SUBJECT: Application for Pesticide Notification (PRN 98-10 Request Alternate Brand Name "Surflan XL 2G" EPA Reg. No.70506-45 Application Dated January 20, 2010

Dear Registrant:

The Agency is in receipt of your Application for Pesticide Notification under Pesticide Registration Notice (PRN) 98-10 dated 01/20/10 for the above product. The Registration Division (RD) has conducted a review of this request for its applicability under PRN 98-10 and finds that the action(s) requested fall within the scope of PRN 98-10. The label submitted with the application has been stamped "Notification" and will be placed in our records.

If you have any questions, please call me directly at 703-305-6249 or Owen F. Beeder of my staff at 703-308-8899.

Sincerely,

Linda Arrington Notifications & Minor Formulations Team Leader Registration Division (7505P) Office of Pesticide Programs

- Established tall fescue and warm season turf (including bahiagrass, bermudagrass, buffalograss, centipedegrass, St. Augustinegrass, and zovsiagrass)

Active Ingredients:

benefin: N-butyl-N-ethyl- α, α, α -trifluoro-2,6-dinitro-p-toluidine	
oryzalin: 3,5-dinitro- <i>N⁴,N⁴</i> -dipropylsulfanilamide	1.0%
Other Ingredients	.98.0%
Total 1	
Contains 1 pound active ingredient per 50 pound bag	

Keep Out of Reach of Children PRECAUCION CAUTION

Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)

First Aid

If in eves: Hold eve open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency medical assistance, call the Rocky Mountain Poison Control Center at 1-866-673-6671.

For chemical emergency: spill, leak, fire, exposure, or accident, call CHEMTREC 1-800-424-9300.

Notice: Read the entire label. Use only according to label directions. Before using this product, read the Conditions of Sale and Limitation of Warranty and Liability at end of label booklet. If terms are unacceptable, return at once unopened.

Agricultural Chemical: Do not ship or store with food, feeds, drugs or clothing.

Precautionary Statements

Hazards to Humans and Domestic Animals CAUTION

Causes moderate eye irritation. Avoid contact with eyes or clothing. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

Personal Protective Equipment (PPE)

Applicators, loaders and other handlers must wear:

- Long-sleeved shirt and long pants
- Shoes plus socks

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

User Safety Recommendations

Users should:

- Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental Hazards

This pesticide is toxic to fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters or rinsate. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas.

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read all Directions for Use carefully before applying.

Do not apply this product in a way that will contact workers or other persons or pets, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 24 hours. **Exception:** If the product is soil-injected or soil incorporated, the Worker Protection Standard, under certain circumstances, allows workers to enter the treated area if there will be no contact with anything that has been treated.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:

- Coveralls
- Chemical-resistant gloves made of any waterproof material
- Shoes plus socks

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for Agricultural Pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Entry Restrictions for Non-WPS Uses: Do not enter or allow other people or pets to enter the treated area until dusts have settled. If watering-in is required after the application, except for those people involved in the watering-in, do not enter or allow other people or pets to enter the treated areas until the watering-in is complete and the surface is dry.

Storage and Disposal

Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage: Store in original container only. In case of leak or spill, contain material and dispose as waste.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Disposal: Nonrefillable container. Do not reuse or refill this container. Completely empty bag into application equipment. Then offer for recycling if available, or dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

General Information

XL-2GSURFLAN XL 2G herbicide is a preemergence herbicide for control of certain annual grasses and broadleaf weeds in container and landscape ornamentals, nursery stock, ground covers, established tall fescue and warm season turf, established flowers, ornamental bulbs, non-bearing fruit and nut trees and non-bearing vineyards, non-bearing berries, Christmas tree plantations, non-cropland and established tall fescue and warm season turf (including bahiagrass, bermudagrass, buffalograss, centipedegrass, St. Augustinegrass, and zoysiagrass). Apply XL-2GSURFLAN XL 2G prior to germination of target weeds or immediately after cultivation. Length of weed control will vary with rate
 of XL-2GSURFLAN XL 2G applied, weed population, potting media or soil conditions, temperature, watering regime, and other factors. Following application, user should monitor and observe level of weed control over time to determine when additional applications may be needed.

General Use Precautions and Restrictions

Do not aerially apply this product.

