DIRECTIONS FOR USE

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your State and Tribe, consult the agency responsible for pesticide regulation. Refer to the attached booklet for the listing of crops and pests treated, dilution directions and application rates.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personnel protective equipment (PPE), notification to workers, and restricted-entry interval. The requirements in this box apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours. PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated such as plants, soil or water is:

- Coveralls
- Chemical resistant gloves, such as barrier laminates or butyl rubber or nitrile rubber or PVC.
- Shoes and socks

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Keep in original packaging in cool and dry place away from sunlight and foodstuffs. Do not refrigerate.

For Commercial Agricultural Use:

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple Rinse (or equivalent). Then offer for recycling or reconditioning or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

Agroneem

PLEASE READ THIS BOOKLET CAREFULLY BEFORE USING
AGRONEEM

TANK MIXING:

'AGRONEEM' is compatible with commonly used insecticides, fungicides and foliar fertilizers, like all herbal products. Do not use Agroneem with Bordeaux mixture, lime sulfur or other highly alkaline materials.

It is advisable to pre-test the tank mix combination proposed on a few plants to observe phytotoxicity, if any. The climatic conditions and cultural practices may be different in the actual field than experimental conditions. Therefore the responsibility of damage due to tank mix, if any, remains with the user. Since the product is damaged by oxidants it is cautioned that acids and bleaches should not be mixed with AGRONEEM.

MIXING DIRECTIONS:

1. Determine the acreage to be treated with AGRONEEM.
2. Fill tank with appropriate amount of water (see inside for application rates).
3. Add the pre-measured amount of AGRONEEM (see inside for amount to be used).
4. Keep tank agitated with an agitation device. Proper agitation is required, especially when mixing AGRONEEM with other pesticides.

SPRAYING DIRECTIONS:

1. AGRONEEM can be sprayed using a boom system, propeller turbine system (indicated for orchards); pressure hose with gun sprayers, powered back sprayers and manual hand sprayers. We suggest a minimum boom pressure of 160 psi and maximum tractor speed of 2.0 miles per hour. We suggest horizontal nozzles at 10-inch spacing and two vertical drops, one at each end. Each vertical drop should have two nozzles, one at 90° angle and the other at 45° angle. The water used for mixing should have a pH about 5.5 for AGRONEEM to be most effective. If necessary, use a buffer to bring the pH to the desired level.
2. DURING APPLICATION, MAKE SURE THAT THE SPRAY COVERS THE ENTIRE PLANT INCLUDING THE UNDERSIDE OF LEAVES.

GENERAL:

- AGRONEEM is more effective when used as a preventative.
- AGRONEEM is a broad-spectrum herbal insecticide.
- AGRONEEM affects the insects at all stages of growth.
- SHAKE THE CONTAINER WELL, BEFORE USE.

MAXIMUM APPLICATION RATE IS 20 GRAMS OF ACTIVE INGREDIENT (530 FL. OZ. OR 16 QUARTS OF AGRONEEM E.C.) OR LESS PER ACRE ACCORDING TO TOLERANCE EXEMPTION 40 CFR 180.1119

DIRECTIONS FOR CROP APPLICATION

PREVENTATIVE APPLICATION: APPLICATION RATES ARE FOR ONE ACRE EXCEPT AS NOTED.

As a preventative application mix 32 oz. to 48 oz. of AGRONEEM in 50 - 100 gallons water or sufficient amount of water to ensure total foliar coverage.

Start applying when the plants are tall enough to be susceptible to infestation. We suggest as follows:

- For Baby Vegetables, apply 10 days after planting and repeat again in 7- 10 days.
- For Regular Vegetables, apply when the plant has grown two leaves or is 6 inches tall. Repeat application every 10 to 15 days.
- For Fruit Trees, apply when the tree ends dormancy and continue to repeat applications every 10 - 15 days.
(For fruit trees we recommend 64 oz. AGRONEEM i.e. two quarts in 150 gallons of water)
- For Berries, apply when the plant ends dormancy and continue to repeat applications every 10 - 15 days.
(For berries we recommend 64 oz. AGRONEEM i.e. two quarts in 150 gallons of water).
- For Grasses and Forage Crops like Alfalfa, apply in spring, approximately 2 weeks after dormancy period is over, and repeat 10-15 days.

STANDARD APPLICATION : ALL APPLICATION RATES ARE FOR ONE (1) ACRE PER CROP

48 oz. AGRONEEM (1-1/2 quarts) mixed with 100 gallons water or sufficient amount of water to ensure total foliar coverage. When applying at early plant stage we recommend dilution of 48 oz. AGRONEEM (1-1/2 quarts) with 50 gallons of water. When applying in high population crops like berries and fruit trees, we recommend dilution of 64 oz. to 128 oz of AGRONEEM (2- 4 quarts), with 150 - 300 gallons of water.

Repeat application at 7 to 10 day intervals, at least once and if necessary additional times.
