Subject: Amendment to Add a Supplemental Label – Ornamental leatherleaf fern (FL only) use
Product Name: Tebuconazole 3.6 F Fungicide
EPA Registration Number: 70506-114
Application Date: 4/20/2016
Decision Number: 517236

Dear Ms. Hutcheson:

The amended label referred to above, submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act, as amended, is acceptable. This approval is only for a supplemental label that is an addendum to the master label. This approval does not affect any conditions that were previously imposed on this registration. You continue to be subject to existing conditions on your registration and any deadlines connected with them.

This supplemental labeling contains some new and/or revised uses and/or directions which may be additional to the uses and/or directions found on the label on or attached to the container, but this supplemental labeling does not by itself constitute the complete set of use directions. The complete set of use directions is set forth on the container label as combined with this supplemental labeling.

A stamped copy of your labeling is enclosed for your records. You must submit one copy of the final printed labeling before you release the product for shipment with the new labeling.

Your release for shipment of the product constitutes acceptance of these conditions. If these conditions are not complied with, the registration will be subject to cancellation in accordance with FIFRA section 6. If you have any questions, please contact Marcel Howard by phone at 703-305-6784, or via email at howard.marcel@epa.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "Hope Johnson", is written over a faint, circular official stamp.

Hope Johnson, Product Manager 21

Enclosure

Supplemental Label

TEBUCONAZOLE 3.6F FUNGICIDE

EPA Reg. No. 70506-114

This supplemental label expires on December 31, 2018, and must not be used or distributed after this date.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This supplemental labeling and the entire Tebuconazole 3.6F Fungicide container label, EPA Registration Number 70506-114, must be in the possession of the user at the time of the application. Read the label affixed to the container for Tebuconazole 3.6F Fungicide before applying. Carefully follow all precautionary statements and applicable use directions. Use Tebuconazole 3.6F Fungicide according to this supplemental labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Tebuconazole 3.6F Fungicide.

Chemigation: Apply TEBUCONAZOLE 3.6F through irrigation equipment only to crops and diseases for which the Chemigation use is specified. In Turf and Ornamental uses, apply through irrigation equipment only to leatherleaf fern in Florida to suppress anthracnose. Apply this product only through center pivot, lateral move, end tow, side (wheel) roll, traveler, big gun, solid set, or hand move; or drip (trickle) irrigation systems. Do not apply this product through any other type of irrigation system. Crop injury, lack of effectiveness, or illegal pesticide residues in the crop can result from non-uniform distribution of treated water. If you have questions about calibration, you should contact State Extension Service specialists, equipment manufacturers or other experts. Do not connect an irrigation system (including greenhouse systems) used for pesticide application to a public water system unless the pesticide label- prescribed safety devices for public water systems are in place. A person knowledgeable of the Chemigation system and responsible for its operation or under the supervision of the responsible person, shall shut the system down and make necessary adjustments should the need the rise.

The system must contain a functional check valve, vacuum relief valve, and low pressure drain appropriately located on the irrigation pipeline to prevent water source contamination from back flow. The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump. The pesticide injection pipeline must also contain a functional, normally closed, solenoid-operated valve located on the intake side of the injection pump and connected to the system is either automatically or manually shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops. The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected. Systems must use a metering pump, such as a positive displacement injection pump (E.g., diaphragm pump) effectively designed and constructed of materials that are compatible with pesticides and capable of being fitted with a system interlock. Do not apply when wind speed favors drift beyond the area intended for treatment.

Maintain continuous agitation in mix tank during mixing and application to assure a uniform suspension.

Supplemental Label

Allow sufficient time for pesticide to be flushed through all lines and all nozzles before turning off irrigation water. Pesticide may be applied continuously for the duration of the water application.

PLANT	DISEASE	RATE PER ACRE	NOTES
Leatherleaf Fern (FLORIDA ONLY)	Anthrachnose (suppression)	5-10 fl. oz	Make the first application before anthracnose symptoms are present and continue at 12 to 14 day intervals. USE RESTRICTIONS: A maximum of 5 pints of Tebuconazole 3.6F may be applied per acre per year.

COMMENTS:
Apply in a minimum 5 gallons of spray solution per acre using ground equipment or Chemigation.
USE LIMITATION: Tebuconazole 3.6F can cause phytotoxicity to Leatherleaf Fern under certain environmental conditions. Applications in temperatures less than 70 °F can cause phytotoxicity in the form of leaf burning and/or yellowing. Application following by temperatures falling below 55°F can cause similar symptoms. Before using this product on Leatherleaf Fern, read the LIMITATION OF WARRANTY AND LIABILITY section in its entirety.

Read the Limitation of Warranty and Liability on the container labeling before buying or using Tebuconazole 3.6F Fungicide. If terms are not acceptable, return the unopened package at once to Seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the container label.