Do not graze or feed forage from treated areas to livestock.

Landscape and field grown ornamentals: maximum number of applications per year is 2. <u>Ornamental bulbs</u>: for fall application to coarse soils – maximum number of applications per year is 2. <u>Ornamental bulbs</u>: applications February through March, all soils – maximum number of applications per year is 3.

<u>Christmas tree plantations</u>: maximum number of applications per year is 2. <u>Noncrop areas</u>: maximum number of applications per year is 2.

XL 2GSURFLAN XL 2G does not control established weeds. Existing weeds should be controlled by cultivation or with postemergence herbicides. Weed residues, prunings and trash should be removed

For other applications, a single rainfall or sprinkler irrigation of 0.5 inches or more, or flood irrigation is required to activate XL2GSURFLAN XL2G. If rainfall or irrigation has not occurred within 21 days of application and tillage is possible, XL2GSURFLAN XL2G may be activated using cultivation equipment capable of uniformly mixing the herbicide into the upper 1-2 inches of soil. Failure to activate XL2GSURFLAN XL2G may result in erratic weed control. Do not apply when wind conditions favor drift of XL2GSURFLAN XL2G granules from the target area.

Users who wish to use XL-2GSURFLAN XL 2G on plant species not recommended on this label may determine the suitability for such uses by treating a small number of such plants at a recommended rate. Prior to treatment of larger areas, the treated plants should be observed for any sign of herbicidal injury during 30 to 60 days of normal growing conditions to determine if the treatment is non-injurious to the target plant species. The user assumes responsibility for any plant damage or other liability resulting from use of XL-2GSURFLAN XL 2G on plant species not recommended on this label.

Application Directions

Apply XL 2GSURFLAN XL 2G using a drop or rotary-type spreader designed to apply granular herbicides or insecticides. Calibrate application equipment prior to use according to manufacturer's directions. Check frequently to be sure equipment is working properly and distributing granules uniformly. Do not use spreaders that apply material in narrow concentrated bands. Avoid skips or overlaps as poor weed control or crop injury may occur. More uniform application may be achieved by spreading half of the required amount of product over the area and then applying the remaining half in swaths at right angles to the first.

Application Techniques for Applying XL 2GSURFLAN XL 2G

- When using a drop-type spreader, a splashboard mounted under the hopper will provide more even granule distribution.
- A chain fastened to the side of the spreader and allowed to drag on the soil surface can be used to mark the edge of the treated swath and help prevent skips or overlaps.
- For treating smaller areas or rows of nursery stock or ornamental beds, a hand held or push-type rotary applicator such as a whirlybird or cyclone unit is recommended. For hand held units, walk and turn the crank at a constant rate of speed.
- A shaker-type applicator made from a small container with holes punched in the bottom is recommended for small, difficult to treat areas. Carefully measure the amount of product needed to avoid over-application.

Approved Uses

Established[†] Container Grown Ornamentals, Established Tall Fescue and Warm Season Turfgrasses, Landscape Ornamentals, Nursery Stock, Ground Covers, Flowers, Ornamental Bulbs, Non-bearing Fruit and Nut Trees and Non-bearing Vineyards, Non-bearing Berries, Christmas Tree Plantations, and Non-cropland

XL-2G<u>SURFLAN XL 2G</u> is recommended as a preemergence treatment for control of certain and all grasses and broadleaf weeds in container grown ornamentals, landscape ornamentals, nursery stock, ground covers, established tall fescue, warm season turfgrasses, established flowers, ornamental bulbs, non-bearing fruit and nut trees and non-bearing vineyards, non-bearing berries. Christmes tree plantations, and non-cropland. Apply XL-2GSURFLAN XL 2G prior to germination of target weeds, or

immediately after cultivation.

Broadcast Application Rates:

			RFLAN XL 2G	Minimum Time Between Applications	Total Amount Allowed Per Year
L	abeled Use Site	(lb/acre)	(lb/1000 sq ft)	(months)	(lb/acre)
•	Landscape Ornamentals	200	4.6	2	400
•	Field-grown and container-grown ornamentals	300	6.9	4	600

Note: Refer to the "General Information" section of this label for general use precautions and information on application.

