Johnson Wax PROFESSIONAL

FIRE ANT BAIT

KILLS: Fire Ants and Related Ants, and Pharaoh Ants, Indoors and Outdoors.

ACTIVE INGREDIENT
Abamectin* B1 0.011%
INERT INGREDIENTS: 99.989%
*U.S. PAT. 4,310,519

**KEEP OUT OF REACH OF CHILDREN
CAUTION**

NET WEIGHT: 2 POUNDS

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Consult Federal, State or local disposal authorities for approved alternative procedures.

Storage: Johnson Wax Professional Fire Ant Bait may be attractive to rodents and domestic animals. Store in a cool, secure, dry place. To maintain maximum effectiveness close container tightly after use and use within 5 months after opening.

Container Disposal: Securely wrap empty original container in several layers of newspaper and discard in trash. Do not reuse container.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if swallowed or absorbed through the skin. Avoid breathing dust. Avoid contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Do not contaminate kitchen utensils with this product. Pets may be attracted to this product.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwaters.

FIRST AID

IF SWALLOWED: Call a physician or Poison Control Center. Give 1 or 2 glasses of water and immediately induce vomiting by gently touching back of throat with finger or administer syrup of ipecac. Do not give anything by mouth to an unconscious person. Get medical attention.

IF ON SKIN: Remove contaminated clothing and wash affected areas with soap and water.

IF IN EYES: Flush eyes with plenty of water. Call a physician if irritation persists.

ACCEPTED
with COMMENTS
In EPA Letter Dated:
APR 6 2001
Under the Federal Insecticide,
Fungicide, and Rodenticide Act,
as amended, for the pesticide
registered under EPA Reg. No.
70627-45

TO CONTROL IMPORTED FIRE ANTS on Turf, Lawns, and Other Non-Crop Areas Such as Parks and Golf Courses and Imported Fire Ants and Pharaoh Ants Indoors in Homes and the Non-Food/Feed Areas of Commercial Buildings, Warehouses, Hotels, Food Storage Areas, Inedible Product Areas of Meat Packing Plants, Motels, Supermarkets and the Non-Patient Areas of Hospitals and Nursing Homes.
Not for use federally inspected meat and poultry plants.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING

Johnson Wax Professional Fire Ant Bait is formulated in an oil bait that functions as an attractant to fire and Pharaoh ants. This product is a stomach insecticide which acts to reduce ant workers. The bait is also passed by the workers throughout the ant colony and eventually to the queen. Johnson Wax Professional Fire Ant Bait is toxic to ants; however, it is most effective against the ant queen and causes an immediate halt of egg production and disappearance of worker brood. The disappearance of worker ants leads to the decline and eventual elimination of the ant colony. Apply when ants are actively foraging. This is typically when soil temperatures are greater than 60° F (15° C) or consult your State Agricultural Experiment Station or State Extension Service for optimum timing of application. In cases where reinfestation occurs or when very large mounds remain active, retreat as necessary.

OUTDOORS: Apply after dew or rainfall has dried off for maximum effectiveness. For best results, do not apply if rainfall is anticipated within 4 to 6 hours after application.

BROADCAST APPLICATION: Apply this product as evenly as possible to turf, lawns and non-crop areas at a rate of 1 lb. of bait per acre. (0.4 oz. of bait per 1000 sq. ft. or 1.8 oz. of bait per 5000 sq. ft.)

INDIVIDUAL MOUND TREATMENT: Use 5 to 7 tablespoons of Johnson Wax Professional Brand Fire Ant Bait per mound. Apply the bait as evenly as possible over the mound and for a distance of approximately 2 feet out from the base of the mound.

LIMITATIONS: Do not use in pastures, rangeland, or croplands.

INDOORS: Do not use in the food/feed areas of food/feed handling establishments, restaurants or other areas where food is

commercially prepared or processed. Do not use in serving areas while food is exposed or facility is in operation. Serving areas are areas where prepared foods are served such as dining rooms but excluding areas where foods may be prepared or held.

In the home, all food processing surfaces and utensils should be covered during treatment or thoroughly washed before use. Exposed food should be covered or removed.

Nonfood areas are areas such as garbage rooms, lavatories, floor drains (to sewers), entries, and vestibules, offices, locker rooms, machine rooms, boiler rooms, garages, mop closets and storage (after canning or bottling).

Locate ant activity. Follow ants back to voids. Apply bait to crevices or voids where ants are active. Use up to 5 tablespoons per treatment site in a heavily traveled area. Use less in areas with less activity or if the treatment site will not hold that much. Use appropriate application device to place bait in crevices or voids. Enlarging the void's opening may be required. Repeat as necessary. Do not contaminate kitchen utensils with this product.

To treat plumbing voids with known ant activity, obtain access to void and place up to 5 tablespoons inside the plumbing void. Place bait where it will remain dry. Repeat as necessary.

UTILITIES (such as above ground transformers, pedestal boxes, in-ground utility boxes, etc.): If fire ants are nesting or traveling inside utility boxes, place 5 to 7 tablespoons for lighter infestations or up to 2 1/2 oz. for heavy infestations on the ground or open floor area of box. Placement should be made so bait stays dry and does not contact any equipment.
