Subject: Bleach-Rite Disinfecting Spray With Bleach  
EPA Registration No. 70590-2  
Submission Dated: June 19, 2009  
Receipt Date: June 30, 2009

Dear Ms. Payne:

The following amendment submitted in connection with registration under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), as amended, is accepted with a condition.

**Condition:**

You must update the Container Disposal language on the label per PR-Notice 2007-4.

**General Comments**

A stamped copy of the labeling accepted with a condition is enclosed. Submit one copy of your final printed labeling before distributing or selling the product bearing the revised labeling.

Should you have any questions or comments concerning this letter, please call Wanda Henson at (703) 308-6345.

Sincerely,

*for Wanda Henson*

## PRODUCT SPECIFICS / USES

- For use on non-critical surfaces/items in clinical/research/industrial labs and hospital areas including ER, OR, radiology, nursing stations, wards, clinics, dialysis and outpatient. Also for use in blood banks, physician and dental offices, ambulances, nursing homes, veterinarian facilities, wastewater facilities and restrooms.
- Cleans and disinfects hard, non-porous surfaces including stainless steel, plastics, glass, glazed ceramics, tile, linoleum, laminated plastic countertops, enamel, vinyl, floors and glazed porcelain.

## DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

Bleach-Rite® kills the following organisms with a 30-second contact time: Enterococcus faecium (VRE) and Streptococcus pyogenes.

Bleach-Rite® kills the following organisms with a one-minute contact time: Coronavirus ATCC VR-470, Hepatitis-A Virus (HAV), Herpes Simplex Virus Type II ATCC VR-734, Human Immunodeficiency Virus Type 1 (HIV-1), Poliovirus Type I ATCC VR-59, Pseudomonas aeruginosa ATCC 15442, Rotavirus strain WA ATCC VR-2018, Salmonella enterica ATCC 10708, Staphylococcus aureus ATCC 6538 and Staphylococcus aureus (MRSA) ATCC 33591.

Bleach-Rite® is approved as Tuberculocidal with a two-minute contact time for: Mycobacterium bovis BCG (TB).

To Clean and Disinfect in One Step: Thoroughly spray surface until completely wet (ten second spray time), holding bottle 12" from surface. Leave surface wet at least one minute at room temperature to disinfect a broad range of organisms. Wipe clean with a damp paper towel or cloth. No rinsing necessary. Remove gross soil prior to cleaning and disinfecting.

Special Instructions for Cleaning and Decontamination Against HIV on Surfaces/Objects Soiled with Blood/Body Fluids on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in health care settings (or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of HIV). Personal Protection: When handling items soiled with blood or body fluids, use appropriate barrier protection such as disposable latex gloves, gowns, masks or eye coverings. Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from

surfaces and objects before application of this disinfectant. Contact Time: Spray surface to be treated 10 seconds, from a distance of 12", until surface is wet. Allow spray to dry without wiping or allow spray to contact treated surface for a minimum of one minute prior to wiping. Disposal of Infectious Materials: Blood and other body fluids should be autoclaved and disposed of according to federal, state and local regulations for infectious waste disposal.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membrane but which does not ordinarily penetrate the blood barrier or enter otherwise normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semi-critical medical devices prior to sterilization or high-level disinfection.

## STORAGE AND DISPOSAL

\*Storage: Store in a cool, dry area at room temperature (68°-77°F) away from sunlight and heat to inhibit deterioration/reduced concentration of bleach solution. In case of spill, flood area with large quantities of water. Product Disposal: Product that cannot be used according to label directions should be diluted with water then disposed of in a sanitary sewer. Container Disposal: Triple rinse (or equivalent), then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

## PRECAUTIONARY STATEMENTS

Caution: Avoid contact with eyes—use safety glasses. In case of contact with skin and/or eyes, flush with water immediately and if necessary, contact your local medical clinic.

Physical and Chemical Hazards: Do not use this product with ammonia and acids (such as vinegar), rust removers or toilet bowl cleaners. Will corrode aluminum.