Special Use Precautions

To avoid possible plant injury, do not apply XL-2GSURFLAN XL 2G to:

- plants or areas in greenhouses or other enclosed structures.
- plants that will bear fruits, berries or nuts within 12 months of application.
- nursery seedbeds or forest or Christmas tree seedling transplant beds.
- unrooted liners or cuttings that have been planted in pots for the first time.
- · pots less than four inches wide.
- ground covers until they are established and well rooted.
- · ornamental plantings where the likelihood of runoff onto lawn areas containing dichondra or cool season turfgrass species exists.
- Do not apply XL 2GSURFLAN XL 2G to the following plant species or injury may occur: Begonia spp. (begonia) Coleus hybridus (coleus)

Deutzia gracilis (slender deutzia) Pseudotsuga menziesii (Douglas-fir) Thuja occidentalis 'Techny' (Techny arborvitae) Tsuga canadensis (eastern hemlock)

Ice Plant: When establishing unrooted ice plant (Mesembryanthemum crystallinum and Carpobrutus edulis) on coarse soils, do not exceed the 200 lb/acre rate of XL2GSURFLAN XL2G or crop injury may occur. After the ice plant is well established, a second application may be made.

[†]Definition of established plantings: Apply only to established plantings. Established plants are defined as those that have been transplanted into their final growing location for a sufficient period of time to allow the soil to be firmly settled around the roots from packing and rainfall or irrigation. Do not apply to seedbeds or seedling transplant beds.

Unlisted plant species: Users who wish to use XL2GSURFLAN XL2G on plant species not recommended on this label may determine the suitability for such uses by treating a small number of such plants at a recommended rate. Prior to treatment of larger areas, the treated plants should be observed for any sign of herbicidal injury during 30 to 60 days of normal growing conditions to determine if the treatment is non-injurious to the target plant species. **The user assumes** responsibility for any plant damage or other liability resulting from use of XL 2GSURFLAN XL 2G on plant species not recommended on this label.

Weeds Controlled or Suppressed by XL 2GSURFLAN XL 2G

Weeds controlled when XL 2GSURFLAN XL 2G is applied at a rate of 200 to 300 pounds per acre (4.6 to 6.9 pounds per 1000 sq ft).

Ornamental Bulbs

Special Use Precautions

Do not apply to tulip plants that have emerged to a height greater than 3/4 inch. Deep till prior to planting any crop after this use.

Do not apply to gladioli prior to emergence or to plants less than one inch in diameter.

F

Application Rates, Frequency, and Timing of Applications

XL-2GSURFLAN XL 2G may be applied for annual weed control in ornamental bulbs such as bulbous iris, daffodil (*narcissus*), hyacinth, and tulip. Apply XL-2GSURFLAN XL 2G to the soil surface two (2) to four (4) weeks after planting and final hilling but prior to the emergence of annual weeds. XL 2GSURFLAN XL 2G may also be applied following bulb emergence. For fall-planted bulbs, apply XL 2GSURFLAN XL 2G again in late winter or early spring to weed-free soil surfaces.

	Time of		XL 2GSURFLAN XL 2G		Minimum Time Between Applications	Total Amount Allowed Per Year
	Application	Soil Texture	(lb/acre)	(lb/1000 sq ft)	(months)	(lb/acre)

Γ	Fall	Medium and Fine	150	3.4	3	225
	Feb March	All Soil Textures	75	1.7	3	225

Broadcast Application Rates

Christmas Tree Plantations

Apply XL 2GSURFLAN XL 2G to established plantings of labeled field grown Christmas tree species prior to germination of target weeds. Do not apply to Douglas fir (*Pseudotsuga menziesii*) or Eastern hemlock (*Tsuga canadensis*). Do not apply to seedbeds or seedling transplant beds. Apply only to established plantings. Established plants are defined as those that have been transplanted into their final growing location for a sufficient period of time to allow the soil to be firmly settled around the roots from packing and rainfall or irrigation.

Noncropland Areas: Industrial Sites, Utility Substations, Highway Guardrails, Sign Posts, and Delineators

XL 2GSURFLAN XL 2G is recommended as a preemergence treatment for control of certain annual grasses and broadleaf weeds on industrial sites, utility substations, highway guardrails, sign posts, and
 delineators. Apply XL 2GSURFLAN XL 2G prior to germination of target weeds. Areas to be treated should be free of established weeds or existing weeds should be controlled with postemergence herbicides.

