## DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

**For Disinfection** - Remove gross filth or heavy soil. Then apply IODIS with a cloth, mop or mechanical coarse spray device. When applied with a mechanical coarse spray device, surface must be coarse sprayed until thoroughly wetted. Treated surfaces must remain wet for 10 minutes. Fresh solution should be prepared daily or more often if the solution becomes diluted or soiled.

IODIS is a proven "one-step" cleaner-disinfectant-sanitizer-deodorizer in the presence of moderate amounts of organic soil and 400 ppm hard water.

**Disinfection-Hospitals, Veterinary Clinics, Other Health Care Institutions, Institutions, Industry, Schools, Farm Premises and Poultry Houses:**

Remove gross filth or heavy soil. Then apply 1/2 oz. per gallon IODIS to all floors and other hard (inanimate) non-porous surfaces such as tables, chairs, countertops, tile, porcelain, and bed frames. Allow surfaces to remain wet for at least 10 minutes.

For farms and poultry use, prior to disinfection, all poultry, other animals and their feeds must be removed from the premises. This includes emptying all troughs, racks and other feeding and water appliances. Remove all litter and droppings from floors, walls and other surfaces occupied or traversed by poultry or other animals.

After 10 minute disinfection, ventilate buildings, coops and other closed spaces. Do not house poultry, or other animals or employ equipment until treatment has been absorbed, set or dried.

**Sanitizing - Meat and food processing equipment and utensils:** Remove heavy soils by flushing, scraping, or mopping. Wash with 1 oz. per gallon of IODIS (or other good cleaner). Rinse with clean water and sanitize surfaces with 1 oz. IODIS per 5 gallons of water (25 ppm titratable iodine). Surface should remain in contact with solution for 1-2 minutes. Drain well and air dry. No potable water rinse is required.

**Hand Sanitizing** - In food handling and meat cutting operations. Rinse and immerse hands in a 1 oz. IODIS per 5 gals. of water solution (25 ppm titratable iodine).

**Retort Cooling Water** - For canning Operations - add 1 oz. IODIS per 5-10 gallons of retort water prior to starting up operation to control slime and odor causing bacteria.

**Sanitizing Poultry Drinking Water** - 1 oz. IODIS per 10 gallons of drinking water.

**Shoe Bath Sanitizer** - To prevent tracking harmful organisms into animal areas, scrape shoes and place in a 3 oz. per gallon solution of IODIS for 30 seconds prior to entering area.
