Product Specifics / Uses

- Passed AOAC Germicidal Spray Products As Disinfectant Test
- Guaranteed to contain at least a 1:10 dilution of household bleach (5500 ppm) at expiration date (stamped on back panel) if properly stored.
- Cleans and disinfects hard, nonporous environmental surfaces including stainless steel, plastics, glass, glazed ceramics, tile, linoleum, laminated plastic countertops, enamel, glazed porcelain and grout.
- For use on non-critical surfaces/items in clinical labs, blood banks, physician and dental offices, emergency units, nursing homes, veterinarian facilities and hospital areas (including labs, Emergency Rooms (ER), Operating Rooms (OR), radiology, nurses stations, wards, clinics and outpatient areas). Also for use in industrial labs, restrooms and wastewater facilities.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- **To Clean:** Hold bottle 12" from surface. Direct gentle spray to soiled area. Wipe clean with damp applicator such as paper towel or cloth. Allow 5 minutes contact for stubborn stains. No rinsing necessary, unless streaks observed. Polish with a dry cloth.

2/2

- **To Clean and Disinfect in One Step or to Disinfect Pre-Cleaned Surfaces:** Thoroughly spray surface until completely wet (ten second spray time), holding bottle 12" from surface. Leave surface wet at least one minute at room temperature (68-72°F) to disinfect. Then wipe clean with a damp paper towel or cloth. No rinsing necessary. Gross soil should be removed prior to cleaning and disinfecting.
- **Personal Protection:** When handling surfaces soiled with blood/body fluids, wear disposable gloves, gowns and eye covering.
- **Disposal of Infectious Materials:** Blood, body fluids and cleaning materials should be autoclaved and disposed of according to Federal, state and local regulations for infectious waste.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membrane but which does not ordinarily penetrate the blood barrier or enter otherwise normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

Storage and Disposal

Storage: Store in a cool, dry area away from sunlight and heat to inhibit deterioration/reduced concentration of bleach solution. In case of spill, flood area with large quantities of water. **Product Disposal:** Product that cannot be used according to label directions should be diluted with water then disposed of in a sanitary sewer. **Container Disposal:** Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

PRECAUTIONARY STATEMENTS

Physical and Chemical Hazards

Do not use this product with ammonia and acids (such as vinegar), rust removers or toilet bowl cleaners. Will corrode aluminum.