Broadcast Application Rates

1	Length of <u>XL-2GSURFLAN XL 2G</u>		Minimum Time Between Applications	Total Amount Allowed Per Year	
	Control	(lb/acre)	(lb/1000 sq ft)	(months)	(lb/acre)
	2 - 4 months	200	4.6	2	400

Note: Refer to the "General Information" section of this label for general use precautions and information on application. Refer to "Approved Uses" section of this label for special use precautions and information weeds controlled.

Warm Season Turfgrasses

- XL-2GSURFLAN XL 2G may be applied as a preemergence treatment for control of annual grasses and certain broadleaf weeds in established warm season turf including bahiagrass, bermudagrass, buffalograss, centipedegrass, St. Augustinegrass and zoysiagrass or established tall fescue growing in warm season areas. Established turf is defined as a dense turf having a well-anchored root system and healthy, vigorous top growth.
- Successful preemergence control of weeds listed on this label requires that XL-2GSURFLAN XL 2G be applied prior to weed germination and be activated by at least one-half (1/2) inch of rainfall or irrigation as soon as possible after application.

Special Use Precautions:

- To avoid possible injury, do not apply XL 2GSURFLAN XL 2G to:
 - · Cool season turfgrass species other than tall fescue.
 - Lawns containing dichondra or cool season turfgrass species.
 - Golf course putting greens or tees.
 - Turfgrass in the spring that was planted the previous fall.
 - Newly sprigged or sodded areas of bermudagrass, St. Augustinegrass, centipedegrass, zoysiagrass or tall fescue until these turfs are well established and have well anchored root systems.
 - Newly hydromulched areas of bermudagrass until such areas are well established.
 - This product must be watered in as soon as possible after application to dissolve the granules. A single rainfall or irrigation of ½ inch or more is required after product application. Watering in must be performed by the commercial applicator or the commercial applicator must provide the following information to the resident or owner in writing:
 - "This product must be watered in as soon as possible."
 - "Do not enter or allow others (including children or pets) to enter the treated areas (except those involved in the watering) until the watering-in is complete and the surface is dry."

XL-2GSURFLAN XL 2G will not control emerged weeds.

XL 2GSURFLAN XL 2G Notification 1/20/10

Page 21

 XL 2GSURFLAN XL 2G may injure turf that is not well established or is stressed or weakened due to unfavorable winter climatic conditions, drought, nematodes, or other factors which damage or weaken
 turf root systems. Apply XL 2GSURFLAN XL 2G only to healthy, well-established turf that has a wellanchored root system.

 Do not apply XL-2GSURFLAN XL 2G in the spring or early summer to tall fescue turfgrass reseeded the previous fall. In such cases, apply Balan* 2.5G granular herbicide at 60 pounds per acre in early summer (Round 1) and XL-2GSURFLAN XL 2G at 100 pounds per acre approximately eight weeks later (Round 2).

XL2GSURFLAN XL2G may thin established annual bluegrass (*Poa annua*) at rates above 100 pounds per acre.

In bermudagrass areas that have been overseeded with winter grasses, a spring application of XL 2GSURFLAN XL 2G will thin the overseeded grasses.

Weeds Controlled or Suppressed by XL 2GSURFLAN XL 2G

Weeds controlled by XL 2GSURFLAN XL 2G when applied at 100 to 150 lb/acre (2.3 to 3.4 lb/1000 sq ft)

Annual Grasses

Summer Annuals:		Winter Annuals:		
Common Name Barnyardgrass Crabgrass Crowfootgrass foxtail Goosegrass Johnsongrass (seedling only) ryegrass, Italian sandbur, field	Scientific Name Echinochloa crus-galli Digitaria spp. Dactyloctenium aegyptium Setaria spp. Eleusine indica Sorghum halepense Lolium multiflorum Cenchrus incertus	Common Name bluegrass, annual	Scientific Name Poa annua	

Broadleaf Weeds

Summer Annuals:		Winter Annuals:		
Common Name Carpetweed knotweed, prostrate purslane, common	Scientific Name Mollugo verticillata Polygonum aviculare Portulaca oleracea	Common Name chickweed, common henbit	Scientific Name Stellaria media Lamium amplexicaule	

In addition to the weeds controlled, the following weeds will be partially controlled or suppressed at 100 to 150 lb/acre (2.3 to 3.4 lb/1000 sq ft).

