of the casing (lining) wash the interior of the casing (lining) with a 100 ppm available chlorine dioxide solution using a stiff brush. This solution can be made by dissolving 175 grams of this product into 40 gallons of water. After covering the well, pour the disinfectant solution into the well through both the pipe sleeve opening and the pipeline. Wash the exterior of the pump cylinder also with the disinfectant solution. Start pump and pump water until strong chlorine odor in water is noted. Stop pump and wait at least 24 hours. After 24 hours, flush well until all traces of chlorine have been removed from the water. Contact your local Health Department for future details.

INDIVIDUAL WATER SYSTEMS: DRILLED, DRIVEN & BORED WELLS- Run pump until water is as free from turbidity as possible. Pour a 100 ppm available chlorine dioxide disinfecting solution into the well. This solution can be made by dissolving 175 grams of this product into 40 gallons of water. Add 5 to 10 gallons of clean chlorinated water to the well in order to force the disinfectant into the rock formation. Wash the exterior of pump cylinder with the disinfectant. Drop pipeline into well, start pump and pump water until strong odor of chlorine water is noted. Stop pump and wait at least 24 hours. After 24 hours flush well until traces of chlorine have been removed from the water. Deep wells with high water levels may necessitate the use of special methods for introduction of the disinfectant into the well. Consult your local Health Department for further details.

INDIVIDUAL WATER SYSTEMS: FLOWING ARTESIAN WELLS- Artesian wells generally do not require disinfection. If analysis indicate persistent contamination the well should be disinfected. Consult your local Health Department for further details.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store this product in a cool, dry area away from sunlight and heat.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Non-refillable [container] [pouch] [blister pack] [packet]. Do not reuse or refill this [container] [pouch] [blister pack] [packet]. Offer for recycling, if available. If recycling is not available, dispose [empty pouch] [blister pack] [container] in sanitary landfill or by incineration.
