Dear Mr. Heyward:

Subject: Label Notification for Phenolic Disinfectant HG  
EPA Reg. No. - 70627-6

Enclosed is a Notification for our label, Phenolic Disinfectant HG, EPA Reg. No. 70627-6, per PR Notice 98-10. This label notification is based on comments from a State of California review on January 26, 2006. The following items have been modified in the label based on their review:

1. All references to toilets or urinals have been modified to include the outer surfaces only. California maintains that since this product would be used in a toilet bowl filled with water, the active ingredient may be significantly diluted.
2. The mention of cutting boards was qualified to ensure it references non-porous surfaces only.

Enclosed are the following documents in support of this notification:

- EPA Form 8750-1
- One (1) copy of the proposed label, with revisions highlighted
- One (1) copy of the proposed label without highlighting

Please contact me with any questions at 262-631-4830 or [kresti.lyddon@johnsondiversey.com](mailto:kresti.lyddon@johnsondiversey.com).

NOTE: Plastics may remain immersed until ready to use. Stainless steel shears and other metal instruments must be removed after 10 minutes, rinsed, dried and kept in a clean, non-contaminated receptacle. Prolonged soaking may cause damage to metal instruments.

**To Control Mold and Mildew:**

1. Apply use-solution to hard, non-porous inanimate surfaces.
2. Allow to air dry.
3. Repeat application weekly or when growth reappears.

**To Kill Fungi:**

1. Pre-clean heavily soiled areas.
2. Apply use-solution to hard, non-porous inanimate surfaces.
3. Allow surface to remain wet for ten (10) minutes.
4. Wipe surfaces (and let air dry).

HATCHERY: Can be used for cleaning, disinfecting and deodorizing floors, walls and equipment throughout the hatchery. This includes incubators, setters, and racks. Add 1/2 ounce per gallon of water. Hot or cold water may be used. Remove loose waste, gross filth and heavy soil deposits prior to disinfecting. Repeat with fresh solution to disinfect.

MEAT AND POULTRY PLANTS: For use as a floor and wall cleaner. Before use of this compound, food products and packaging materials must be removed from the room and carefully protected. After use of this compound, all surfaces must be thoroughly rinsed with potable water. Use 1/2 ounce per gallon of water. For use on all surfaces in inedible product processing areas, non-processing areas, and/or exterior areas. For use as an antimicrobial agent in all departments. Use product in accordance with its label. All surfaces must be thoroughly rinsed with potable water. Avoid contamination of food contact surfaces in the application of this product.

**For Use For Treatment of Animal Housing Facilities:**

1. Remove all animals and feed from areas being treated.
2. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes, and other facilities occupied or traversed by animals.
3. Empty or cover all troughs, racks and other feeding and watering appliances.
4. Thoroughly clean all surfaces with soap and rinse with water.
5. Apply use-solution to floors, walls, cages and other washable hard, non-porous inanimate surfaces. For smaller surfaces, use a trigger spray bottle to spray all surfaces with solution until wet. To disinfect, all surfaces must remain wet for ten (10) minutes.
6. Do not house animals or employ equipment until product has dried.
7. For disinfection of feed racks, troughs, automatic feeders, fountains and watering appliances scrub with use-solution, let stand ten (10) minutes. Then thoroughly scrub all treated surfaces with soap or detergent and rinse with potable water before reuse.

**\*Kills HBV, HCV and HIV-1 (AIDS Virus) on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids** in health care settings (Hospitals, Nursing Homes) and other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood or body fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Hepatitis B virus, Hepatitis C virus and Human Immunodeficiency virus Type 1 (HIV-1) (associated with AIDS).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HBV, HCV and HIV-1 (AIDS VIRUS) OF SURFACES/OBJECTS SOILED WITH BLOOD/BODY FLUIDS.**

**Personal Protection:** Disposable latex or vinyl gloves, gowns, face masks or eye coverings as appropriate, must be worn during all cleaning of body fluids, blood, and decontamination procedures.

**Cleaning Procedures:** Blood and body fluids must be thoroughly cleaned from surfaces and objects before application of this product.

**Contact Time:** Allow surface to remain wet for 1 minute to kill HBV, HCV and HIV-1 and 10 minutes to kill all other organisms.

**Disposal of Infectious Material:** Blood and other body fluids should be autoclaved and disposed of according to Federal, State, and local regulations for infectious waste disposal.

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal. Do not store near heat or open flame.

**PESTICIDE STORAGE:**

Do not reuse empty container (unless refilling from a larger container of the same product according to the refilling directions outlined previously). (Keep from freezing.)

**PESTICIDE DISPOSAL:**

Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER DISPOSAL:**

(Plastic Containers:)

(If not being refilled with Phenolic Disinfectant HG,) triple rinse (or equivalent). Then offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration or if allowed, by state and local authorities, by burning. If burned, stay out of smoke.

(Sealed Dispenser Cartridges/Portion-Dose (ACCUMIX™) bottles/Tear-open pouches:)

Do not reuse. Wrap empty container and put in trash. [Note to Agency: Please note that neither dispenser cartridges nor portion-dose (ACCUMIX) bottles cannot be triple rinsed because they are closed sealed systems designed to reduce worker exposure to the concentrate.]

**ENVIRONMENTAL HAZARDS** (for containers 5 gallons and larger)

Do not discharge effluent containing this product into lakes, streams, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
