OFFICE OF PREVENTION, PESTICIDES AND TOXIC SUBSTANCES

Dr. Ann M. Tillman, Technical Director United Phosphorus, Inc. 423 Riverview Plaza Trenton, NJ 08611

AUG 22 2006

Subject:

Supplemental Label for the Additional "Me-Too" Use on Soybeans

Acephate 97UP Insecticide EPA Reg. No. 70506-8

Your Application of November 21, 2005

Dear Dr. Tillman:

The labeling amendment referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide, and Rodenticide Act, As Amended (FIFRA), is acceptable, provided that you:

- 1. Submit two copies of your final printed label before you release the product for shipment.
- 2. Submit your revised data matrix corrected as described below before you release the product for shipment or within 30 days, whichever comes sooner.

Correct Guideline number 870.6300 to include the additional studies in our files for this guideline number. Your previous data matrix listed additional studies, but the MRID numbers for the studies were incorrect. Refer to item one of our letter dated June 13, 2006. Reinstate these data citations on your data matrix with the MRID numbers corrected as indicated below.

A search of our records indicate that all the MRID numbers in question could be corrected by merely replacing the second number 5 with a 6.

3. As a member of the various task forces listed on your data matrix, the correct designation for addressing the data call-ins for the data under guideline numbers 875.2400, 875.2500, 875.1100(231) and 875.1300(232) would simply be as a member of the corresponding task force as stated on your data matrix. Replace "own" with the more appropriate designation "cost-share". The "own" designation is not appropriate unless United Phosphorus would actually be submitting the data in response to the data call-ins.

2/3

Like wise, the "cite-all" designation appearing on your data matrix would not be appropriate if you intend to rely only on the data provided by a specified data submitter.

If this condition is not complied with, the registration will be subject to cancellation in accordance with FIFRA sec. 6(e). Your release for shipment of the product bearing the amended label constitutes acceptance of this condition.

A stamped copy of the label is enclosed for your records.

Additional label corrections may be needed pending review and evaluation of the required responses to the Interim Reregistation Eligibility Decision and accompanying Data Call In which were mailed to all acephate registrants.

Sincerely,

Marilyn A. Mautz

ACCEPTE

## SUPPLEMENTAL LABEL

### FOR FOLIAR APPLICATION TO CONTROL INSECTS IN SOYBEANS

EPA Reg. No. 70506-8

EPA Est. No. 33560-TN-01

#### **DIRECTIONS FOR USE**

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Read the entire Precautionary Statements, Directions for Use and Conditions of Sale and Limitation of Warranty and Liability before buying or using this product. If the terms are not acceptable, return the product at once, unopened, and the purchase price will be refunded. Always read and follow the label directions and any precautions or restrictions when applying any pesticide alone or in combination with tank mix partners. Use the most restrictive label directions when Acephate 97UP is applied in tank mixes.

This labeling must be in the possession of the user at the time of application. The use of Acephate 97UP Insecticide according to this label is subject to the use precautions and limitations imposed by the label affixed to the container for Acephate 97UP Insecticide.

PESTS CONTROLLED	AMOUNT OF ACEPHATE 97UP PER ACRE	APPLICATION INSTRUCTIONS	RESTRICTIONS	MINIMUM SPRAY INTERVAL (DAYS)	PREHARVEST INTERVAL, DAYS (PHI)
Grasshopper Thrips	3/4 to 1/2 lb. (4 to 8 oz.)	Apply when eggs or insects first appear. Repeat applications may be necessary to maintain insect-pest populations below economically damaging numbers.	Do not apply more than 1.55 lb./A (1.5 lb. ai/A) per season. Do not graze or cut vines for hay or forage.	7	14
Potato Leafhopper Stinkbugs	1/2 to 1 lb. (8 to 6 oz.)	Ground Application: Apply in 10 to 50 gallons per acre by conventional ground equipment to ensure thorough coverage.			
Armyworms (except Beet) Bean Leaf Beetle Cabbage Looper Green Cloverworm Mexican Bean Beetle Soybean Aphid Threecornered	3/4 to 1 lb. (12 to 16 oz.)	Aerial Application: Make aerial applications in 5 to 10 gallons per acre (minimum of 5 gal/A in CA). Use sufficient carrier volume to provide thorough, uniform coverage.			(
Alfalfa Hopper Velvetbean Caterpillar			, ,	(	6.66.00