Common Name	Scientific Name)
carrot, wild	Daucus carota	نے (۲ ۱	.)
fleabane, dwarf	Conyza ramosissima	(د ر د ۱

woodsorrel, yellow	Oxalis stricta		
			2

Application Rates, Frequency and Timing of Applications

XL2GSURFLAN XL 2G can be applied in the spring for summer annual grass and broadleaf weed control, and in the fall for annual bluegrass (Poa annua) and winter annual broadleaf weed control.

	XL 2GSU	RFLAN XL 2G	Minimum Time Between Applications	Total Amount Allowed Per Year
Use Area	(lb/acre)	(lb/1000 sq ft)	(months)	(lb/acre)
All regions	100	2.3	2	200
-	150	3.4	3	300

Broadcast Application Rates (Warm Season Turfgrasses)

1. Summer Annual Grasses and Broadleaf Weeds

Single Application Program: Apply 150 pounds per acre of XL-2GSURFLAN XL 2G in late winter or early spring, prior to the onset of conditions favorable for summer annual weed germination.

Split Application Program: As an alternative to a single application program, XL 2GSURFLAN XL 2G may be applied in a split application. This program is desirable when the initial application is made well in advance of weed germination and where weed control is desired for a longer period of time. Apply 100 pounds per acre of XL-2GSURFLAN XL 2G in an initial application, followed by a second application of 100 pounds per acre 8 to 10 weeks later.

The second treatment of the split application may follow application of a different preemergence grass herbicide in place of the initial XL-2GSURFLAN XL 2G application.

2. Annual Bluegrass and Winter Annual Broadleaf Weeds

Apply XL 2G SURFLAN XL 2G as a preemergence treatment in late summer or early fall, prior to the expected germination period for annual bluegrass and winter annual broadleaf weeds. Do not apply XL2GSURFLAN XL2G to areas where fall overseeding will occur. If annual bluegrass infestation is severe and its elimination will result in thinning of turfgrass cover, apply XL 2GSURFLAN XL 2G at 100 pounds per acre. If thinning of turfgrass cover is not a potential problem, XL 2GSURFLAN XL 2G may be applied at 150 pounds per acre.

In areas of heavy annual bluegrass infestation, its elimination will result in temporary thinning of turfgrass cover. Proper fertilization, irrigation and soil incorporated reseeding should be employed to speed the restoration of desirable turfgrass cover in areas previously occupied by annual bluegrass (See section on reseeding).

Application Directions

I

Apply XL-2GSURFLAN XL 2G evenly over the turfgrass area. Avoid spray pattern skips and overlaps that may result in incomplete coverage or over-application. For best results use application equipment designed to uniformly broadcast granular herbicides. More uniform application may be achieved by spreading half the required amount of product over the area and then applying the remaining half in swaths at right angles to the first application. Calibrate application equipment prior to use, according to manufacturer's directions. Check equipment frequently to make sure it is working properly and distributing granules uniformly.

Reseeding

Herbicides that control annual weeds may also affect establishment of desirable turfgrass seedlings. Reseeding should be delayed for at least 6 weeks following application of XL2GSURFLAN XL2G at the 100 pound per acre rate. When using XL2GSURFLAN XL2G at the 150 pound per acre rate, reseeding should be delayed 12 to 16 weeks after application. When reseeding, it is essential that proper cultural practices such as soil cultivation and seedbed preparation, irrigation and fertilization be followed. For satisfactory reseeding results following XL2GSURFLAN XL2G use, the seeding rate should be increased and equipment designed to place seed in full contact with soil (such as the Rogers Aero Seeder) should be employed.

Spreader Settings

(A guide for calibrating spreaders to apply XL-2GSURFLAN XL 2G in one pass over turf.)

Note: These settings are provided as *suggested* starting points in calibrating each individual spreader. Since no two spreaders are alike, these settings are intended only as a guide in beginning the calibration process.

	Estimated Spreader Setting Necessary to Apply the Specified Rate of XL 2GSURFLAN XL 2G Per Acre In One Pass
