PLEASE READ THIS BOOKLET CAREFULLY BEFORE USING AGRONEEM

TANK MIXING:

'AGRONEEM' is compatible with commonly used insecticides, fungicides and foliar fertilizers, like all herbal products. Do not use Agroneem with Bordeaux mixture, lime sulfur or other highly alkaline materials.

It is advisable to pre-test the tank mix combination proposed on a few plants to observe phytotoxicity, if any. The climatic conditions and cultural practices may be different in the actual field than experimental conditions. Therefore the responsibility of damage due to tank mix, if any, remains with the user. This product is damaged by oxidants. Do not mix acids and bleaches with AGRONEEM.

MIXING DIRECTIONS:

1. Determine the acreage to be treated with AGRONEEM.
2. Fill tank with appropriate amount of water (see inside for application rates).
3. Add the pre-measured amount of AGRONEEM (see inside for amount to be used).
4. Keep tank agitated with an agitation device. Proper agitation is required, especially when mixing AGRONEEM with other pesticides.

SPRAYING DIRECTIONS:

1. Spray AGRONEEM using a boom system, propeller turbine system (indicated for orchards); pressure hose with gun sprayers, powered back sprayers and manual hand sprayers. Use a minimum boom pressure of 160 psi and maximum tractor speed of 2.0 miles per hour. Use horizontal nozzles at 10- inch spacing and two vertical drops, one at each end. Each vertical drop must have two nozzles, one at 90° angle and the other at 45° angle. The water used for mixing should have a pH at about 5.5 for AGRONEEM to be most effective. If necessary, use a buffer to bring the pH to the desired level.
2. DURING APPLICATION, MAKE SURE THAT THE SPRAY COVERS THE ENTIRE PLANT INCLUDING THE UNDERSIDE OF LEAVES.

GENERAL:

- AGRONEEM is more effective when used as a preventative.
- AGRONEEM is a broad-spectrum herbal insecticide.
- AGRONEEM affects the insects at all stages of growth.
- SHAKE THE CONTAINER WELL, BEFORE USE.

MAXIMUM APPLICATION RATE IS 20 GRAMS OF ACTIVE INGREDIENT (530 FL. OZ. OR 16 QUARTS OF AGRONEEM E.C.) OR LESS PER ACRE
ACCORDING TO TOLERANCE EXEMPTION 40 CFR 180.1119
